

Contents

1	Introduction	9
1.1	Contributions of this Thesis	12
1.2	Outline of the Thesis	14
2	State of the Art	17
2.1	Different Types of Handovers	17
2.2	Mobility Management in IP based Networks	20
2.3	Future Internet Architectures	25
2.4	Handover Prediction	27
2.5	Handover Decision	31
3	Problem Statement and Concept of the Framework	37
3.1	Problem Statement	37
3.2	Framework Concept	41
4	Prediction of RSS	45
4.1	Hidden Markov Model	45
4.2	Modeling the Problem based on HMM	56
4.3	Proposal 1: Predicting RSS based on the Probabil- ity Ranking	60
4.4	Proposal 2: Predicting RSS based on the MN's Mo- bility	62

5	Handover Decision	67
5.1	Handover Decision Proposal	69
6	Performance Evaluation	81
6.1	Mobility Model	82
6.2	Radio Channel Model	85
6.3	RSS Prediction using Forward-Backward Algorithm	87
6.4	RSS Prediction based on Viterbi Extension Algorithm	91
6.5	Scenario Setup	93
7	Enhanced Mobility Schemes in CCN	117
7.1	Mobility in CCN	118
7.2	Enhanced Schemes for Mobility in CCN	125
8	Conclusions and Outlook	143
