1	Introduction	23
1.1	Problem Statement	28
1.2	Research Methodology and Scientific Contribution	29
1.2.1	Service Description	30
1.2.2	Service Selection	31
1.2.3	Thesis Contributions	32
1.3	Contributions Scope	33
1.3.1	Contributions Affiliated with the Project	33
1.3.2	Contributions to the SONATE Architecture	34
1.3.3	Relation with the Colleagues Work	36
1.4	Outline of the Thesis	37
2	Background: Service Oriented Network Architectures	39
2.1	Layering in Protocol Stacks	40
2.2	Service Oriented Architectures (SOA)	43
2.3	Service-Oriented Network Architectures (SONATE)	45
2.3.1	Basic Concepts of a Service Oriented Network Architecture	45

2.3.2	SOA Principles in Networks	48
2.3.3	Service Composition	49
2.3.3.1	Related Work	49
2.3.4	Service Description	63
2.3.5	Service Selection	64
2.3.6	Service Selection and Composition Model.....	66
2.3.7	SONATE Framework	68
2.3.8	Signaling of Protocol Graphs.....	69
2.4	Summary.....	69
3	Service Description	71
3.1	Related Work	72
3.2	Description and Language Requirements	81
3.2.1	Communication Service Description Challenges.....	82
3.2.2	Undertaking Approach to Tackle The Problems	82
3.2.3	Requirements for the Proposed Language.....	89
3.2.3.1	Mandatory Requirements	89
3.2.3.2	Optional Requirements	94
3.3	Solution: Communication Service Description Language (CSDL)	96
3.3.1	Effects	99
3.3.2	Operators	113
3.3.3	Units	113
3.3.4	Attributes	114
3.3.5	ID.....	115
3.3.6	Influence	115
3.3.7	Interface	115
3.3.8	DataType	116

3.3.9	Dependencies	116
3.3.10	Types.....	118
3.3.11	Aggregators	119
3.3.12	Description of Dependencies	119
3.3.13	Description of a Communication Service.....	121
3.3.13.1	Grammar	122
3.4	Fulfilling Language Requirements By CSDL.....	125
3.4.1	Fulfilling Mandatory Requirements	125
3.4.2	Fulfilling Optional Requirements	130
3.5	Validation of CSDL	132
4	Service Selection.....	143
4.1	Selection of Suitable Services.....	144
4.1.1	Related Work	144
4.1.2	Suitable Services Selection Method	145
4.2	Selection of the Best Service	147
4.2.1	Related Work	147
4.2.2	Best Service Selection Method	152
4.2.2.1	Interdependence of Selection Criteria	153
4.2.2.2	Choosing AHP from MCDA Methods	154
4.2.2.3	The Analytic Hierarchy Process (AHP)	155
4.2.2.4	Adaptation of Analytic Hierarchy Process (AHP) for Service Selection	158
4.2.2.5	Automated priority assignment for the offerings	159
4.2.2.6	Network Abstraction API.....	164
4.2.2.7	Best Service Selection: An Example	165
4.2.2.8	Efficiency of Service Selection	167

4.2.2.9	Benefits of AHP as a Selection Method	170
5	Conclusion	173
6	Benefits and Future Work	177
A	Appendix	179
A.1	Examples of Communication Services	179
A.2	Components of Communication Service Description Language (CSDL)	182
A.3	Some Examples of Service Description Using RDF	209
A.4	The XML Schema Of CSDL	212
A.5	The description of the protocol graph	212
A.6	The description of building blocks which represents TCP functionalities	215
A.7	Examples of Building Blocks Using CSDL	217
	List of References	225
