Joseph Auslander and Gernot Greschonig

Duality of the almost periodic and proximal relations — 1

- 1 Introduction — 1
- 2 Almost periodic and proximal relations of a flow — 2
- 3 Distal and proximal equivalence of minimal flows — 6
- 4 Proximal and almost periodic cells of a flow — 11

References — 13

Jean-Pierre Conze and Stéphane Le Borgne

Limit directions of a vector cocycle, remarks and examples — 14

Introduction — 14

- 1 Preliminaries — 15
- 2 Limit directions of a vector cocycle, general properties — 17
- 3 Application of the CLT, martingales and invariance principle — 30

References — 38

Joseph Rosenblatt

Optimal norm approximation in ergodic theory — 40

- 1 Introduction — 40
- 2 Basics — 41
- 3 Discrete Spectrum Case — 43
- 4 Weak Mixing Case — 47
- 5 General Case — 50
- 6 Properties of O_n^r — 53
- 7 Oscillation and generic behavior for transformations — 56
- 8 Cocycles — 64
- 9 Other Lebesgue spaces — 69

References — 75

Ethan Akin

The iterated Prisoner's Dilemma: good strategies and their dynamics — 77

- 1 The iterated Prisoner's Dilemma — 77
- 2 Good plans and the Press–Dyson decomposition — 86
- 3 Competing zero-determinant strategies — 94
- 4 Dynamics among zero-determinant strategies — 97

References — 107

Marie-Claude Arnaud

Lyapunov exponents for conservative twisting dynamics: a survey — 108

1 Twisting conservative dynamics — **109**

2 Lyapunov exponents for the minimizing measures and angle of the
Oseledets splitting — **115**

3 Shape of the support of the minimizing measures and Lyapunov
exponents — **126**

References — **132**

Yonatan Gutman

Takens' embedding theorem with a continuous observable — 134

1 Introduction — **134**

2 Preliminaries — **137**

3 Proof of the theorem — **138**

References — **141**

Authors — 142
