

Content

Preface	V
Nomenclature and Abbreviations	XI
Abstract	XV
Zusammenfassung	XIX
1 Introduction	1
2 Basics and Definitions	5
2.1 Sound and Signal Processing	5
2.2 Sound Transmission	7
2.3 Simulations Tools	9
2.3.1 Lattice-Boltzmann Method	9
2.3.2 Finite Element Method	11
3 State of Research	13
3.1 Automotive Sealing Systems	13
3.1.1 Materials	14
3.1.2 Door Closing	16
3.1.3 Leakage and Aspiration	18
3.2 Door Cavity Aeroacoustics	21
3.3 Transmission through Automotive Door Sealing Systems . . .	25
3.3.1 Acoustic Excitation	27
3.3.2 Aeroacoustic Excitation	31
3.3.3 Vehicle Contribution Analysis	40
4 Experimental Investigations	45
4.1 Experimental Test Facilities	45
4.1.1 Production Vehicles	46
4.1.2 Wind Tunnels	47

4.1.3	Acoustic Measurement Facility: TL-Box	48
4.2	Real Car Measurements with Flow Excitation	50
4.2.1	Contribution Analysis	51
4.2.2	Noise-Reduction of the Door Sealing System	57
4.3	Real Car Measurements with Pure Acoustic Excitation	61
4.4	Seal Segment Measurements	62
4.5	Conclusion	65
5	Development of a Simulation Methodology	67
5.1	Physical Scenario and Simulation Setups	68
5.1.1	TL-box Setup	69
5.1.2	Reduced Setup	72
5.2	Coupling Schemes	73
5.3	Excitation	76
5.3.1	TL-Box	76
5.3.2	Reduced Setup	86
5.4	ABAQUS Coupling Methodologies	90
5.4.1	Coupling Schemes	91
5.4.2	Static Deformation	92
5.4.3	Coupling Methodologies	93
5.4.4	Methodology Comparison	96
5.4.5	Forced Modal Response	101
5.5	Sensitivity Analysis	104
5.5.1	Pre-Stress	105
5.5.2	Air inside the Seal Bulb	106
5.5.3	Leakage	107
5.6	NASTRAN Iterative Fluid Structure Interaction	108
5.6.1	Validation Setup	109
5.6.2	Reduced Setup	113
5.7	Modeled Transmission	114
5.7.1	Reduced Setup: Methodology Development	115
5.7.2	TL-Box	120
5.8	Comparison with Experiment	122
5.9	Conclusion	123
6	Vehicle Simulations	125
6.1	Acoustic Excitation versus Aeroacoustic Excitation	125
6.2	Validation of the Excitation	130

6.3	Noise Transmission Simulations	134
6.3.1	Door Seal Contribution	135
6.3.2	Side-Window Contribution	138
6.3.3	Validation	140
6.4	Conclusion	146
7	Conclusion and Outlook	149
8	List of References	151
