## Part I Experiment and Evacuation

---

<b>The UK WTC9/11 Evacuation Study: An Overview of the Methodologies Employed and Some Preliminary Analysis</b> <i>Edwin R. Galea, Lynn Hulse, Rachel Day, Asim Siddiqui, Gary Sharp, Karen Boyce, Louise Summerfield, David Canter, Melisa Marselle, and Paul V. Greenall</i> .....	3
<b>Evacuation Movement in Photoluminescent Stairwells</b> <i>Guyène Proulx and Noureddine Bénichou</i> .....	25
<b>Automatic Extraction of Pedestrian Trajectories from Video Recordings</b> <i>Maik Boltes, Armin Seyfried, Bernhard Steffen, and Andreas Schadschneider</i> .....	43
<b>Stairwell Evacuation from Buildings: What We Know We Don't Know</b> <i>Richard D. Peacock, Jason D. Averill, and Erica D. Kuligowski</i> .....	55
<b>Evacuation of a High Floor Metro Train in a Tunnel Situation: Experimental Findings</b> <i>Monika Oswald, Hubert Kirchberger, and Christian Lebeda</i> .....	67
<b>Using Laser Scanner Data to Calibrate Certain Aspects of Microscopic Pedestrian Motion Models</b> <i>Dietmar Bauer and Kay Kitazawa</i> .....	83
<b>Pedestrian Vision and Collision Avoidance Behavior: Investigation of the Information Process Space of Pedestrians Using an Eye Tracker</b> <i>Kay Kitazawa and Taku Fujiyama</i> .....	95

**FDS+Evac: An Agent Based Fire Evacuation Model***Timo Korhonen, Simo Hostikka, Simo Heliövaara, and Harri Ehtamo* . . 109**Comparisons of Evacuation Efficiency and Pre-travel Activity Times in Response to a Sounder and Two Different Voice Alarm Messages***David Purser* . . . . . 121**Design of Voice Alarms—the Benefit of Mentioning Fire and the Use of a Synthetic Voice***Daniel Nilsson and Håkan Frantzich* . . . . . 135**Enhanced Empirical Data for the Fundamental Diagram and the Flow Through Bottlenecks***Armin Seyfried, Maik Boltes, Jens Kähler, Wolfram Klingsch, Andrea Portz, Tobias Rupprecht, Andreas Schadschneider, Bernhard Steffen, and Andreas Winkens* . . . . . 145**Parameters of Pedestrian Flow for Modeling Purposes***Valerii V. Kholoshevnikov and Dmitrii A. Samoshin* . . . . . 157**Emergency Preparedness in the Case of a Tsunami—Evacuation Analysis and Traffic Optimization for the Indonesian City of Padang***Gregor Lämmel, Marcel Rieser, Kai Nagel, Hannes Taubenböck, Günter Strunz, Nils Goseberg, Thorsten Schürmann, Hubert Klüpfel, Neysa Setiadi, and Jörn Birkmann* . . . . . 171**Case Studies on Evacuation Behaviour in a Hotel Building in BART and in Real Life***Margrethe Kobes, Nancy Oberijé, and Martina Duyvis* . . . . . 183**Analysis of Empirical Trajectory Data of Pedestrians***Anders Johansson and Dirk Helbing* . . . . . 203**Model-Based Real-Time Estimation of Building Occupancy During Emergency Egress***Robert Tomastik, Satish Narayanan, Andrzej Banaszuk, and Sean Meyn* 215**Experiments on Evacuation Dynamics for Different Classes of Situations***Jarosław Was* . . . . . 225**Prediction and Mitigation of Crush Conditions in Emergency Evacuations***Peter J. Harding, Martyn Amos, and Steve Gwynne* . . . . . 233

<b>Start Waves and Pedestrian Movement—An Experimental Study</b>	
<i>Christian Rogsch</i> .....	247

<b>Architectural Cue Model in Evacuation Simulation for Underground Space</b> <i>Chengyu Sun, Bauke de Vries, and Qi Zhao</i> .....	627
<b>Integrating Strategies in Numerical Modelling of Crowd Motion</b> <i>Juliette Venel</i> .....	641
<b>Small-Grid Analysis of Evacuation Processes with a Lattice Gas Model for Mixed Pedestrian Dynamics</b> <i>Yan-fang Wei, Yu Xue, and Shi-qiang Dai</i> .....	647
<b>Evacuation Simulation and Human Behaviour Models in Tall Buildings</b> <i>Marja-Liisa Siikonen and Janne S. Sorsa</i> .....	653
<b>Proof of Evacuation Routes and Safety Exits: Time Data as the Main Criteria for the Evaluation of Escape Routes and Safety Exits?</b> <i>Nathalie Waldau, Marita Kersken-Bradley, and Thilo Hoffmann</i> .....	659
<b>Dependence of Modelled Evacuation Times on Key Parameters and Interactions</b> <i>David Purser</i> .....	667
<b>A Modification of the Social Force Model by Foresight</b> <i>Bernhard Steffen</i> .....	677
<b>Models for Crowd Movement and Egress Simulation</b> <i>Hubert Klüpfel</i> .....	683
<b>Modelling Pedestrian Escalator Behaviour</b> <i>Michael J. Kinsey, Edwin R. Galea, Peter J. Lawrence, Darren Blackshields, Lynn Hulse, Rachel Day, and Gary Sharp</i> .....	689

## **Introducing a Coupled Model for Simulating Crowd Behaviour**

*Alicia Guadalupe Ortega Camarena and Dominik Jürgens* ..... 697

## **Evacuation Modelling of Fire Scenarios in Passenger Trains**

*Jorge Capote, Daniel Alvear, Orlando Abreu, Mariano Lázaro, and Arturo Cuesta* ..... 705

## **Pedestrian Dynamics with Event-Driven Simulation**

*Mohcine Chraïbi and Armin Seyfried* ..... 713

## **Part III Psychology**

### **The Need for Behavioral Theory in Evacuation Modeling**

*Erica D. Kuligowski and Steve M.V. Gwynne* ..... 721

### **NO PANIC. “Escape and Panic in Buildings”—Architectural Basic Research in the Context of Security and Safety Research**

*Christa Illera, Matthias Fink, Harry Hinneberg, Karin Kath, Nathalie Waldau, Andrea Rosič, and Gabriel Wurzer* ..... 733

### **Was It Panic? An Overview About Mass-Emergencies and Their Origins All Over the World for Recent Years**

*Christian Rogsch, Michael Schreckenberg, Eric Tribble, Wolfram Klingsch, and Tobias Kretz* ..... 743

### **Hierarchical Structure of the Mass and Group-Level Behaviors in Urban Rail Transfer Stations**

*Xiaolei Zou, Ruihua Xu, and Peng Gao* ..... 757

### **The Use of a Structure and Its Influence on Evacuation Behavior**

*Steve M.V. Gwynne and Dave Boswell* ..... 773

## **Part IV Miscellaneous**

### **Inhalation Injury of Lung and Heart After Inhalation of Toxic Substances**

*Herbert Löllgen and Dieter Leyk* ..... 781

### **Quantitative Comparison of International Design Standards of Escape Routes in Assembly Buildings**

*Burkhard Forell, Ralf Seidenspinner, and Dietmar Hosser* ..... 791

<b>Visualizing the Human Form for Simulation and Planning</b> <i>Gabriel Wurzer</i> .....	803
<b>A Real-Time Pedestrian Animation System</b> <i>Christian Schulz, Michael Schultz, and Hartmut Fricke</i> .....	811
<b>Modeling of Escape Routes According to Occupancy, Economy, and Level of Safety in Slovak Republic</b> <i>Martin Lopusňiak</i> .....	819
<b>List of Participants</b> .....	825
