Preface	1
I. The Dynamics of Currency Crises - Results from Intertemporal Optimization and Viscosity Solutions	7
1. Introduction	9
2. Literature	11
3. Model	13
3.1. Linear Version	15
3.2. Extended Linear Version	21
3.2.1. Differential Equations and Time Paths	21
3.2.2. Model Dynamics	23
3.2.3. Optimal Behavior	28
4. Conclusion	38
5. Appendix	43
5.1. List of Fundamental States	43
5.2. Linear Version	44
5.2.1. Value Function	44
5.2.2. Comparison of Values	46
5.3. Extended Linear Version	46
5.3.1. Differential Equations and Time Paths	46
5.3.2. Model Dynamics	52
5.3.3. Optimal Behavior	55

II. The Mispricing of Debt - Influences of Ratings on Coordination	63
1. Introduction	65
2. Model	69
2.1. Description	69
2.2. Uniqueness and Equilibrium	72
2.3. Comparative Statics	74
2.3.1. Rating	74
2.3.2. Public Information	76
2.3.3. Bond Price	76
2.3.4. Bias	78
2.4. Transparency and Multiple Equilibria	79
3. Pricing Bonds	83
4. Conclusion	88
5. Appendix	89
5.1. Equilibrium Condition and Uniqueness	89
5.2. Comparative Statics	90
5.3. Transparency and Multiple Equilibria	91
 III. Probability of Default and Precision of Information	 95
1. Introduction	97
2. Model	99
2.1. Coordination Problem	99
2.2. Pricing of Debt	100
2.3. Value of Assets	102
2.4. Forecasting the Probability of Default	104
2.5. Market Implied Probability of Default	105
3. Data and Computation	107
4. Results and Discussion	113
5. Appendix	117
Bibliography	139
