

TABLE OF CONTENTS

1	Introduction	1	4.7	Summary	62
1.1	Why this book?	2		References	62
1.2	Citing of references	3			
1.3	Instruments used	4	5	Treatment planning principles	63
1.4	Materials used	5	5.1	General	64
	References	6	5.2	Dental history	64
			5.3	Clinical examination	65
2	Esthetics	7	5.4	Radiographic examination	65
2.1	General	8	5.5	Special aspects of clinical and	
2.2	Long-term results	12		radiographic evaluation	68
2.3	Summary	12	5.6	Summary	70
	References	12		References	70
3	Possible failures	15	6	Prosthetic planning /	
3.1	Excessively long clinical crown	16		alternatives to dental implants	71
3.2	Scarring	16	6.1	General	72
3.3	Absence of papillae	18	6.2	Replacing a single missing tooth	73
3.4	Buccal tissue volume deficiency	20	6.3	Replacing two missing teeth	77
3.5	Restorative materials that cause soft		6.4	Restoring a large edentulous space	78
	tissue discoloration	20	6.5	Summary	81
3.6	Summary	22		References	81
	References	22	7	Prosthetic options to compensate	
4	Biological principles	25		for tissue deficits	83
4.1	Introduction	26	7.1	General	84
4.2	Papilla between an implant and		7.2	Compensating for vertical defects	84
	a natural tooth	28	7.3	Compensating for lack of papillae	87
4.3	Papilla between two adjacent		7.4	Compensating for horizontal defects	92
	implants	38	7.5	Compensating for lack of lip support	94
4.4	Buccal area	42	7.6	Summary	96
4.5	Effect of the implant-abutment			References	97
	interface	56			
4.6	Limits of planning	61			

Table of contents

8	Initial analysis	99	10	Implant position	187
8.1	General	100	10.1	General	188
8.2	Lip line	102	10.2	Bucco-oral positioning	189
8.3	Shape of the jaw	106	10.3	Axial inclination	196
8.4	Tooth shape	108	10.4	Mesiodistal positioning	200
8.5	Tooth position	111	10.5	Apicocoronal depth	206
8.6	Adjacent teeth	115	10.6	Ideal implant positioning	212
8.7	Soft tissue	118	10.7	Influence of implant position on prosthetic options	214
8.8	Available bone	132	10.8	Number of implants	217
8.9	Width of the edentulous space	146	10.9	Application example	223
8.10	Function	150	10.10	Consequences of implant malpositioning	225
8.11	Occlusion	150	10.11	Surgical template	227
8.12	Treatment planning based on the pretreatment evaluation	153	10.12	Summary	231
8.13	Application example	154		References	231
8.14	Summary	158			
	References	158			
9	Extraction	159	11	Immediate implants	233
9.1	General	160	11.1	Initial mistakes	234
9.2	Papilla collapse at the adjacent tooth after extraction	163	11.2	Learning effects	242
9.3	Papilla preservation at the adjacent tooth	165	11.3	Procedures to compensate for tissue loss	262
9.4	Buccal soft tissue support	170	11.4	Temporization	290
9.5	Preservation of papilla between two teeth to be extracted	170	11.5	Summary	297
9.6	Ridge preservation procedures	173		References	298
9.7	No ridge preservation measures before implant placement	184	12	Implant placement with simultaneous guided bone regeneration (GBR)	299
9.8	Summary	186	12.1	Biological rationale	300
	References	186	12.2	Esthetic rationale	302
			12.3	Long-term results	311
			12.4	Surgical procedure	315
			12.5	Failure	462
			12.6	Summary	470
				References	488

13	Two-stage implant procedures	491	17	Temporary restoration	657
13.1	Ridge augmentation before implant placement – General	492	17.1	Requirements	658
13.2	Augmentation with membrane and xenograft	492	17.2	The ideal temporary restoration	660
13.3	Augmentation with an autogenous bone block	498	17.3	Summary	664
13.4	Augmentation with an autogenous bone block and membrane	500	18	Prosthetics	665
13.5	Augmentation with autogenous bone cone, xenograft, and membrane	502	18.1	General	666
13.6	Summary	525	18.2	Cemented versus screw-retained	668
	References	525	18.3	Soft tissue management with the implant suprastructure	674
14	Soft tissue grafting	527	18.4	Final impression of the two-part suprastructure	732
14.1	General	528	18.5	Two-piece crown	740
14.2	Surgical procedure	542	18.6	One-piece crown	769
14.3	Limits of possibility	584	18.7	One-piece bridge	772
14.4	Typical errors	588	18.8	Retainer for natural teeth	776
14.5	Inlay graft technique	590	18.9	Summary	778
14.6	Summary	592		References	778
	References	592	19	Summary:	
15	Stage-two implant surgery	593		Six case examples step by step	779
15.1	With papilla-sparing incision	594	19.1	Immediate implant placement	780
15.2	With flap reflection	596	19.2	Single-tooth implant with GBR	790
15.3	With scalloped incision	598	19.3	Two implants with GBR	800
15.4	Limited punch technique	600	19.4	Two-stage implant procedure for single tooth replacement	808
15.5	Summary	616	19.5	Two implants, two-stage procedure	816
	References	616	19.6	Complex case	826
16	Stage-two surgery with simultaneous soft tissue grafting	617			
16.1	With a horizontal incision	618			
16.2	With flap mobilization	620			
16.3	Roll flap technique	622			
16.4	Envelope technique (tunnel technique)	626			
16.5	Inlay graft	628			
16.6	Summary	656			
	References	656
