Abstract	7
Glossary	9
1 Physics of the solar corona	10
1.1 Introduction	10
1.2 Magnetohydrodynamics	12
1.3 Plasma beta	14
1.4 Creation and the emergence of the magnetic flux	15
1.5 The magnetic field in the solar corona	19
1.5.1 Active region loops	19
1.5.2 Prominences	24
1.5.3 Coronal Mass Ejections (CMEs)	31
2 3D reconstruction in the solar corona	43
2.1 Introduction	43
2.2 Stereoscopy	44
2.2.1 Introduction	44
2.2.2 The epipolar geometry	45
2.2.3 Reconstruction	47
2.3 Multi-view B-spline Stereoscopic Reconstruction (MBSR)	52
2.3.1 B-spline curve	53
2.4 3D modeling of the magnetic field through extrapolation	54
2.4.1 NLFFF optimization method	56
2.5 3D reconstruction of coronal loops	58
2.5.1 S-NLFFF: A method which combines MBSR and NLFFF	60
3 Instrumentation	63
3.1 Solar Terrestrial Relation Observatory (STEREO) mission	63
3.1.1 Extreme Ultraviolet Imaging (EUVI) telescope	65
3.1.2 Inner and outer coronagraph	65
3.2 Solar Dynamic Observatory (SDO)	67
3.2.1 Atmospheric Imaging Assembly (AIA)	67

4	Application of the Multi-view B-spline Stereoscopic Reconstruction method for the analysis of two erupting prominences	68
4.1	Previous work on 3D reconstruction of prominences	68
4.2	Previous work on the 3D reconstruction of CMEs	69
4.2.1	Forward Modeling	69
4.2.2	Geometric localization	71
4.2.3	Mask fitting	71
4.2.4	Polarization ratio	72
4.2.5	Stereoscopy	74
4.2.6	Local correlation tracking plus tie-pointing	75
4.2.7	Hybrid methods	75
4.3	3D reconstruction of a CME core	76
4.3.1	Introduction	76
4.3.2	Observations	77
4.3.3	Data analysis	79
4.3.4	Discussion	82
4.4	4D reconstruction of a prominence-CME from two and three views	85
4.4.1	Introduction	85
4.4.2	Observational data and the 3D reconstruction	86
4.4.3	Data analysis and results	91
4.4.4	Discussion and summary	100
5	Coronal magnetic field modeling using stereoscopy constraints	104
5.1	Introduction	104
5.2	Testing the S-NLFFF (Stereoscopic-NonLinear Force Free Field) method	104
5.2.1	Testing the method for Case I	107
5.2.2	Testing the method for Case II	114
5.3	Discussions and conclusions	119
6	Summary and outlook	121
A	Appendix	124
	Bibliography	127
	Publications	137
	Acknowledgements	139
	Curriculum vitae	141
