Formal Grammar 2015: Invited Papers

Frames as Records	3
Types from Frames as Finite Automata	19

Formal Grammar 2015: Contributed Papers

Cyclic Multiplicative-Additive Proof Nets of Linear Logic with an Application to Language Parsing	43
Algebraic Governance and Symmetry in Dependency Grammars.	60
On the Mild Context-Sensitivity of k -Tree Wrapping Grammar.	77
Distributional Learning and Context/Substructure Enumerability in Nonlinear Tree Grammars	94
Between the Event Calculus and Finite State Temporality	112
A Modal Representation of Graded Medical Statements	130
Models for the Displacement Calculus.	147
On Some Extensions of Syntactic Concept Lattices: Completeness and Finiteness Results	164

Formal Grammar 2016: Contributed Papers

Overtly Anaphoric Control in Type Logical Grammar	183
---	-----

A Single Movement Normal Form for Minimalist Grammars	200
Word Ordering as a Graph Rewriting Process	216
Undecidability of the Lambek Calculus with a Relevant Modality	240
Introducing a Calculus of Effects and Handlers for Natural Language Semantics	257
Proof Nets for the Displacement Calculus	273
Countability: Individuation and Context	290
The Proper Treatment of Linguistic Ambiguity in Ordinary Algebra	306
Author Index	323
