Preface

Carsten Hoff, Ottmar Sirch

Emission.impossible – Unser Weg in die automobile Zukunft 1

Jürgen Schenk

1 Invited Speeches20

1.1 Vehicle Aerodynamics and Thermal Management in Future Hybrid and Electrical Vehicles 20

Lennart Löfdahl

1.2 Electrification of commercial vehicles – Quo vadis? 39

Bernd Peter Elgas

1.3 Last developments on Eco-innovations: a focus on electrical components 47

Stefano Malfettani, Chiara Lodi, Antti Seitsonen, Pierre Bonnel

1A High Voltage Systems / Hochvolt-Systeme58

1A.1 Continued High Voltage System Development 58

Alexandra Nafari, Robert Eriksson

1A.2 Dresden elektrifiziert die Buslinie 79 – Gelegenheit und Herausforderung / Dresden's bus route 79 turned into full electric – Opportunity and challenge 68

Alexander Bunzel, Ronny Petersohn, Bernard Bäker

1B 48V of the future – new functions and possibilities/ 48V der Zukunft – Neue Funktionen und Möglichkeiten84

1B.1 12V/48V Bordnetzsimulation auf Basis realer Fahrzyklen 84

Daniel Sebastião, Rainer Knorr, Mohamed Ayeb, Ludwig Brabetz

1B.2 Energy balance of 48 V mild hybrid vehicles with electric driven supercharger 95

Jürgen Ogrzewalla, Edoardo Pietro Morra, Johannes Moritz Maiterth,
Philip Griefnow, Thorsten Schnorbus

1B.3	eSupercharged Heavily Downsized Gasoline Demonstrator	108
	Mike Bassett, Jonathan Hall, Benjamin Hibberd, Stephen Borman, Simon Reader	
1B.4	Requirements and Potential Study of 48V ISG Technology for Passenger Car Diesel Vehicles under RDE Conditions	122
	Lawrence Alger, Bart van Moergastel, Olaf Herrmann, Sebastian Visser	
2A	Methods for Invehicle Network Development / Methoden der Bordnetzentwicklung	131
2A.1	Emulation of batteries and bidirectional components in the automotive power net	131
	Michael Winter, Julian Taube, Andreas Stückl, Hans-Georg Herzog	
2A.2	A Method for Rational Approximation for RLC Simulation Models of HV-Components using Impedance Measurements	142
	Thomas Wersal, Sören Schörle	
2A.3	Simulation assisted design and optimization of power supply structures	153
	Kathrin Geiger, Markus Hennig, Stefan Schwertner, Christian Bauer, Hans-Georg Herzog	
2A.4	Composition of Customer-Oriented Substitute Driving Cycles Including Altitude Profiles Using Markov Models and Digital Map Data	172
	Roman Ließner, Ansgar Dietermann, Klaus Lüpkes, Bernard Bäker	
2A.5	Prediction of EV Drive Range Reduction under Extreme Environ- mental Conditions Using Computer Aided Engineering Tools	188
	Doug Kolak, Christian Shaffer, Boris Marovic, Puneet Sinha	
2B	High Voltage Energy Storage / Hochvolt-Speicher	198
2B.1	Analysis and Evaluation of Future Battery Technologies for Automotive Applications	198
	Max Falk, Christian Jung, Bernard Bäker	
2B.2	Ladezustandsbestimmung von Lithium-Schwefel-Zellen mit Hilfe von in-situ Impedanzspektroskopie	213
	Sebastian Socher, Claudius Jehle, Ulrich Potthoff	
2B.3	Influencing Factors on High-Voltage Battery Design for Mobile Applications / Einflussfaktoren auf den Entwurf von Hochvolt-Batterien für mobile Anwendungen	225
	Felix Frank, Jörg Wilhelm, Dieter Schramm	

2B.4	IVlon: Ein umfassendes Batterieforderndiagnose-System	246
	Claudius Jehle, Fabian Hampel, Frank Steinert, Ulrich Potthoff	
3A	Vehicle Power Supply Architecture / Energiebordnetz-Architektur	257
3A.1	Requirements, challenges and design concepts for future electrical power supply systems	257
	Bastian Hartmann, Björn Mohrmann, Armin Warm, Peter Schmitz	
3A.2	12+12V und 12+48V: ein modularer Ansatz für Komponenten und elektrische Architekturen / 12+12V and 12+48V: a modular approach for components and electric architectures	272
	Olivier Coppin	
3A.3	Intelligentes Bordnetzdesign mit elektronischen anstelle von Schmelzsicherungen	288
	Martin Jaiser	
3B	Safe Power Supply / Sichere Energieversorgung	299
3B.1	Reliability of Lead-Acid Batteries	299
	Jörn Albers, Ingo Koch	
3B.2	Methode zur Bestimmung der Bordnetzzuverlässigkeit	307
	Ralf Gemmerich, Kadir Aytemuer, Ulrich Siebel, Klaus Lange, Tobias Kerner, Oguzhan Balandi, Ludwig Brabetz	
3B.3	Modellbasiertes on-line Monitoring des Energiebordnetzes durch Kombination physikalischer Systemmodelle mit Parameteridentifikationsmethoden	318
	Michael Kiffmeier, Stephan Frei	
4A	Low Voltage Energy Storage / Niedervolt-Speicher	336
4A.1	Critical analysis of Hybrid Battery Systems for Micro Hybrid Vehicles based on the Parallel Combination of a Lead Acid- and a Lithium Ion Battery	336
	Matthias Kuipers, Markus Jansen, Monika Kwiecien, Dirk Uwe Sauer	
4A.2	Analysis of Deviations between Time-based and Frequency-based Battery Impedance Determination Methods	349
	Monika Kwiecien, Philipp Schröder, Matthias Kuipers, Dirk Uwe Sauer	

4B	E/E for autonomous driving / E/E für Autonomes Fahren....	366
4B.1	Electric power consumption on use case AD “Automated Driving”	366
	Ludwig Ramsauer, Bernhard Schmid, Vincent Vahée	
4B.2	E/E Architecture Solutions for Automated Driving.....	387
	Peter Grabs, Sebastian Dörmach, Frédéric Holzmann, Udo Hornfeck	
4B.3	Efficient, Safe and Reliable Powernet for AD.....	398
	Jean-Luc Augier, Thorsten Huck, Ahmet Kilic, Wolfgang Müller, Gabriele Pieraccini	
5A	Power Electronics / Leistungselektronik.....	412
5A.1	An Improved Behavioral Model for Loss Calculations in Automotive Inverters.....	412
	Ajay Poonjal Pai, Tomas Reiter, Martin Maerz	
5A.2	Low voltage, high current Single-Board-Solution (SBS) power module for automotive applications up to 25kW.....	428
	Florian Wein, Robert Christopher Burns	
5A.3	Bidirectional Charge- and Traction System (BCTS)	439
	Martin Brüll, Philip Brockerhoff, Franz Pfeilschifter, Hans-Peter Feustel, Wilhelm Hackmann	
5A.4	A novel, non-isolated bus converter enables high efficiency energy transport to supply high power loads in cars	453
	Ugo Ghisla	
5A.5	Addressing Electrical Noise in the Design of Power Electronics for Hybrid Motor.....	462
	Ikenna Nwaoko, Stephen Turner, Wayne Maddison, Tim Spearman, Andreas Hubert, Dai Pearce	
5B	Energy Management / Energiemanagement	472
5B.1	Concept of a decision system for an operating strategy in a cybernetic energy and power management.....	472
	Joachim Fröschl, Stefan Kurtz, Michael Winter, Julian Taube, Timur Nuritdinow, Hans-Georg Herzog	
5B.2	Backend-basierte Fahrstrategie zur Antriebsstrangsteuerung durch Vernetzung	483
	Franz Pellkofer, Friedrich Graf, Stefan Grubwinkler, Stephan Ollinger, Peter Gunreben	

5B.3	State of the art in optimal control of series hybrid electric vehicles taking account of driveability	498
	Conny Tempelhahn, Stephan Uebel, Bernard Bäker	
5B.4	ConnectedPowerManagement Monitor as a view into a cybernetic energy and power management – An isomorphic tool design concept.....	526
	Joachim Fröschl, Alexander Epplein, René Wendler, Ergun Yavuz, Hans-Georg Herzog	
6	Poster Session / Posterausstellung.....	533
6.1	Kommunikation innerhalb einer 48V/12V-Komponente am Beispiel einer Kühlmittelpumpe	533
	Tobias Binder	
6.2	Electric assisted turbocharger, Cross-Charger® – turbo by wire	541
	Holger Gödeke, Ernst Knorpp, Christian Köster	
6.3	Evaluation of transient longitudinal dynamics of future conventional and electrified vehicles.....	552
	Stephan Schiffer, Andreas Wilde, Andreas Kain, Emilia Doer, Maximilian Helbing, Bernard Bäker	
	The Authors / Die Autoren	572
