Introduction	1
---------------------------	----------

1.1 C—C Bond Formation by Arene C—H Activation

1.1.1 Arylation Using a Palladium(0) Catalyst

F. S. Melkonyan and V. Gevorgyan

1.1.1	Arylation Using a Palladium(0) Catalyst	5
1.1.1.1	Intramolecular C—H Arylation	8
1.1.1.1.1	Synthesis of Polycyclic Arenes	8
1.1.1.1.1.1	Coupling of Arenes with Haloarenes	8
1.1.1.1.1.2	Coupling of Arenes with Aryl Sulfonates	14
1.1.1.1.1.3	Coupling Involving Palladium Migration	15
1.1.1.1.2	Synthesis of Biaryls	17
1.1.1.1.2.1	Coupling of Arenes with Haloarenes	18
1.1.1.1.3	Synthesis of Hetarenes	21
1.1.1.1.3.1	Synthesis of Five-Membered Hetarenes	21
1.1.1.1.3.1.1	Coupling of Arenes with Haloarenes	21
1.1.1.1.3.1.2	Coupling of Arenes with Aryl Sulfonates	32
1.1.1.1.3.1.3	Coupling Involving Palladium Migration	34
1.1.1.1.3.2	Synthesis of Six- and Seven-Membered Hetarenes	36
1.1.1.1.3.2.1	Coupling of Arenes with Haloarenes	36
1.1.1.2	Intermolecular C—H Arylation	47
1.1.1.2.1	Non-Directed C—H Activation	47
1.1.1.2.1.1	Coupling of Arenes with Haloarenes	47
1.1.1.2.1.2	Coupling of Arenes with Aryl Sulfonates	56
1.1.1.2.2	Directing-Group-Assisted C—H Activation	57
1.1.1.2.2.1	Coupling of Arenes with Haloarenes	57
1.1.1.2.2.2	Coupling of Arenes with Aryl Sulfonates	64

1.1.2	Arylation Using a Palladium(II)/Palladium(IV) Catalyst System P. Gandeepan and C.-H. Cheng	
1.1.2	Arylation Using a Palladium(II)/Palladium(IV) Catalyst System	69
1.1.2.1	Chelation-Assisted C(sp ²)–H Arylation	70
1.1.2.1.1	Reaction Using Diaryliodonium Salts	71
1.1.2.1.2	Reaction Using Aryl Halides	76
1.1.2.1.3	Reaction Using Arenes	84
1.1.2.2	Non-Chelation-Assisted C(sp ²)–H Arylation	87
1.1.2.2.1	Reaction Using Organometallic Reagents	87
1.1.2.2.2	Reaction Using Aryl Halides	88
1.1.2.2.3	Reaction Using Arenes	90
1.1.2.3	Conclusions	90
1.1.3	Arylation Using a Palladium(II) Catalyst M. Zhang and W. Su	
1.1.3	Arylation Using a Palladium(II) Catalyst	93
1.1.3.1	Reaction with Organometallic Reagents	93
1.1.3.1.1	Reaction with Organotin Reagents	94
1.1.3.1.2	Reaction with Organoboron Reagents	96
1.1.3.1.3	Reaction with Organosilicon Reagents	110
1.1.3.2	Reaction with Carboxylic Acids by Decarboxylation	113
1.1.4	Arylation Using a Ruthenium(II) Catalyst M. Seki	
1.1.4	Arylation Using a Ruthenium(II) Catalyst	119
1.1.4.1	Factors Affecting Arylation	121
1.1.4.1.1	Catalyst Effects	121
1.1.4.1.1.1	Use of Dimeric Ruthenium(II) Chloride–Benzene or Related Complexes as the Catalyst	121
1.1.4.1.1.2	Use of Dimeric Ruthenium(II) Chloride– <i>p</i> -Cymene as the Catalyst	123
1.1.4.1.1.3	Use of Ruthenium(III) Chloride Hydrate as the Catalyst	124
1.1.4.1.1.4	Use of Ruthenium(II) Carboxylate– <i>p</i> -Cymene Complexes as the Catalyst	125
1.1.4.1.1.5	Use of Ruthenium(II)–Alkylidene Complexes as the Catalyst	128
1.1.4.1.1.6	Use of Ruthenium(II)–Alkenylphosphine Complexes as the Catalyst	129
1.1.4.1.1.7	Use of Ruthenium/Cerium(IV) Oxide as the Catalyst	129
1.1.4.1.2	Ligand Effects	130

1.1.4.1.3	Additive Effects	131
1.1.4.1.3.1	Use of Phosphine Oxides as the Additive	131
1.1.4.1.3.2	Use of Potassium Acetate as the Additive	132
1.1.4.1.3.3	Use of Potassium Pivalate as the Additive	134
1.1.4.1.3.4	Use of Potassium Adamantane-1-carboxylate as the Additive	135
1.1.4.1.3.5	Use of Potassium Mesitylenecarboxylate as the Additive	137
1.1.4.1.4	Leaving Group Effects	140
1.1.4.1.4.1	Use of Iodide as the Leaving Group	140
1.1.4.1.4.2	Use of Bromide as the Leaving Group	141
1.1.4.1.4.3	Use of Chloride as the Leaving Group	141
1.1.4.1.4.4	Use of 4-Toluenesulfonate as the Leaving Group	141
1.1.4.1.5	Solvent Effects	144
1.1.4.1.5.1	Use of Arenes as the Solvent	144
1.1.4.1.5.2	Use of 1-Methylpyrrolidin-2-one as the Solvent	144
1.1.4.1.5.3	Use of Diethyl Carbonate as the Solvent	144
1.1.4.1.5.4	Use of Water as the Solvent	145
1.1.4.1.6	Directing Group Effects	145
1.1.4.1.6.1	<i>ortho</i> -Directed Reaction with Organometallic Compounds	147
1.1.4.2	Applications of Arylation in the Synthesis of Bioactive Compounds	148
1.1.4.2.1	Synthesis of Cholesteryl Ester Transfer Protein Inhibitors	148
1.1.4.2.2	Synthesis of Angiotensin II Receptor Blockers	150
1.1.4.3	Conclusions	151
1.1.5	Vinylation Using a Palladium Catalyst P. K. Dornan and V. M. Dong	
1.1.5	Vinylation Using a Palladium Catalyst	155
1.1.5.1	Vinylation by Oxidative Heck-Type Coupling	155
1.1.5.1.1	Vinylation with a Directing Group on the Arene Component	156
1.1.5.1.1.1	Use of Amide Directing Groups	156
1.1.5.1.1.2	Use of Trifluoromethanesulfonamide Directing Groups	160
1.1.5.1.1.3	Use of Urea and Guanidine Directing Groups	161
1.1.5.1.1.4	Use of Oxime Directing Groups	163
1.1.5.1.1.5	Use of Pyridine Directing Groups	163
1.1.5.1.1.6	Use of Amine Directing Groups	167
1.1.5.1.1.7	Use of Alcohol Directing Groups	169
1.1.5.1.1.8	Use of Carboxylic Acid Directing Groups	171

1.1.5.1.1.9	Use of Ether and Thioether Directing Groups	175
1.1.5.1.1.10	Use of Silanol Directing Groups	176
1.1.5.1.1.11	Use of Alkene Directing Groups	179
1.1.5.1.2	Vinylation with a Directing Group on the Alkene Component	179
1.1.5.1.3	Vinylation without a Directing Group	181
1.1.5.1.4	Enantioselective Oxidative Heck-Type Coupling	185
1.1.5.2	Vinylation by Direct Arylation of Vinyl Halides	186
1.1.5.2.1	Intramolecular Direct Arylation	187
1.1.5.2.2	Intermolecular Direct Arylation	190
1.1.5.2.3	Enantioselective Direct Arylation	193
1.1.6	Vinylation Using a Rhodium(III) Catalyst T. Satoh and M. Miura	
1.1.6	Vinylation Using a Rhodium(III) Catalyst	197
1.1.6.1	Oxidative Coupling of Arenes	199
1.1.6.1.1	Reaction with Alkenes	199
1.1.6.1.1.1	Vinylation/Esterification of Benzoic Acids	199
1.1.6.1.1.2	Vinylation/Decarboxylation of Benzoic Acids	201
1.1.6.1.1.3	Vinylation of Aryl Ketones	202
1.1.6.1.1.4	Vinylation of Benzoates and Benzaldehydes	202
1.1.6.1.1.5	Vinylation of Acetanilides and Benzanilides	204
1.1.6.1.1.6	Vinylation of Phenylazoles, Phenylpyridines, and (Phenylamino)pyridines	206
1.1.6.1.1.7	Vinylation of Phenylphosphine Oxides, Phenylphosphonates, and Phenylphosphonamides	208
1.1.6.1.2	Reaction with Alkynes	209
1.1.6.1.2.1	Annulation of Benzoic Acids	209
1.1.6.1.2.2	Annulation of Benzyl Alcohols and Phenols	210
1.1.6.1.2.3	Annulation of Aryl Ketones	212
1.1.6.1.2.4	Annulation of Acetanilides and Benzamides	213
1.1.6.1.2.5	Annulation of Aryl Imines	216
1.1.6.1.2.6	Annulation of Phenylazoles and Phenylindoles	218
1.1.6.1.2.7	Annulation of Arylphosphinic Acids and Arylphosphonamides	222
1.1.6.2	Non-Oxidative Coupling of Arenes	225
1.1.6.2.1	Reaction with Alkynes	225

1.1.7	Metal-Catalyzed C—H Alkylation Using RX Compounds C. S. Yi	
1.1.7	Metal-Catalyzed C—H Alkylation Using RX Compounds	229
1.1.7.1	Catalytic Arene C(sp ²)—H Alkylation Reactions via C(sp ³)—X Bond Cleavage (X = Cl, Br, I)	230
1.1.7.2	Catalytic Arene C(sp ²)—H Alkylation Reactions via C—B, C—Si, and C—Sn Bond Cleavage	242
1.1.7.3	Catalytic Arene and Alkene C(sp ²)—H Alkylation Reactions via C—O and C—S Bond Cleavage	253
1.1.7.4	Conclusions and Future Outlook	267
1.1.8	Metal-Catalyzed Alkylation Using Alkenes T. Shibata and K. Tsuchikama	
1.1.8	Metal-Catalyzed Alkylation Using Alkenes	271
1.1.8.1	Alkylation Using Ruthenium Catalysts	271
1.1.8.1.1	Carbonyl-Directed Reactions	271
1.1.8.1.2	Pyridine-Directed Reactions	275
1.1.8.1.3	Reactions Using a Bidentate Directing Group	276
1.1.8.2	Alkylation Using Rhodium Catalysts	278
1.1.8.2.1	Imine-Directed Reactions	278
1.1.8.2.2	Carbonyl-Directed Reactions	281
1.1.8.3	Alkylation Using Iridium Catalysts	283
1.1.8.3.1	Carbonyl-Directed Reactions	283
1.1.8.3.2	Pyridine-Directed Reactions	284
1.1.8.4	Alkylation Using Cobalt Catalysts	285
1.1.8.4.1	Pyridine-Directed Reactions	285
1.1.8.4.2	Imine-Directed Reactions	288
1.1.8.4.3	Amide-Directed Reactions	292
1.1.8.5	Alkylation Using Other Catalysts	293
1.1.8.5.1	Rhenium-Catalyzed Reactions	293
1.1.8.5.2	Yttrium- or Scandium-Catalyzed Reactions	294
1.1.8.6	Applications in Natural Product Synthesis	295

1.2 C—C Bond Formation by Hetarene C—H Activation

Y. Nakao

1.2	C—C Bond Formation by Hetarene C—H Activation	299
1.2.1	Hetarene C—C(sp ³) Bond Formation	302
1.2.1.1	Hetarene C—H Activation/Alkylation Reactions	302
1.2.1.1.1	Alkylation with Alkyl Electrophiles	302
1.2.1.1.2	Alkylation with Alkenes	313
1.2.1.1.3	Reductive Alkylation with Alkynes	332
1.2.1.1.4	Alkylation with In Situ Generated Carbenes	333
1.2.1.2	Hetarene C—H Activation/Carbonyl Addition Reactions	335
1.2.2	Hetarene C—C(sp ²) Bond Formation	340
1.2.2.1	Hetarene C—H Activation/Alkenylation Reactions	340
1.2.2.1.1	Alkenylation with Alkenyl Electrophiles	340
1.2.2.1.2	Alkenylation with Alkenes	343
1.2.2.1.3	Alkenylation with Alkynes	355
1.2.2.2	Hetarene C—H Activation/Cycloaddition Reactions	363
1.2.2.3	Hetarene C—H Activation/Arylation Reactions	367
1.2.2.3.1	Arylation with Aryl Electrophiles/Nucleophiles	367
1.2.2.3.2	Arylation with Arenes	397
1.2.2.3.3	Arylation with Hetarenes: Homocoupling of Hetarenes	407
1.2.2.3.4	Arylation with Hetarenes: Cross Coupling of Hetarenes	410
1.2.2.4	Hetarene C—H Activation/Acylation Reactions	423
1.2.2.4.1	Acylation with Acyl Electrophiles	423
1.2.2.4.2	Acylation through Carbonylation	424
1.2.2.5	Hetarene C—H Activation/Carboxylation Reactions	428
1.2.3	Hetarene C—C(sp) Bond Formation	430
1.2.3.1	Hetarene C—H Activation/Alkynylation Reactions	430
1.2.3.2	Hetarene C—H Activation/Cyanation Reactions	436
