1	Introduction	1
1.1	A Key Note on GPS	2
1.1.1	GPS Modernization	4
1.2	A Brief Message About GLONASS	7
1.2.1	The Development of GLONASS	7
1.3	Basic Information on Galileo	9
1.3.1	The Development of Galileo	10
1.4	Introduction of BeiDou	11
1.4.1	The Development of BeiDou	12
1.5	A Combined Global Navigation Satellite System	13
	References	14
2	Coordinate and Time Systems	17
2.1	Geocentric Earth-Fixed Coordinate Systems	17
2.2	Coordinate System Transformations	21
2.3	Local Coordinate System	22
2.4	Earth-Centred Inertial Coordinate System	24
2.5	IAU 2000 Framework	28
2.6	Geocentric Ecliptic Inertial Coordinate System	32
2.7	Time Systems	33
	References	36
3	Satellite Orbits	37
3.1	Keplerian Motion	37
3.1.1	Satellite Motion in the Orbital Plane	40
3.1.2	Keplerian Equation	44
3.1.3	State Vector of the Satellite	46
3.2	Disturbed Satellite Motion	49
3.3	GPS Broadcast Ephemerides	49
3.4	IGS Precise Ephemerides	51
3.5	GLONASS Ephemerides	52

3.6	Galileo Ephemerides	53
3.7	BDS Ephemerides	53
	References	53
4	GPS Observables	55
4.1	Code Pseudoranges	55
4.2	Carrier Phases	57
4.3	Doppler Measurements	59
	References	61
5	Physical Influences of GPS Surveying	63
5.1	Ionospheric Effects	63
5.1.1	Code Delay and Phase Advance	63
5.1.2	Elimination of Ionospheric Effects	66
5.1.3	Ionospheric Models	69
5.1.4	Mapping Functions	73
5.1.5	Introduction of Commonly Used Ionospheric Models	76
5.2	Tropospheric Effects	80
5.2.1	Tropospheric Models	81
5.2.2	Mapping Functions and Parameterisation	85
5.2.3	Introduction of Commonly Used Tropospheric Models	88
5.2.4	Tropospheric Model for Airborne Kinematic Positioning	91
5.2.5	Water Vapour Research with Ground-Based GPS Measurement	93
5.3	Relativistic Effects	94
5.3.1	Special Relativity and General Relativity	94
5.3.2	Relativistic Effects on GPS	97
5.4	Earth Tide and Ocean Loading Tide Corrections	99
5.4.1	Earth Tide Displacements of GPS Stations	99
5.4.2	Simplified Model of Earth Tide Displacements	101
5.4.3	Numerical Examples of Earth Tide Effects	103
5.4.4	Ocean Loading Tide Displacement	105
5.4.5	Computation of the Ocean Loading Tide Displacement	108
5.4.6	Numerical Examples of Loading Tide Effects	109
5.5	Clock Errors	110
5.5.1	Introduction of Commonly Used Clock Error Models	112
5.5.2	Impact of Frequency Reference of a GPS Receiver on the Positioning Accuracy	114

5.6	Multipath Effects	115
5.6.1	GPS Altimetry, Signals Reflected from the Earth's Surface	117
5.6.2	Reflecting Point Positioning	117
5.6.3	Image Point and Reflecting Surface Determination	119
5.6.4	Research Activities in GPS Altimetry	120
5.7	Anti-spoofing and Selective Availability Effects	121
5.8	Antenna Phase Centre Offset and Variation	122
5.9	Instrumental Biases	126
	References	127
6	GPS Observation Equations and Equivalence Properties	133
6.1	General Mathematical Models of GPS Observations	133
6.2	Linearisation of the Observation Model	135
6.3	Partial Derivatives of Observation Function	137
6.4	Linear Transformation and Covariance Propagation	141
6.5	Data Combinations	142
6.5.1	Ionosphere-Free Combinations	144
6.5.2	Geometry-Free Combinations	145
6.5.3	Standard Phase-Code Combination	148
6.5.4	Ionospheric Residuals	149
6.5.5	Differential Doppler and Doppler Integration	150
6.6	Data Differentiations	152
6.6.1	Single Differences	153
6.6.2	Double Differences	156
6.6.3	Triple Differences	158
6.7	Equivalence of the Uncombined and Combining Algorithms	160
6.7.1	Uncombined GPS Data Processing Algorithms	161
6.7.2	Combining Algorithms of GPS Data Processing	163
6.7.3	Secondary GPS Data Processing Algorithms	168
6.7.4	Summary	171
6.8	Equivalence of Undifferenced and Differencing Algorithms	172
6.8.1	Introduction	172
6.8.2	Formation of Equivalent Observation Equations	173
6.8.3	Equivalent Equations of Single Differences	175
6.8.4	Equivalent Equations of Double Differences	179
6.8.5	Equivalent Equations of Triple Differences	181
6.8.6	Method of Dealing with the Reference Parameters	182
6.8.7	Summary of the Unified Equivalent Algorithm	183
