

Contents

1	Introduction	3
2	The Main LTE Features and SON Concept	7
2.1	The LTE Physical layer	7
2.2	The Concept of Self-Organizing Networks	13
3	Support of User Mobility in Mobile Communication Networks	15
3.1	The Handover Procedure in 3GPP LTE	15
3.1.1	Measurements	17
3.1.2	Measurement Report Triggering	19
3.1.3	Signalling and Data Flow	22
3.2	Handover Decision and Control Parameters	25
3.3	Handover Performance Indicators	29
3.4	Additional Mobility Related Measurements	34
4	Research Activities in Handover Optimisation	37
4.1	State of the Art	37
4.2	Open Issues	40
5	The Simulation Environment	43
5.1	Geodetic Data	43
5.1.1	Building Shapes of the City of Hanover	44
5.1.2	Geodetic Data from the OpenStreetMap Project	45
5.1.3	Land-Use Maps	46
5.2	Modelling the Wireless Communication System	48
5.2.1	Propagation Models	48
5.2.2	User Mobility Models	52
5.2.3	User Data Traffic Model	57
5.2.4	Signal to Interference plus Noise Ratio	58

5.2.5	Cell Load	58
5.3	SIMONE - Simulation of MOBILE NETworks	59
5.4	Simulation Scenarios	60
5.4.1	The Hanover Scenario	61
5.4.2	The 3GPP Simulation Scenario	67
6	Evaluation of the Handover Performance	75
6.1	Network Requirements to Enable the Evaluation of the Handover Performance	77
6.2	Characteristics of the Handover Performance Indicators	83
6.3	Introduction of a Target Function for the Optimisation of the Handover Control Parameters	90
6.4	Impact of the Network Load on the Handover Performance	102
6.5	Statistical Analysis of the Handover Performance Indicators	108
6.6	Identification of the Required Observation Time for the Evaluation of the Handover Performance	115
6.7	Deduction of the Minimal Observation Window to Enable Optimisation of the Handover Performance	128
6.8	Conclusions	139
7	Handover Optimisation Algorithms	143
7.1	Neighbouring HOP Performance Handover Optimisation Algorithm . . .	145
7.1.1	Performance Evaluation in the Hanover Scenario	150
7.1.2	Conclusion on the Applicability of the Neighbouring Handover Operating Point (HOP) Performance Handover Optimization Algorithm (NHP-Opt)	161
7.2	Handover Performance Prediction Optimisation Algorithm	162
7.2.1	Performance Evaluation in the Hanover Scenario	166
7.2.2	Conclusion on the Applicability of the Handover Performance Prediction Optimization Algorithm (HP-Pred-Opt)	180
8	Summary, Conclusion and Outlook	183
	Appendices	188
A	Applicability of State-of-the-Art Optimisation Methods to the Handover Optimisation Problem	189

B The Handover Performance Indicator Handover Failure	195
C Impact of the Target Function Weighting Factors on the Identification of the “best” Handover Operating Point and the Observed Handover Performance	197
D Performance of the HPIs and HOP Selection for Changing Cell Load	201
