Contents

1 Overview and Basic Mathematical Concepts 1
- 1.1 Main Constructs 2
- 1.2 Possible Limitations 9
- 1.3 A Practical Application: The ALEKS System 10
- 1.4 Potential Applications to Other Fields 11
- 1.5 On the Content and Organization of this Book 12
- 1.6 Basic Mathematical Concepts and Notation 13
- 1.7 Original Sources and Main References 17
- Problems 19

2 Knowledge Structures and Learning Spaces 23
- 2.1 Fundamental Concepts 23
- 2.2 Axioms for Learning Spaces 26
- 2.3 The nondiscriminative case* 30
- 2.4 Projections 31
- 2.5 Original Sources and Related Works 38
- Problems 39

3 Knowledge Spaces 43
- 3.1 Outline 43
- 3.2 Generating Knowledge Spaces by Querying Experts 44
- 3.3 Closure Spaces 45
- 3.4 Bases and Atoms 47
- 3.5 An Algorithm for Constructing the Base 49
- 3.6 Bases and Atoms: The Infinite Case* 52
- 3.7 The Surmise Relation 54
- 3.8 Quasi Ordinal Spaces 56
- 3.9 Original Sources and Related Works 58
- Problems 59

4 Well-Graded Knowledge Structures 61
4.1 Learning Paths, Gradations, and Fringes 61
4.2 A Well-Graded Family of Relations: the Biorders* 66
4.3 Infinite Wellgradedness* 69
4.4 Finite Learnability 72
4.5 Verifying Wellgradedness for a ∪-Closed Family 73
4.6 Original Sources and Related Works 77
Problems 78

5 Surmise Systems 81
5.1 Basic Concepts 81
5.2 Knowledge Spaces and Surmise Systems 85
5.3 AND/OR Graphs 87
5.4 Surmise Functions and Wellgradedness 90
5.5 Hasse Systems 92
5.6 Resolubility and Acyclicity 96
5.7 Original Sources and Related Works 99
Problems 100

6 Skill Maps, Labels and Filters 103
6.1 Skills 103
6.2 Skill Maps: The Disjunctive Model 106
6.3 Minimal Skill Maps 107
6.4 Skill Maps: The Conjunctive Model 110
6.5 Skill Multimaps: The Competency Model 112
6.6 Labels and Filters 113
6.7 Original Sources and Related Works 116
Problems 117

7 Entailments and the Maximal Mesh 119
7.1 Entailments 120
7.2 Entail Relations 124
7.3 Meshability of Knowledge Structures 125
7.4 The Maximal Mesh 127
7.5 Original Sources and Related Works 130
Problems 131

8 Galois Connections* 133
8.1 Three Exemplary Correspondences 133
8.2 Closure Operators and Galois Connections 134
8.3 Lattices and Galois Connections 138
8.4 Knowledge Structures and Binary Relations 141
8.5 Granular Knowledge Structures and Granular Attributions 144
8.6 Knowledge Structures and Associations 147
8.7 Original Sources and Related Works 149
Problems 149

9 Descriptive and Assessment Languages* 151
9.1 Languages and Decision Trees 151
9.2 Terminology 155
9.3 Recovering Ordinal Knowledge Structures 157
9.4 Recovering Knowledge Structures 160
9.5 Original Sources and Related Works 161
Problems 162

10 Learning Spaces and Media 163
10.1 Main Concepts of Media Theory 164
10.2 Some Basic Lemmas 168
10.3 The Content of a State 169
10.4 Oriented Media 174
10.5 Learning Spaces and Closed, Rooted Media 179
10.6 Original Sources and Related Works 183
Problems 183

11 Probabilistic Knowledge Structures 187
11.1 Basic Concepts and Examples 187
11.2 An Empirical Application 191
11.3 The Likelihood Ratio Procedure 195
11.4 Learning Models 198
11.5 A Combinatorial Result 200
11.6 Markov Chain Models 203
11.7 Probabilistic Projections 206
11.8 Nomenclatures and Classifications 209
11.9 Independent Projections 209
11.10 Original Sources and Related Works 213
Problems 213

12 Stochastic Learning Paths* 215
12.1 A Knowledge Structure in Euclidean Geometry 215
12.2 Basic Concepts 216
12.3 General Results 221
12.4 Assumptions on Distributions 224
12.5 The Learning Latencies 225
12.6 Empirical Predictions 228
12.7 Limitations of this Theory 231
12.8 Simplifying Assumptions 233
12.9 Remarks on Application and Use of the Theory 235
12.10 An Application of the Theory to the Case $n = 2$ 236
12.11 Original Sources and Related Works 239
Problems 240

13 Uncovering the Latent State: A Continuous Markov Procedure 241
13.1 A Deterministic Algorithm 241
13.2 Outline of a Markovian Stochastic Process 243
13.3 Basic Concepts 246
13.4 Special Cases 249
13.5 General Results 253
13.6 Uncovering the Latent State 255
13.7 A Two-Step Assessment Algorithm 259
13.8 Refining the Assessment 265
13.9 Proofs* 267
13.10 Original Sources and Related Works 271
Problems 271

14 A Markov Chain Procedure 273
14.1 Outline 273
14.2 The Stochastic Assessment Process 277
14.3 Combinatorial Assumptions on the Structure 279
14.4 Markov Chains Terminology 283
14.5 Results for the Fair Case 284
14.6 Uncovering a Stochastic State: Examples 287
14.7 Intractable Cases 292
14.8 Original Sources and Related Works 295
Problems 295

15 Building a Knowledge Space 297
15.1 Background to the QUERY routine 298
15.2 Koppen's Algorithm 302
15.3 Kambouri's Experiment 310
15.4 Results 315
15.5 Cosyn and Thiéry's Work 324
15.6 Refining a Knowledge Structure 328
15.7 Simulations of Various Refinements 330
15.8 Original Sources and Related Works 332
Problems 332

16 Building a Learning space 335
16.1 Preparatory Concepts and an Example 336
16.2 Managing the Surmise Function 345
16.3 Engineering a Learning Space 355
16.4 Original Sources and Related Works 356
Problems 357

17 Analyzing the Validity of an Assessment 359
17.1 The Concept of Validity for an Assessment 359
17.2 The ALEKS Assessment Algorithm 361
17.3 The Methods 362
17.4 Data Analysis 367
17.5 Summary 373
Problems 374

18 Open Problems 375
18.1 Knowledge Spaces and ∪-Closed Families 375
18.2 Wellgradedness and the Fringes 376
18.3 About Granularity 377
18.4 Miscellaneous 377

Glossary 379
