

Table of contents

Dedication.....	I
Declaration.....	II
List of abbreviations.....	III
List of tables.....	VI
List of figures.....	VII
1. Introduction	1
2. Literature Review: <i>Mycobacterium avium</i> subspecies <i>paratuberculosis</i>	2
2.1 TAXONOMY	2
2.2 NOMENCLATURE.....	2
2.3 CHARACTERISTIC FEATURES.....	3
2.4 JOHNE'S DISEASE.....	4
2.4.1 Infection and susceptibility	4
2.4.2 Geographical distribution and spread	4
2.4.3 Transmission.....	5
2.4.4 Pathogenesis.....	5
2.4.5 Clinical picture and stages of Johne's disease	7
2.4.5.1 Clinical picture	7
2.4.5.2 Disease stages	8
2.4.6 Pathology.....	8
2.4.7 Morbidity and mortality.....	9
2.4.8 Economic importance	9
2.4.9 Diagnosis	10
2.4.9.1 Direct detection of the causal agent	10
2.4.9.1.1 Microscopic examination (Ziehl-Neelsen staining technique).....	10
2.4.9.1.2 Culture methods	11
2.4.9.1.3 Polymerase Chain Reaction (PCR).....	12
2.4.9.2 Detection of host immunological response to infection.....	13
2.4.9.2.1 Enzyme-Linked Immunosorbent Assays (ELISAs).....	13
2.4.9.2.2 The complement fixation test (CFT).....	15
2.4.9.2.3 Agar-gel-immuno-diffusion test (AGID).....	15
2.4.9.2.4 Cellular Immunity Tests	15
2.5 HUMAN RISK.....	16
2.6 DIVERSITY OF <i>M. AVIUM</i> SUBSPECIES <i>PARATUBERCULOSIS</i> STRAINS.....	17
3. Material and Methods	21
3.1 FIELD SAMPLES COLLECTION AND TRANSPORT	21
3.2 MICROSCOPIC INVESTIGATION OF FECES SAMPLES	21
3.3 DETECTION OF MAP BY CULTURE METHOD.....	23
3.3.1 Decontamination and culture of feces samples.....	23
3.3.2 Decontamination and culture of milk samples	23
3.4 ISOLATES IDENTIFICATION	23
3.4.1 Phenotypic characters and colonies count.....	23
3.4.2 Ziehl-Neelsen stain.....	24
3.4.3 MJ dependency.....	24
3.4.4 Molecular identification.....	24
3.5 MOLECULAR DIAGNOSIS.....	24
3.5.1 Selection of the target sequences.....	24
3.5.1.1 Determination of different PCR primers specificity	24
3.5.1.2 Assessment of systems sensitivities.....	27
3.5.1.3 Spiked Samples.....	28
3.5.2 Extraction of DNA from feces and milk samples.....	28
3.5.3 Selection of diagnostic PCR assays	29

3.5.3.1	IS900 nested PCR assay	30
3.5.3.1.1	Methodologies applied to improve the performance of the nested PCR.....	30
3.5.3.2	F57 conventional PCR assay	31
3.6	MOLECULAR CHARACTERIZATION OF ISOLATES (RESTRICTION FRAGMENT LENGTH POLYMORPHISM).....	31
3.6.1	<i>M. avium</i> subspecies <i>paratuberculosis</i> isolates	31
3.6.1.1	Molecular identification of isolates.....	32
3.6.1.2	Strains growth conditions	33
3.6.2	Isolation of genomic DNA	33
3.6.3	Digestion of genomic DNA with restriction endonuclease <i>BstEII</i> and separation of DNA fragments by electrophoresis.....	33
3.6.4	Downward Southern – Blotting.....	34
3.6.5	Preparation of Map IS900 DNA probe	35
3.6.6	Hybridization with DIG - DNA probe and membrane detection.....	36
3.6.7	Detection and visualization.....	36
3.6.8	Computer assisted analysis of RFLP fingerprints.....	37
3.6.9	Nomenclature of the IS900 – <i>BstEII</i> RFLP types	37
3.6.10	Simpson's diversity index calculation	37
4.	Results	38
4.1	MOLECULAR DIAGNOSIS.....	38
4.1.1	Selection of the target sequences	38
4.1.1.1	Determination of different PCR primers specificity	38
4.1.1.2	Assessment of systems sensitivity	41
4.1.2	Map diagnostic PCR assays.....	43
4.1.2.1	IS900 nested PCR assay	43
4.1.2.2	F57 conventional PCR assay	44
4.2	DIRECT ZN STAINING OF FECES SAMPLES	45
4.3	DETECTION OF MAP BY CULTURE METHOD.....	46
4.3.1	Isolation of Map from feces samples.....	46
4.3.2	Isolation of Map from milk samples.....	46
4.3.3	Comparison of all applied tests for Map isolates identification	47
4.4	COMPARATIVE ANALYSIS OF DIAGNOSTIC METHODS WITH RESPECT TO ANIMALS SHEDDING STATUS	48
4.5	HERDS MONITORING.....	50
4.6	MOLECULAR CHARACTERIZATION OF ISOLATES	52
4.6.1	Molecular identification of isolates.....	52
4.6.2	DNA probe labeling	52
4.6.3	IS900 <i>BstEII</i> -RFLP	53
4.6.3.1	Clusters and profiles	53
4.6.3.2	Geographical distribution of the IS900 – <i>BstEII</i> RFLP types	57
4.6.3.3	Comparative analysis of the RFLP with various typing schemes applied in different laboratories	62
4.6.3.4	Hosts – Patterns relationship.....	63
5.	Discussion	65
5.1	CONCLUSION AND CLINICAL RELEVANCE	73
5.2	EPIDEMIOLOGICAL RELEVANCE.....	74
6.	Summary	75
7.	Zusammenfassung.....	77
8.	Reagents, Kits, buffers and equipments.....	79
8.1	REAGENTS AND KITS.....	79
8.2	BUFFERS.....	81
8.3	LABORATORY EQUIPMENTS AND TUBES.....	82
8.4	IS900 RFLP PATTERNS COMPUTER ASCERTAINMENT	83
9.	References	84
	Acknowledgment.....	96
