Zusammenfassung	III
Abstract	VII
1 Introduction	1
2 Fundamentals, System Context and Methodology	5
2.1 Coherent Optical Communication	6
2.1.1 Transmitter	7
2.1.2 Optical Channel	9
2.1.3 Coherent Receiver	11
2.1.4 Carrier Phase Recovery, Differential Encoding, and Phase Slips	13
2.2 Forward Error Correction	17
2.2.1 Shannon Limit	17
2.2.2 FEC Concepts	18
2.2.3 Standardized and State of the Art FEC for Optical Communication	19
2.2.4 Low-Density Parity-Check Codes	21
2.2.5 Message Passing Decoding	23
2.3 Characterization of FEC Codes and Decoders	24
2.3.1 Figures of Merit	24
2.3.2 Hard-Decision Bounded-Distance Decoding	26
2.3.3 EXIT Chart Analysis	26
2.3.4 Code Graph Analysis	30
2.3.5 Simulation Techniques	31
2.4 ASIC Technology	38
2.4.1 Feasibility Limits	38

2.4.2	Progress in ASIC Technologies	41
3	FEC Design	45
3.1	Requirements Specification	45
3.1.1	Spectral Efficiency	46
3.1.2	Performance	46
3.1.3	Real-Time Implementation	47
3.1.4	Configurability	47
3.1.5	Robustness	48
3.2	Bit-Interleaved LDPC Coded Modulation	49
3.2.1	Structured LDPC Codes	50
3.2.2	Algorithm Selection for BICM Decoding	53
3.2.3	Optimized Degree Distribution for LDPC Decoding	66
3.3	Turbo Differential Decoding	74
3.3.1	Soft-Input Soft-Output Differential Decoding	77
3.3.2	Optimized Degree Distribution for Turbo Differential Decoding	88
3.3.3	Compound Interleaver for Turbo Differential Decoding	104
3.3.4	Multi-Rate Turbo Differential Decoding	108
3.4	LDPC Code Design	114
3.4.1	Girth Maximization for Shift-LPDC Codes	115
3.4.2	Girth-Dependent Performance	119
4	Implementation Aspects	123
4.1	Complexity Considerations	124
4.1.1	Algorithmic Complexity	125
4.1.2	Architectural Complexity	128
4.1.3	Gate-Level Complexity	136
4.2	Feasibility	140
4.2.1	General Feasibility Limits	140
4.2.2	Routability	142
4.3	Power Consumption and Toggle Activity	150
4.3.1	Convergence Behavior of TDD	151
4.3.2	Iteration Control Algorithms	153
4.3.3	Gate-Level Activity and Number Representation	154

5	Performance and Robustness Characterization	157
5.1	AWGN Performance Baseline	157
5.1.1	LDPC Decoding	158
5.1.2	Turbo Differential Decoding	159
5.1.3	Error Floor and Post-Cleanup Performance	160
5.2	Robustness Characterization	168
5.2.1	Enhanced Channel Model for Coherent Optical Communication	169
5.2.2	Phase Noise	170
5.2.3	Slip-Induced TDD Failure	171
5.2.4	Polarization Dependent Loss	174
5.2.5	DE-16QAM Constellation Mismatch	175
6	Improved Non-Linear Phase Noise Tolerance	179
6.1	Laser Linewidth and Non-linear Phase Noise Model	179
6.2	Viterbi-Viterbi Carrier Phase Recovery	181
6.3	Slip-Reduced Carrier Phase Recovery	183
6.4	Hybrid Turbo Differential Decoding	185
6.5	Combined Characterization of CPR and TDD	187
7	Real-Time Measurements	191
7.1	Test Setup	191
7.2	Base Performance for Emulated AWGN	193
7.3	Non-Linear Robustness	195
8	Summary and Outlook	199
	Bibliography	203
	List of Figures	214
	List of Tables	221
	Acknowledgement	223
