

Table of Contents

Abbreviations and Symbols	vi
1 Introduction	1
2 Introduction to Magnetic Resonance Imaging	4
2.1 Image Formation	4
2.2 System Architecture	8
2.2.1 Magnet Subsystem	9
2.2.2 Gradient Subsystem	9
2.2.3 Transmit Subsystem	10
2.2.4 Receive Subsystem	10
2.2.5 Patient Handling and Monitoring Subsystem	11
2.3 Patient Safety	11
2.3.1 Patient Risks	11
2.3.2 Specific Absorption Rate	12
2.3.3 Global and Local Specific Absorption Rate	14
3 Magnetic Resonance System Architecture for Parallel Trans-	
mission	17
3.1 Background	17
3.2 System Design	20
3.3 Technical Realization and Radiofrequency Chain Components	22
3.3.1 Multi-Channel Body Coil	26
3.3.2 Multi-Channel Body Coil Interface	27
3.3.3 Dual-Channel Transmit/Receive Switches	27
3.3.4 RF Power Amplifiers	28
3.3.5 Circulators	30
3.3.6 Pick-Up Coil Monitoring	30
3.4 Proof-of-Concept and Verification	32
3.5 Discussion and Conclusion	35
4 A Concept for Specific Absorption Rate Prediction in pTx	36
4.1 Electromagnetic Field Simulations	37
4.2 Specific Absorption Rate and Q-Matrix Formalism	40
4.3 Specific Absorption Rate Prediction	43
4.4 Technical Realization	44

4.5	Experimental Validation	45
4.5.1	Calorimetric Validation	45
4.5.2	In Vivo Validation	48
4.6	Discussion and Conclusion	53
5	Comprehensive Safety Concept for Parallel Transmission	57
5.1	Concept and Implementation	58
5.1.1	I. Scan Definition and Planning	59
5.1.2	II. Preparation Phases	61
5.1.3	III. Scan Execution	63
5.2	Experimental Verification	64
5.2.1	Active Decoupling	64
5.2.2	Load Compensation	64
5.2.3	Specific Absorption Rate Prediction and Supervision	66
5.2.4	System Fault Situations	67
5.3	Discussion and Conclusion	69
6	Detection of RF Unsafe Devices in Parallel Transmission	75
6.1	Coil-Load Interaction	77
6.2	Experimental Verification	78
6.2.1	Phantom Load Variations	79
6.2.2	In Vivo Load Variations	80
6.2.3	Catheters	81
6.2.4	Lead and Pacemaker	82
6.3	Discussion and Conclusion	90
7	Patient Respiration Monitoring	93
7.1	Background	93
7.2	Proof-of-Concept	94
7.2.1	Identification of Respiration States via Pick-Up Coil Signals	95
7.2.2	Relationship between Pick-Up Coil Based Respiration Curve and Diaphragm Position	96
7.2.3	Relation between Pick-Up Coil and Respiration Belt Signals	98
7.2.4	Comparing Pick-Up Coil Monitoring and Navigator Signals	99
7.3	Discussion and Conclusion	101
8	Summary and Outlook	103
	Bibliography	107
	Curriculum Vitae	126
