1	New Developments and Decision-makings in Production and Retailing	1
1.1	Production and Retail Operations	1
1.1.1	New Developments in Manufacturing	1
1.1.2	New Developments in Retailing	2
1.2	Previous Studies on Decision-making Problems in Production and Retailing	3
1.2.1	Production Planning	4
1.2.2	Production Scheduling	4
1.2.3	Assembly Line Balancing	6
1.2.4	Sales Forecasting	7
1.3	Techniques for Decision-making Problems in Production and Retailing	8
1.3.1	Techniques for Production Optimization Problems	8
1.3.2	Techniques for Sales Forecasting Problems	10
1.4	Summary	10
	References	10
2	Fundamentals of Intelligent Decision-Making Techniques	19
2.1	Computational Intelligence Techniques: A Brief Overview	19
2.1.1	What Is CI?	20
2.1.2	Why Do We Need CI?	20
2.1.3	Classification of CI Techniques	21
2.2	Evolutionary Computation	22
2.2.1	Optimum-Seeking Mechanism of Evolutionary Computation Techniques	23
2.2.2	Brief Introduction to Genetic Algorithm	24
2.2.3	Brief Introduction to Evolution Strategy	25
2.2.4	Brief Introduction to Harmony Search	26
2.2.5	Brief Introduction to Memetic Algorithm	27

2.3	Feedforward Neural Networks	28
2.3.1	Brief Introduction to FNNs	29
2.3.2	Backpropagation Networks	31
2.3.3	Extreme Learning Machine Networks	32
2.4	Summary	33
	References	34
3	An Intelligent Optimization Model for Order Scheduling at Plant Level	37
3.1	Introduction.	37
3.2	Problem Statement	39
3.2.1	Problem Description and Assumptions	39
3.2.2	Notations	40
3.2.3	Mathematical Model.	41
3.3	Uncertain Completion and Beginning Times	43
3.3.1	Completion Time of Production Process	43
3.3.2	Beginning Time of Production Process	43
3.4	Genetic Algorithm-Based Intelligent Optimization Approach for Order Scheduling Problem	44
3.4.1	Representation	45
3.4.2	Initialization	46
3.4.3	Fitness and Selection	46
3.4.4	Genetic Operators	47
3.4.5	Termination Criterion	49
3.5	Experimental Results and Discussion	49
3.5.1	Experiment 1: Order Scheduling with Uncertain Processing Time.	50
3.5.2	Experiment 2: Order Scheduling with Uncertain Order	54
3.5.3	Experiment 3: Order Scheduling with Uncertain Arrival Times	55
3.6	Conclusions	56
	Appendix	57
	References	61
4	A Bilevel Intelligent Optimization Model for Assembly Line Scheduling with Flexible Operation Assignment	63
4.1	Introduction.	63
4.2	Problem Statement	65
4.2.1	Problem Description and Assumptions	65
4.2.2	Notations	66
4.2.3	Mathematical Model.	67

4.3	Bilevel Intelligent Optimization Approach for FAL Scheduling	69
4.3.1	Representation	70
4.3.2	Initialization	71
4.3.3	Fitness	72
4.3.4	Selection	73
4.3.5	Genetic Operators	73
4.3.6	Termination Criterion	75
4.4	Experimental Results and Discussion	75
4.4.1	Experiment 1.	76
4.4.2	Experiment 2.	79
4.5	Conclusions	83
	References	84
5	A Bilevel Multi-parent Genetic Optimization Model for Flexible Assembly Line Balancing with Work-Sharing and Workstation Revisiting	87
5.1	Introduction.	87
5.1.1	Manufacturing Flexibility and Assembly Lines	87
5.1.2	Assembly Line Balancing Problem.	88
5.1.3	Techniques for Assembly Line Balancing	89
5.2	Problem Statement	90
5.2.1	Problem Description and Assumptions	90
5.2.2	Notations	91
5.2.3	Mathematical Model.	92
5.3	Multi-parent GA-Based Optimization Approach for FAL Balancing.	93
5.3.1	Bilevel Multi-parent Genetic Algorithm	93
5.3.2	Operation Routing	100
5.4	Experimental Results and Discussion	101
5.4.1	Validation of GA-Based Optimization Model.	101
5.4.2	Comparison Between GA-Based Optimization Model and Industrial Practice	108
5.4.3	Effect of Task Proportion on FALB Performance	109
5.4.4	Effect of Operation Routing on FALB Performance	109
5.4.5	Discussion on Assumption Relaxation	110
5.5	Conclusion	110
	References	111
6	An Evolution Strategy-Based Multi-objective Optimization Model for Order Planning with Multiple Production Departments	115
6.1	Introduction.	115
6.1.1	Previous Studies in Production Planning	116
6.1.2	Techniques for Optimization Problems in Production Decision-Making	116

6.2	Problem Statement	117
6.2.1	Problem Description and Assumptions	117
6.2.2	Notations	118
6.2.3	Mathematical Model.	119
6.3	Evolution Strategy-Based Multi-objective Optimization Approach for Order Planning Problems.	120
6.3.1	Outline of ESMOO Approach	120
6.3.2	Representation and Population Initialization.	122
6.3.3	Evolutionary Operators	123
6.3.4	Performance Evaluation	123
6.3.5	Self-Adaptive Population Size Adjustment.	125
6.3.6	Pruning the Pareto-Optimal Sets.	125
6.4	Numerical Experiments.	126
6.4.1	Experimental Data and Setting.	126
6.4.2	Experimental Results	127
6.5	Discussions	131
6.5.1	Comparison Between Proposed Approach and Industrial Practice	131
6.5.2	Effects of Self-Adaptive Population Size Adjustment.	134
6.6	Conclusions	135
	Appendix	135

7	A Multi-objective Hybrid Intelligent Optimization Model for Order Planning with Uncertainties	147
7.1	Introduction.	147
7.1.1	Previous Studies in Production Planning Decision-Making	148
7.1.2	Optimization Techniques for Production Decision-Making	149
7.2	Problem Statement	150
7.2.1	Problem Description and Assumptions	150
7.2.2	Notations	151
7.2.3	Mathematical Model.	152
7.3	Multi-objective Hybrid Intelligent Approach for Order Planning	154
7.3.1	Multi-objective Memetic Optimization	155
7.3.2	Monte Carlo Simulation for Production Uncertainties	159
7.3.3	Heuristic Pruning Process	159
7.4	Numerical Experiments.	160
7.4.1	Experimental Data and Setting.	160
7.4.2	Experimental Results	162

7.5	Performance Comparison	167
7.6	Conclusions	171
	Appendix	171
	References	185
8	A Harmony Search-Based Hybrid Intelligent Optimization Model for Order Planning with Learning Effects	187
8.1	Introduction.	187
8.2	Problem Statement.	190
8.2.1	Problem Description and Assumptions	190
8.2.2	Notations	191
8.2.3	Mathematical Model.	193
8.3	HS-Based Hybrid Intelligent Optimization Approach for Multi-Site Order Planning Problem	195
8.3.1	HS-Based Pareto Optimization.	196
8.3.2	Monte Carlo Simulation for Production Uncertainties	201
8.4	Numerical Experiments.	201
8.4.1	Experimental Design	201
8.4.2	Experiment Results	202
8.5	Discussions.	210
8.5.1	Performance Comparison	210
8.5.2	Effects of Learning Phenomenon on Order Planning Decision-Making	214
8.6	Conclusions	214
	Appendix	215
	References	230
9	An RFID- and Cloud-Based Intelligent Decision Support System Architecture for Production Tracking and Scheduling	233
9.1	Introduction.	233
9.2	Literature Review.	234
9.2.1	Previous Studies in RFID-Based Production Tracking	234
9.2.2	Production Tracking in Distributed Labor-Intensive Manufacturing	236
9.2.3	Previous Studies in Production Scheduling	237
9.3	Problem Statement.	239
9.4	RFID- and Cloud-Based Intelligent Decision Support System Architecture	241
9.4.1	RFID-Based Real-Time Data Capture (RRDC) Model	242
9.4.2	Data Analysis and Processing (DAP) Model	244
