Pathological Alteration of Human Adipose Tissue in Obesity	1
Karine Clément	
Dynamics of Human Adipose Tissue. Regulatory Mechanisms and Consequences for Fat Cells and the Whole Body	15
Peter Arner	
Metabolism of Fatty Acids in Adipocytes	21
A.L. Dinel, C. Kolditz, and D. Langin	
The Role of Hypoxia in Adipocyte Function and Dysfunction	45
Paul Trayhurn, Fátima Pérez de Heredia, Bohan Wang, and I. Stuart Wood	
Brown Adipose Tissue In Humans: A New Target for Anti-Obesity Therapy	61
Sven Enerbäck	
Adipose Tissue Dysfunction: A Multistep Process	67
Kai Sun and Philipp E. Scherer	
Fat Cell Progenitors: Origins and Plasticity	77
Christian Dani	
Transcriptional Regulation of Brown and White Adipogenesis	89
Bruce M. Spiegelman	
Transcriptional Control of Gene Expression in Different Adipose Tissue Depots	93
Stephen R. Farmer	

Epigenetic Approaches to Adipose Biology 101
Evan D. Rosen

**Metabolic and Angiogenic Consequences of the Presence
or Absence of UCP1** 111
Barbara Cannon and Jan Nedergaard

Metabolic Responses to Weight Perturbation 121
Rudolph L. Leibel and Michael Rosenbaum

**Understanding Causal Relationships in the Metabolic Syndrome:
Recent Insights from Extreme Human Phenotypes** 135
David B. Savage
