

Contents

1	Graph Theory and Small-World Networks	1
1.1	Graph Theory and Real-World Networks	1
1.1.1	The Small-World Effect	1
1.1.2	Basic Graph-Theoretical Concepts	3
1.1.3	Properties of Random Graphs	8
1.2	Generalized Random Graphs	14
1.2.1	Graphs with Arbitrary Degree Distributions	14
1.2.2	Probability Generating Function Formalism	19
1.2.3	Distribution of Component Sizes	21
1.3	Robustness of Random Networks	24
1.4	Small-World Models	28
1.5	Scale-Free Graphs	30
	Exercises	36
	Further Reading	37
2	Chaos, Bifurcations and Diffusion	39
2.1	Basic Concepts of Dynamical Systems Theory	39
2.2	The Logistic Map and Deterministic Chaos	45
2.3	Dissipation and Adaption	50
2.3.1	Dissipative Systems and Strange Attractors	50
2.3.2	Adaptive Systems	55
2.4	Diffusion and Transport	59
2.4.1	Random Walks, Diffusion and Lévy Flights	60
2.4.2	The Langevin Equation and Diffusion	63
2.5	Noise-Controlled Dynamics	66
2.5.1	Stochastic Escape	66
2.5.2	Stochastic Resonance	69
2.6	Dynamical Systems with Time Delays	73
	Exercises	76
	Further Reading	77

3	Complexity and Information Theory	79
3.1	Probability Distribution Functions	79
3.1.1	The Law of Large Numbers	83
3.1.2	Time Series Characterization	84
3.2	Entropy and Information	87
3.2.1	Information Content of a Real-World Time Series	93
3.2.2	Mutual Information	95
3.3	Complexity Measures	100
3.3.1	Complexity and Predictability	101
3.3.2	Algorithmic and Generative Complexity	104
	Exercises	106
	Further Reading	107
4	Random Boolean Networks	109
4.1	Introduction	109
4.2	Random Variables and Networks	111
4.2.1	Boolean Variables and Graph Topologies	111
4.2.2	Coupling Functions	113
4.2.3	Dynamics	115
4.3	The Dynamics of Boolean Networks	116
4.3.1	The Flow of Information Through the Network	117
4.3.2	The Mean-Field Phase Diagram	119
4.3.3	The Bifurcation Phase Diagram	121
4.3.4	Scale-Free Boolean Networks	125
4.4	Cycles and Attractors	127
4.4.1	Quenched Boolean Dynamics	127
4.4.2	The $K = 1$ Kauffman Network	130
4.4.3	The $K = 2$ Kauffman Network	132
4.4.4	The $K = N$ Kauffman Network	132
4.5	Applications	135
4.5.1	Living at the Edge of Chaos	135
4.5.2	The Yeast Cell Cycle	136
4.5.3	Application to Neural Networks	139
	Exercises	140
	Further Reading	141
5	Cellular Automata and Self-Organized Criticality	145
5.1	The Landau Theory of Phase Transitions	145
5.2	Criticality in Dynamical Systems	150
5.2.1	$1/f$ Noise	154
5.3	Cellular Automata	155
5.3.1	Conway's Game of Life	156
5.3.2	The Forest Fire Model	157
5.4	The Sandpile Model and Self-Organized Criticality	159

5.5	Random Branching Theory	161
5.5.1	Branching Theory of Self-Organized Criticality	161
5.5.2	Galton-Watson Processes	166
5.6	Application to Long-Term Evolution	168
	Exercises	175
	Further Reading	176
6	Darwinian Evolution, Hypercycles and Game Theory	179
6.1	Introduction	179
6.2	Mutations and Fitness in a Static Environment	181
6.3	Deterministic Evolution	185
6.3.1	Evolution Equations	185
6.3.2	Beanbag Genetics – Evolutions Without Epistasis	189
6.3.3	Epistatic Interactions and the Error Catastrophe	191
6.4	Finite Populations and Stochastic Escape	195
6.4.1	Strong Selective Pressure and Adaptive Climbing	196
6.4.2	Adaptive Climbing Versus Stochastic Escape	199
6.5	Prebiotic Evolution	201
6.5.1	Quasispecies Theory	201
6.5.2	Hypercycles and Autocatalytic Networks	202
6.6	Coevolution and Game Theory	206
	Exercises	211
	Further Reading	212
7	Synchronization Phenomena	215
7.1	Frequency Locking	215
7.2	Synchronization of Coupled Oscillators	216
7.3	Synchronization with Time Delays	223
7.4	Synchronization via Aggregate Averaging	225
7.5	Synchronization via Causal Signaling	229
7.6	Synchronization and Object Recognition in Neural Networks	233
7.7	Synchronization Phenomena in Epidemics	236
	Exercises	240
	Further Reading	241
8	Elements of Cognitive Systems Theory	243
8.1	Introduction	243
8.2	Foundations of Cognitive Systems Theory	245
8.2.1	Basic Requirements for the Dynamics	245
8.2.2	Cognitive Information Processing Versus Diffusive Control	249
8.2.3	Basic Layout Principles	251
8.2.4	Learning and Memory Representations	253
8.3	Motivation, Benchmarks and Diffusive Emotional Control	257
8.3.1	Cognitive Tasks	257
8.3.2	Internal Benchmarks	258

8.4	Competitive Dynamics and Winning Coalitions	261
8.4.1	General Considerations	262
8.4.2	Associative Thought Processes	266
8.4.3	Autonomous Online Learning	270
8.5	Environmental Model Building	273
8.5.1	The Elman Simple Recurrent Network	273
8.5.2	Universal Prediction Tasks	277
	Exercises	279
	Further Reading	280
9	Solutions	283
	Solutions to the Exercises of Chapter 1	283
	Solutions to the Exercises of Chapter 2	289
	Solutions to the Exercises of Chapter 3	292
	Solutions to the Exercises of Chapter 4	298
	Solutions to the Exercises of Chapter 5	301
	Solutions to the Exercises of Chapter 6	305
	Solutions to the Exercises of Chapter 7	309
	Solutions to the Exercises of Chapter 8	312
	Index	315
