

Contents

- 1 Complexity and Emergence 1**
 - 1.1 The Issue Considered 3
 - 1.2 A Basic Viewpoint 4
 - 1.2.1 The Main Claim 5
 - 1.2.2 Hierarchies 6
 - 1.2.3 Emergence 7
 - 1.3 Key Points of the Argument 8
 - 1.3.1 Multiple Types of Causation 9
 - 1.3.2 Hierarchy and Causation 10
 - 1.3.3 Types of Top-Down Causation 11
 - 1.3.4 The Nature of Variables 12
 - 1.3.5 The Causal Efficacy of Non-physical Entities 13
 - 1.3.6 Room at the Bottom 14
 - 1.3.7 Supervenience 15
 - 1.4 Is It Real? Testing the Proposal 16
 - 1.4.1 Causal Effects 16
 - 1.4.2 Experimental Tests 17
 - 1.4.3 Kinds of Data 19
 - 1.4.4 There Is No Other Option 20
 - 1.5 Significant Implications 20
 - 1.5.1 Health Care 20
 - 1.5.2 Mental Health 21
 - 1.5.3 Education: Learning to Read 21
 - 1.6 An Outline of the Book 22
 - 1.6.1 The Contents 22
 - 1.6.2 What Is New 24
 - 1.6.3 What Is Controversial 24
 - 1.7 The Necessity of the Conclusion 27
 - 1.7.1 The Conclusion 28
 - 1.7.2 The Necessity of the Conclusion 28
 - References 30

- 2 Digital Computer Systems 35**
 - 2.1 Computational Basics. 35
 - 2.2 Modular Hierarchical Structures 38
 - 2.2.1 Structures: Combination and Abstraction 39
 - 2.2.2 Decomposition and Modularity 40
 - 2.2.3 Encapsulation and Information-Hiding 41
 - 2.2.4 Naming, Combination, and Recursion 42
 - 2.2.5 Hierarchy: Class Structure and Object Structure 43
 - 2.2.6 Evolution 45
 - 2.3 Orthogonal Modular Hierarchical Structures 45
 - 2.3.1 The Two Kinds of Hierarchies 46
 - 2.3.2 The Implementation (Vertical) Hierarchies 46
 - 2.3.3 The Logical (Horizontal) Hierarchies 49
 - 2.3.4 The Relation Between the Two Hierarchies 50
 - 2.3.5 Causality in the Hierarchies 52
 - 2.4 Bottom-Up and Top-Down Causation 52
 - 2.4.1 The Combination of Bottom-Up and Top-Down
Action 53
 - 2.4.2 TD1: Deterministic Top-Down Processes 54
 - 2.4.3 TD2: Non-adaptive Feedback Control Systems 56
 - 2.4.4 TD3: Adaptive Selection 57
 - 2.4.5 TD4: Feedback Control with Adaptive Goals 59
 - 2.4.6 TD5: Adaptive Selection of Adaptive Goals 59
 - 2.4.7 Goals and Learning in Relation to These Kinds
of Causation 60
 - 2.5 The Core Feature: Equivalence Classes 63
 - 2.5.1 Multiple Realization 63
 - 2.5.2 The Link with Top-Down Causation 64
 - 2.5.3 The Ontological Nature of Computer Programs. 65
 - 2.6 Resources: Memory and Deleting 65
 - 2.6.1 The Unphysical Nature of Infinity 66
 - 2.6.2 Deletion and Garbage Collection. 67
 - 2.6.3 The Memory Hierarchy 68
 - 2.6.4 Modular Hierarchical Structure and Scoping
of Variables 68
 - 2.6.5 Deletion, Adaptive Selection, and Irreversibility 69
 - 2.7 The Outcome: Causation in Digital Computers 70
 - 2.7.1 Computer Programs Are Non-physical, but Causally
Effective 70
 - 2.7.2 Computer Programs Embody Abstract Logic,
and Act Top-Down 72
 - 2.7.3 Room at the Bottom 74
 - 2.7.4 Predictable Outcome? 76
 - 2.7.5 Possibility Spaces and Their Causal Effects 77

2.7.6	Top-Down Action from the Mind	81
2.7.7	Genuine Emergence.	81
