

Contents

1	Introduction — 1
1.1	Symmetries — 1
1.2	Invariant Differential Operators — 7
1.3	Sketch of Procedure — 8
1.4	Organization of the Book — 10
2	Lie Algebras and Groups — 11
2.1	Generalities on Lie Algebras — 11
2.1.1	Lie Algebras — 11
2.1.2	Subalgebras, Ideals, and Factor-Algebras — 12
2.1.3	Representations — 13
2.1.4	Solvable Lie Algebras — 13
2.1.5	Nilpotent Lie Algebras — 14
2.1.6	Semisimple Lie Algebras — 14
2.1.7	Examples — 15
2.2	Elements of Group Theory — 18
2.2.1	Definition of a Group — 18
2.2.2	Group Actions — 18
2.2.3	Subgroups and Factor-Groups — 19
2.2.4	Homomorphisms — 19
2.2.5	Direct and Semidirect Products of Groups — 20
2.3	Structure of Semisimple Lie Algebras — 21
2.3.1	Cartan Subalgebra — 21
2.3.2	Lemmas on Root Systems — 22
2.3.3	Weyl Group — 25
2.3.4	Cartan Matrix — 26
2.4	Classification of Kac–Moody Algebras — 27
2.5	Realization of Semisimple Lie Algebras — 34
2.5.1	Special Linear Algebra — 34
2.5.2	Odd Orthogonal Lie Algebra — 36
2.5.3	Symplectic Lie Algebra — 38
2.5.4	Even Orthogonal Lie Algebra — 40
2.5.5	Exceptional Lie Algebra G_2 — 41
2.5.6	Exceptional Lie Algebra F_4 — 42
2.5.7	Exceptional Lie Algebras E_ℓ — 44
2.6	Realization of Affine Kac–Moody Algebras — 47
2.6.1	Realization of Affine Type 1 Kac–Moody Algebras — 47
2.6.2	Realization of Affine Type 2 and 3 Kac–Moody Algebras — 52

2.6.3	Root System for the Algebras AFF 2 & 3 —	55
2.7	Chevalley Generators, Serre Relations, and Cartan–Weyl Basis —	58
2.8	Highest Weight Representations of Kac–Moody Algebras —	61
2.9	Verma Modules —	63
2.10	Irreducible Representations —	71
2.10.1	A_ℓ —	72
2.10.2	C_ℓ —	73
2.10.3	B_ℓ —	73
2.10.4	D_ℓ —	75
2.10.5	E_ℓ —	77
2.10.6	F_4 —	78
2.10.7	G_2 —	78
2.11	Characters of Highest Weight Modules —	78
2.11.1	Irreducible Quotients of Reducible Verma Modules —	78
2.11.2	Embedding Patterns and Multiplets —	79
2.11.3	Characters of Generic Highest Weight Modules —	86
2.11.4	Characters for Nondominant Weights —	88
2.11.5	Characters in the Affine Case —	88
2.11.6	Example of $A_1^{(1)}$ —	90
3	Real Semisimple Lie Algebras —	93
3.1	Structure of Noncompact Semisimple Lie Algebras —	93
3.1.1	Preliminaries —	93
3.1.2	The Structure in Detail —	95
3.2	Classification of Noncompact Semisimple Lie Algebras —	96
3.3	Parabolic Subalgebras —	100
3.4	Complex Simple Lie Algebras Considered as Real Lie Algebras —	102
3.5	AI : $SL(n, \mathbb{R})$ —	103
3.6	AII : $SU^*(2n)$ —	106
3.7	AIII : $SU(p, r)$ —	107
3.7.1	Case $SU(n, n)$, $n > 1$ —	108
3.7.2	Case $SU(p, r)$, $p > r \geq 1$ —	109
3.8	BDI : $SO(p, r)$ —	110
3.9	CI : $Sp(n, \mathbb{R})$, $n > 1$ —	114
3.10	CII : $Sp(p, r)$ —	115
3.11	DIII : $SO^*(2n)$ —	117
3.12	Real Forms of the Exceptional Simple Lie Algebras —	119
3.12.1	EI : E'_6 —	119
3.12.2	EII : E''_6 —	120
3.12.3	EIII : E'''_6 —	122
3.12.4	EIV : E^{iv}_6 —	122
3.12.5	EV : E'_7 —	123

3.12.6	EVI : E_7'' — 124
3.12.7	EVII : E_7''' — 126
3.12.8	EVIII : E_8' — 127
3.12.9	EIX : E_8'' — 129
3.12.10	FI : F_4' — 131
3.12.11	FII : F_4'' — 132
3.12.12	GI : G_2' — 132

4 Invariant Differential Operators — 133

4.1	Lie Groups — 133
4.1.1	Preliminaries — 133
4.1.2	Classical Groups — 134
4.1.3	Types of Lie Groups — 135
4.1.4	Cartan Subgroups — 136
4.1.5	Cartan and Iwasawa Decompositions — 136
4.1.6	Parabolic Subgroups — 137
4.2	Preliminaries on Group Representation Theory — 138
4.2.1	Representations and Modules — 138
4.2.2	Reducibility and Irreducibility — 138
4.2.3	Operations on Representations — 139
4.2.4	Induced Representations — 140
4.3	Elementary Representations — 140
4.3.1	Compact Lie Groups — 140
4.3.2	Noncompact Lie Groups — 141
4.3.3	Knapp–Stein Integral Operators — 142
4.3.4	ERs of Complex Lie Groups — 144
4.4	Unitary Irreducible Representations — 145
4.5	Associated Verma Modules — 146
4.6	Invariant Differential Operators — 149
4.6.1	Canonical Construction — 149
4.6.2	Multiplets of GVMs and ERs — 152
4.7	Example of $SL(2, \mathbb{R})$ — 152
4.7.1	Elementary Representations — 152
4.7.2	Discrete Series and Limits Thereof — 153
4.7.3	Positive Energy Representations — 154
4.8	Explicit Formulae for Singular Vectors — 154
4.8.1	A_ℓ — 155
4.8.2	D_ℓ — 156
4.8.3	E_ℓ — 157
4.8.4	B_ℓ — 157
4.8.5	C_ℓ — 158
4.8.6	F_4 — 158

4.8.7	G_2 — 159
4.8.8	Nonstraight Roots — 160
5	Case of the Anti-de Sitter Group — 162
5.1	Preliminaries — 162
5.1.1	Lie Algebra — 162
5.1.2	Finite-Dimensional Realization — 164
5.1.3	Structure Theory — 165
5.1.4	Lie Groups — 166
5.2	Representations and Invariant Operators — 166
5.2.1	Elementary Representations — 166
5.2.2	Elementary Representations Induced from P_0 — 168
5.2.3	Singular Vectors — 168
5.2.4	Invariant Differential Operators — 171
5.2.5	Reducible ERs — 172
5.2.6	Holomorphic Discrete Series and Positive Energy Representations — 175
5.2.7	Invariant Differential Operators and Equations Related to Positive Energy UIRs — 176
5.2.8	Rac — 177
5.2.9	Di — 177
5.2.10	Massless Representations — 178
5.3	Classification of $so(5, \mathbb{C})$ Verma Modules and P_0 -Induced ERs — 179
5.4	Character Formulae — 183
5.4.1	Character Formulae of AdS Irreps — 183
5.4.2	Character Formulae of Positive Energy UIRs — 186
6	Conformal Case in 4D — 188
6.1	Preliminaries — 188
6.1.1	Realizations of the Group $SU(2, 2)$ — 188
6.1.2	Lie Algebra of $SU(2, 2)$ — 189
6.1.3	Restricted Root System, Bruhat and Iwasawa Decompositions — 191
6.1.4	Restricted Weyl Group $W(\mathcal{G}, \mathcal{A}_0)$ — 193
6.1.5	Parabolic Subalgebras — 194
6.1.6	Complexified Lie Algebra — 195
6.1.7	Compact and Noncompact Roots — 198
6.1.8	Important Subgroups of G — 199
6.2	Elementary Representations of $SU(2, 2)$ — 202
6.2.1	ERs from the Minimal Parabolic Subgroup P_0 — 203
6.2.2	ERs from the Maximal Cuspidal Parabolic Subgroup P_1 — 204

6.2.3	ERs from the Maximal Noncuspidal Parabolic Subgroup P_2 —	205
6.2.4	Noncompact Picture of the ERs —	207
6.2.5	Properties of ERs —	209
6.2.6	Integral Invariant Operators —	211
6.3	Invariant Differential Operators and Multiplet Classification of the Reducible ERs —	215
6.3.1	Explicit Expressions for the Invariant Differential Operators —	215
6.3.2	Multiplet Classification: Case P_0 —	217
6.3.3	Multiplet Classification: Case P_2 —	225
6.3.4	Holomorphic Discrete Series and Lowest Weight Representations —	229
6.3.5	Multiplet Classification: Case P_1 —	231
7	Kazhdan–Lusztig Polynomials, Subsingular Vectors, and Conditionally Invariant Equations —	238
7.1	Subsingular Vectors —	239
7.1.1	Preliminaries —	239
7.1.2	Definition —	240
7.1.3	Bernstein–Gel’fand–Gel’fand Example —	242
7.1.4	The Other Archetypal $sl(4, \mathbb{C})$ Example —	243
7.2	Kazhdan–Lusztig Polynomials —	248
7.3	Characters of LWM and Nontrivial KL Polynomials —	251
7.3.1	Preliminaries on Characters of Lowest Weight Modules —	251
7.3.2	Case $sl(4, \mathbb{C})$ —	253
7.3.3	Related Character Formulae —	259
7.4	KL Polynomials and Subsingular Vectors: A Conjecture —	260
7.5	Conditionally Invariant Differential Equations —	262
7.5.1	Preliminaries —	262
7.5.2	Conditionally Invariant Operators —	263
7.6	Application to $sl(4, \mathbb{C})$ —	264
7.6.1	Equations Arising from the BGG Example —	265
7.6.2	Equations Arising from the Other Archetypal $sl(4, \mathbb{C})$ Example —	265
8	Invariant Differential Operators for Noncompact Lie Algebras Parabolically Related to Conformal Lie Algebras —	271
8.1	Generalities —	271
8.2	The Pseudo-Orthogonal Algebras $so(p, q)$ —	274
8.2.1	Choice of Parabolic Subalgebra —	274
8.2.2	Main Multiplets —	275

8.2.3	Reduced Multiplets and Their Representations —	280
8.2.4	Conservation Laws for $so(p,q)$ —	288
8.2.5	Remarks on Shadow Fields and History —	290
8.2.6	Case $so(3, 3) \cong sl(4, \mathbb{R})$ —	291
8.3	The Lie Algebra $su(n,n)$ and Parabolically Related —	292
8.3.1	Multiplets of $su(3, 3)$ and $sl(6, \mathbb{R})$ —	293
8.3.2	Multiplets of $su(4, 4)$, $sl(8, \mathbb{R})$, and $su^*(8)$ —	298
8.4	Multiplets and Representations for $sp(n, \mathbb{R})$ and $sp(r, r)$ —	306
8.4.1	Preliminaries —	306
8.4.2	The Case $sp(3, \mathbb{R})$ —	307
8.4.3	The Case $sp(4, \mathbb{R})$ and $sp(2, 2)$ —	309
8.4.4	The Case $sp(5, \mathbb{R})$ —	313
8.4.5	The Case $sp(6, \mathbb{R})$ and $sp(3, 3)$ —	317
8.4.6	Summary for $sp(n, \mathbb{R})$ —	325
8.5	$SO^*(4n)$ Case —	325
8.5.1	Main Multiplets —	327
8.5.2	Reduced Multiplets and Minimal Irreps —	329
8.6	The Lie Algebras $E_{7(-25)}$ and $E_{7(7)}$ —	332
8.6.1	Main Type of Multiplets —	333
8.6.2	Reduced Multiplets —	336
8.7	The Lie Algebras $E_{6(-14)}$, $E_{6(6)}$, and $E_{6(2)}$ —	341
8.7.1	Main Type of Multiplets —	343
8.7.2	Reduced Multiplets —	346
9	Multilinear Invariant Differential Operators from New Generalized Verma Modules —	353
9.1	Preliminaries —	353
9.2	k -Verma Modules —	355
9.3	Singular Vectors of k -Verma Modules —	357
9.3.1	Definition —	357
9.3.2	$k = 2$ —	357
9.3.3	$k = 3$ —	360
9.4	Multilinear Invariant Differential Operators —	362
9.5	Bilinear Operators for $SL(n, \mathbb{R})$ and $SL(n, \mathbb{C})$ —	363
9.5.1	Setting —	363
9.5.2	Minimal Parabolic —	364
9.5.3	$SL(2, \mathbb{R})$ —	366
9.5.4	$SL(3, \mathbb{R})$ —	370
9.6	Examples with $k \geq 3$ —	372

Bibliography — 375
