1	Introduction	1
1.1	Background	1
1.1.1	Uncertainties in Soil Properties	1
1.1.2	Probabilistic Analysis of Geotechnical Structures	1
1.1.3	Reliability-Based Design of Geotechnical Structures	2
1.1.4	Geotechnical Site Characterization	3
1.2	Objectives	4
1.2.1	Uncertainty Propagation During Geotechnical Site Characterization	5
1.2.2	Bayesian Framework for Geotechnical Site Characterization	5
1.2.3	Prior Knowledge and Prior Distribution	5
1.2.4	Probabilistic Site Characterization Using Limited Site Observation Data	6
1.2.5	Probabilistic Site Characterization Using a Large Number of Site Observation Data	6
1.2.6	Probabilistic Slope Stability Analysis Using Subset Simulation	6
1.2.7	Probabilistic Failure Analysis of Slope Stability	7
1.3	Layout of the Book	7
