Joint Foreword11

Part 1: Theory and Observation in Quantum Physics

1. Introduction15

Part I. Theory and Observation17

2. The Relationship between Theory and Observation17

3. Classification of Terms and Sentences22

3.1 Empirical Terms 22

3.1.1 Observational Terms and Ostensive Learnability 22

3.1.2 Empirical Disposition Terms 24

3.2 Theoretical Terms 24

3.2.1 Theoretical Terms in the Broad Sense 24

3.2.2 Theoretical Terms in the Narrow Sense 24

3.3 Classification of Statements 25

4. Theory (In-)dependence26

4.1 Theory (In-)dependence of Observational Language 26

4.2 Theory (In-)dependence of Observation 28

4.3 Linguistic Relativism 30

5. Ontological Status of Scientific Theories32

5.1 Realism and Antirealism 32

5.2 Kinds of (Anti-)Realism 34

5.2.1 Fundamental Positions 34

5.2.2 Advanced Positions 36

5.3 The Case against Solipsism 37

5.4 The Case against Metaphysical Realism 38

5.5	The Case against Radical Constructivism	39
5.6	The Case for and against Constructive Realism	39
5.6.1	Inference of the Best Explanation	39
5.6.2	Pessimistic Meta-Induction.....	40
5.6.3	Intertheoretical Correspondence.....	40
5.6.4	Justification of Abduction according to Schurz.....	41
5.6.5	The Logical Positivist Objection.....	42
5.7	Towards a Modern Radical Empiricism.....	44
5.7.1	The Independence of Theory	44
5.7.2	Observational Language as Ostensively Learnable Language	44
5.7.3	The Limited Theory-Ladenness of Observational Language.....	45
5.7.4	Literalness of Theories	45

Part II. Basics of Quantum Physics.....47

6.	The Classical Picture of the World	47
7.	Experimental Basis of Quantum Physics	50
8.	The Quantum Explanation	53
8.1	Wave-Particle Duality	54
8.2	Schrödinger Equation and Born Rule	55
8.3	Observables.....	56
8.4	Einstein-Podolski-Rosen Paradox and Quantum Entanglement	56
9.	No-go Theorems.....	57
9.1	Bell's Theorem.....	58
9.2	Kochen-Specker Theorem.....	58
10.	Interpretations	61
10.1	Schrödinger's cat.....	61
10.2	Subjectivist Interpretations	62
10.3	Objective-Collapse Interpretations	62

10.4	Modal Interpretations	63
10.5	Many-Worlds Interpretation.....	63
10.6	Hidden-Variable Interpretations	63
10.7	Operational Approach.....	64
Part III.	Reflections on Quantum Physics	65
11.	Theory and Observation in Quantum Physics.....	65
11.1	Observables and Observation.....	65
11.2	Theory or Interpretation?	66
11.3	Theory and Ontology	68
11.4	Structural Correspondences of Interpretations.....	69
12.	Is Quantum Physics Acceptable?.....	69
12.1	Indeterminism	70
12.2	Value Definiteness.....	71
12.3	Measurement Problem.....	73
13.	Ontology of Quantum Physics.....	74
13.1	Value Definiteness and Ontology	74
13.2	Interpretations and Ontology	76
13.2.1	Subjectivist Interpretations	76
13.2.2	Objective-Collapse Interpretations	77
13.2.3	Modal Interpretations	78
13.2.4	Many-Worlds Interpretation.....	78
13.2.5	Hidden-Variable Interpretations	79
13.2.6	Operational Approach	79
13.2.7	Interpretations and Ontological Parsimony	80
13.3	Literalness and the Challenge of Quantum Gravity	81
14.	Conclusion	82
	References	85
