

Contents

1	Introduction — 1
1.1	What is Textile? — 1
1.2	History of Textiles — 1
1.3	Status of Textiles in World Exports — 3
2	Textile Raw Materials — 7
2.1	Classification — 7
2.2	Natural Fibers — 7
2.2.1	Cotton Fibers — 8
2.2.2	Flax — 10
2.2.3	Jute — 12
2.2.4	Other Vegetable Fibers — 13
2.2.5	Wool — 14
2.2.6	Silk — 15
2.3	Man-made Fibers — 16
2.3.1	Spinning of Man-made Fibers — 16
2.4	Regenerated Fibers — 17
2.4.1	Viscose Fiber — 17
2.4.2	Acetate Fiber — 18
2.5	Synthetic Fibers — 18
2.5.1	Nylon — 19
2.5.2	Polyester — 20
2.5.3	Other Synthetic Fibers — 20
2.5.4	Glass Fiber — 21
2.5.5	Carbon Fiber — 22
3	Yarn Manufacturing — 25
3.1	Introduction — 25
3.1.1	Yarn — 25
3.1.2	Spun Yarn — 25
3.1.3	Yarn Number — 25
3.2	Yarn Production — 27
3.2.1	Lap — 28
3.2.2	Sliver — 28
3.2.3	Roving — 28
3.3	Basic Preparatory Processes for Spinning Operations — 28
3.3.1	Preparation of Cotton to Feed the Blow Room — 28
3.3.2	Blow Room — 29
3.3.3	Card — 31
3.3.4	Difference Between Blow Room and Card Cleaning — 33

3.3.5	Drawing — 33
3.3.6	Lap Former — 35
3.3.7	Comber — 35
3.3.8	Roving Machine — 37
3.4	Spinning Operations — 39
3.4.1	Ring Spinning — 39
3.4.2	Winding — 40
3.4.3	Open End Rotor Spinning — 41
3.4.4	Air Jet Spinning — 42
3.5	Types of Yarns — 44
3.5.1	Staple Spun Yarn — 44
3.5.2	Monofilament Yarn — 45
3.5.3	Multifilament Yarn — 45
4	Fabric Manufacturing — 47
4.1	Weaving — 47
4.2	Warp Preparation Steps — 48
4.2.1	Winding — 48
4.2.2	Warping — 49
4.2.3	Sizing — 50
4.2.4	Drawing In — 52
4.3	Weaving Mechanisms — 53
4.3.1	Primary Motions — 53
4.3.2	Secondary Motions — 53
4.3.3	Stop Motions — 53
4.4	Types of Shedding Mechanism — 53
4.4.1	Tappet Shedding — 54
4.4.2	Dobby Shedding — 54
4.4.3	Jacquard Shedding — 54
4.5	Types of Picking Mechanism — 54
4.5.1	Shuttle Picking — 54
4.5.2	Projectile Picking — 55
4.5.3	Rapier Picking — 55
4.5.4	Water Jet Picking — 55
4.5.5	Air Jet Picking — 55
4.6	Weave Design — 56
4.6.1	Plain — 56
4.6.2	Twill — 56
4.6.3	Satin / Sateen — 57
4.7	Specialty Weaving — 57
4.8	Knitting — 58
4.9	Comparison of Woven and Knitted Fabrics — 59

4.10	Types of Knitting — 60
4.10.1	Weft Knitting — 60
4.10.2	Weft Knitting Machine Elements — 61
4.11	Loop Formation Cycle with Latch Needle — 63
4.12	Principle Stitches in Weft Knitting — 64
4.13	Knitting Terms and Definition — 65
4.13.1	Loop Parts — 65
4.13.2	Technical Face and Back — 65
4.13.3	Wales and Courses — 66
4.13.4	Stitch Density — 66
4.13.5	Stitch Length — 67
4.14	Warp Knitting — 67
4.14.1	Classification of Warp Knitting Machine — 68
4.15	Applications of Knitted Fabrics — 69
4.16	Nonwoven — 69
4.16.1	Definitions — 71
4.16.2	Nonwoven Products — 71
4.16.3	Raw Materials for Nonwovens — 72
4.17	Manufacturing of Nonwoven — 73
4.17.1	Web Formation — 74
4.17.2	Dry Laid Web — 74
4.17.3	Wet Laid Web — 76
4.17.4	Polymer Laid Web — 76
4.18	Web Bonding — 77
4.18.1	Thermal Bonding — 78
4.18.2	Chemical Bonding — 78
4.18.3	Mechanical Bonding — 78
4.19	Finishing — 80
4.20	Characterization of Nonwoven — 80
5	Textile Processing — 83
5.1	Introduction — 83
5.2	Textile Pre-treatments — 83
5.3	Singeing — 84
5.4	Desizing — 84
5.5	Scouring — 85
5.6	Bleaching — 86
5.7	Mercerizing — 86
5.8	Heat-setting — 86
5.9	Textile Dyeing — 87
5.10	Dyes and Pigments — 87
5.10.1	Acid Dyes — 88

5.10.2	Azoic Dyes — 89
5.10.3	Basic Dyes — 89
5.10.4	Direct Dyes — 89
5.10.5	Disperse Dyes — 90
5.10.6	Reactive Dyes — 90
5.10.7	Sulphur Dyes — 91
5.10.8	Vat Dyes — 92
5.10.9	Pigments — 93
5.11	Dyeing Methods — 93
5.11.1	Exhaust Dyeing — 93
5.11.2	Pad Dyeing — 94
5.12	Dyeing Machinery — 94
5.12.1	Exhaust Dyeing Machines — 94
5.12.2	Pad Dyeing Machines — 94
5.13	Blends Dyeing — 95
5.14	Textile Printing — 95
5.15	Common Styles of Textile Printing — 95
5.15.1	Direct Printing — 95
5.15.2	Transfer Printing — 95
5.15.3	Discharge Printing — 95
5.15.4	Resist Printing — 96
5.16	Common Methods of Textile Printing — 96
5.16.1	Block Printing — 96
5.16.2	Screen Printing — 96
5.16.3	Roller Printing — 96
5.16.4	Digital Printing — 96
5.17	Main Steps in Direct Printing — 97
5.17.1	Fabric Preparation — 97
5.17.2	Print-paste Preparation — 97
5.17.3	Printing — 97
5.17.4	Drying — 98
5.17.5	Fixation — 98
5.17.6	Washing-off — 98
5.18	Textile Finishing — 98
5.19	Chemical Finishing — 100
5.19.1	Softening — 100
5.19.2	Stiffening / Hand-building — 101
5.19.3	Easy-care, Wrinkle Recovery and Durable Press Finishing — 101
5.19.4	Water Repellent Finishing — 102
5.19.5	Stain Resistance Finishing — 103
5.19.6	Stain or Soil Release Finishing — 103
5.19.7	Flame Retardant Finishing — 104

- 5.19.8 Anti-microbial Finishing — 105
- 5.19.9 Bio-polishing — 105
- 5.19.10 Moisture Management Finishing — 106
- 5.19.11 Anti-static Finishing — 106
- 5.19.12 Optical Brightening — 106
- 5.20 Mechanical Finishing — 106
- 5.20.1 Napping — 106
- 5.20.2 Shearing — 107
- 5.20.3 Sueding / Emerising — 107
- 5.20.4 Calendering — 107
- 5.20.5 Compacting — 108
- 5.20.6 Relaxation Drying — 108
- 5.20.7 Decatising — 108

6 Clothing — 111

- 6.1 Introduction — 111
- 6.2 What is Garment / Apparel / Clothing? — 111
- 6.3 Types of Garments — 111
- 6.4 Global Apparel Industry — 113
- 6.5 Structure of an Apparel Firm — 114
- 6.6 Marketing Division — 115
- 6.7 Finance / Admin Division — 116
- 6.8 Manufacturing Division — 116
- 6.9 Operations Division — 117
- 6.10 Clothing Production — 119
- 6.11 Sampling — 119
- 6.12 Order Planning — 121
- 6.13 Lay Planning — 123
- 6.14 Spreading — 125
- 6.15 Cutting — 127
- 6.16 Numbering and Bundling — 128
- 6.17 Stitching — 129
- 6.17.1 Interlacing — 130
- 6.17.2 Intralooping — 130
- 6.17.3 Interlooping — 130
- 6.18 Finishing — 131
- 6.19 Packing — 131

7 Technical Textiles — 133

- 7.1 Introduction — 133
- 7.2 Functions of Technical Textile — 133
- 7.3 Categories of Technical Textiles — 133

7.3.1	Agrotech —	134
7.3.2	Buildtech —	135
7.3.3	Clothtech —	135
7.3.4	Geotech —	136
7.3.5	Homotech —	137
7.3.6	Indutech —	137
7.3.7	Medtech —	137
7.3.8	Mobiltech —	138
7.3.9	Oekotech —	139
7.3.10	Packtech —	139
7.3.11	Protech —	140
7.3.12	Sporttech —	140

8 Textile Testing — 143

8.1	Introduction —	143
8.2	Quality Control —	143
8.3	Standardization of Testing —	143
8.4	Repeatability and Reproducibility —	144
8.5	Sampling —	144
8.5.1	Consignment —	144
8.5.2	Test Lot —	144
8.5.3	Laboratory Sample —	144
8.5.4	Test Specimen —	145
8.5.5	Package —	145
8.6	Moisture Content & Moisture Regain —	145
8.7	Standard Atmospheric Conditions for Testing —	145
8.8	Testing of Fibers —	145
8.9	Testing of Yarn —	148
8.9.1	Linear Density —	148
8.9.2	Direct System —	148
8.9.3	Indirect System —	148
8.9.4	Evenness of Yarn —	149
8.9.5	Visual Examination —	149
8.9.6	Cut and Weigh Method —	150
8.9.7	USTER Evenness Tester —	151
8.9.8	Yarn Hairiness —	151
8.9.9	Tensile Strength —	151
8.10	Types of Tensile Strength Testing Machines —	152
8.11	Fabric Tests —	152
8.11.1	Strip Test —	152
8.11.2	Grab Test —	153
8.11.3	Tear Tests —	153

8.11.4	Elmendorf Tear Tester — 153
8.11.5	Bursting Strength of Fabric — 154
8.11.6	Weight per Square Yard (GSM) — 155
8.11.7	Color Fastness to Perspiration — 155
8.11.8	Abrasion Resistance of Fabrics (Accelerator Method) — 155
8.11.9	Water Repellency (Spray Test) — 156
8.11.10	Water Resistance / Impact Penetration Test — 156
8.11.11	Air Permeability — 157
8.11.12	Moisture Management Test — 157
8.11.13	Colour Fastness — 157
8.11.14	Thermal Transmittance of Textile Materials — 157
8.11.15	Effect of Repeated Home Laundering on Textiles — 158
8.11.16	Colour Fastness to Perspiration — 158
8.11.17	Seam Strength — 158

9 Disposal and Recycling of Textiles — 161

9.1	Introduction — 161
9.2	Environmental Impacts of Textiles — 164
9.2.1	Impact of Laundering — 164
9.2.2	Impact of Dry Cleaning — 165
9.2.3	Maintenance Chemicals — 165
9.2.4	Emissions — 165
9.3	Ecologically Beneficial Practices — 167
9.4	Textile Recycling — 168
9.4.1	Conversion to New Products — 169
9.4.2	Wiping and Polishing Cloths — 170
9.4.3	Landfill and Incineration for Energy — 170
9.5	Methods of Recycling — 170
9.5.1	Easy Recyclable Textile Products — 171
9.5.2	Single Polymer Design — 173
9.6	Easily Separable Components — 173
9.7	Solid Waste Management — 174

10 Quality Control and Quality Assurance — 177

10.1	Introduction — 177
10.2	Transcendental View of Quality — 177
10.3	Product-based View — 177
10.4	User-based View — 178
10.5	Manufacturing-based View — 178
10.6	Value-based View — 178
10.7	Quality Control — 180
10.7.1	On-line Quality Control System — 182

10.7.2	Off-line Quality Control System —	182
10.8	Quality Assurance —	183
10.9	Quality Assurance Policies and Records —	185
10.10	Need of Quality Assurance in Textile Industry —	187
10.10.1	Main Objective —	187
10.10.2	Major Responsibilities —	187
10.10.3	Stimulate Research Effort —	187
10.10.4	Identify and Address the Various Problems —	188
10.11	Difference between Quality Assurance and Quality Control —	188
11	Computer Applications in Textiles —	191
11.1	Introduction —	191
11.2	Industrial Applications —	192
11.3	Enterprise Resource Planning (ERP) —	192
11.3.1	CAD —	192
11.3.2	CAM —	194
11.3.3	Other Areas ERP Helping —	195
11.3.4	Machine Monitoring —	196
11.3.5	Report Generation —	196
11.3.6	Production Plan —	196
11.3.7	Inventory Management —	197
11.3.8	Maintenance —	197
11.3.9	Machine Setting —	197
11.3.10	Quality Management —	197
11.4	Image Analysis —	198
11.5	Data Mining —	198

Index —	201
