List of Figures	xi
-----------------	----

List of Tables	xiii
----------------	------

1 Introduction	1
1.1 Motivation	1
1.2 Research Efforts and Existing Supersonic Projects	2
1.3 Thesis Outline	3
2 Multidisciplinary Aircraft Design	5
2.1 The Aircraft Design Process	5
2.2 Aircraft Design Tools at a Glance	7
2.3 PrADO - An Aircraft Design and Optimisation Environment	7
2.3.1 The Aerodynamic Module	8
2.3.2 The Structural Analysis Module	9
2.3.3 The Propulsion Module	9
3 Fundamentals	11
3.1 Aerodynamic Analysis	11
3.1.1 Navier-Stokes Equations	11
3.1.2 Reynolds-Averaged Navier-Stokes Equations	13
3.1.3 Euler Equations	14
3.1.4 Aerodynamic Drag	15
3.2 Estimation of Structural Mass and Structural Sizing	16
3.2.1 The Finite Element Method	17
3.2.2 Fully Stressed Design	18
3.2.3 Failure Criteria for Composite Material	19
3.2.4 The Resizing Algorithm	21
3.2.5 Smoothing of Design Variables	24
3.3 Propulsion	25
3.3.1 Mixed-Stream Turbofan Engine	26
4 Modelling Aspects	31
4.1 Aerodynamic Model	31
4.2 Structural Model	34
4.2.1 Used Finite Element Types	35
4.2.2 A Surrogate Stringer Model	36
4.3 Loads, Load Cases and Boundary Conditions	37

5	Verification	41
5.1	Verification of Aerodynamics	41
5.2	Verification of the Structural Sizing Module	46
5.3	Verification of the Tool Chain	50
6	Remarks on Temperature Effects in Supersonic Flight	55
6.1	Theory	55
6.1.1	A Handbook Method for Temperature Prediction	55
6.1.2	CFD-Analysis for Temperature Prediction	57
6.2	Model Description	57
6.2.1	Geometry	57
6.2.2	CFD Model	58
6.3	Results	59
6.3.1	Temperature Field	59
6.3.2	Mach Number, Altitude and Angle of Attack Dependency of Temperature	63
6.3.3	Influence of the Results on Materials Selection	65
7	Application of the Preliminary Design Process	69
7.1	The Market and an Evaluation Methodology	69
7.2	Requirements	70
7.2.1	Remarks on the Supersonic Overland Flight Ban	70
7.2.2	Cruise Mach Number	70
7.2.3	Range, Payload and Cabin	71
7.2.4	Additional Requirements and Requirements Summary	73
7.3	Basic Aircraft	75
7.3.1	Model Description	75
7.3.2	Results	77
7.4	Parameter Studies	86
7.4.1	Variation of the Cruise Mach Number and Design Range	87
7.4.2	Performance Studies for Subsonic and Supersonic Cruise Con- ditions	94
8	Summary and Conclusions	97
	References	99
