

Contents

1	Probabilities — 1
1.1	Probability Spaces — 1
1.1.1	Sample Spaces — 1
1.1.2	σ -Fields of Events — 2
1.1.3	Probability Measures — 5
1.2	Basic Properties of Probability Measures — 9
1.3	Discrete Probability Measures — 13
1.4	Special Discrete Probability Measures — 18
1.4.1	Dirac Measure — 18
1.4.2	Uniform Distribution on a Finite Set — 18
1.4.3	Binomial Distribution — 22
1.4.4	Multinomial Distribution — 24
1.4.5	Poisson Distribution — 27
1.4.6	Hypergeometric Distribution — 29
1.4.7	Geometric Distribution — 33
1.4.8	Negative Binomial Distribution — 35
1.5	Continuous Probability Measures — 39
1.6	Special Continuous Distributions — 43
1.6.1	Uniform Distribution on an Interval — 43
1.6.2	Normal Distribution — 46
1.6.3	Gamma Distribution — 48
1.6.4	Exponential Distribution — 51
1.6.5	Erlang Distribution — 52
1.6.6	Chi-Squared Distribution — 53
1.6.7	Beta Distribution — 54
1.6.8	Cauchy Distribution — 56
1.7	Distribution Function — 57
1.8	Multivariate Continuous Distributions — 64
1.8.1	Multivariate Density Functions — 64
1.8.2	Multivariate Uniform Distribution — 66
1.9	*Products of Probability Spaces — 71
1.9.1	Product σ -Fields and Measures — 71
1.9.2	Product Measures: Discrete Case — 74
1.9.3	Product Measures: Continuous Case — 76
1.10	Problems — 79
2	Conditional Probabilities and Independence — 86
2.1	Conditional Probabilities — 86
2.2	Independence of Events — 94
2.3	Problems — 101

3	Random Variables and Their Distribution — 105
3.1	Transformation of Random Values — 105
3.2	Probability Distribution of a Random Variable — 107
3.3	Special Distributed Random Variables — 117
3.4	Random Vectors — 119
3.5	Joint and Marginal Distributions — 120
3.5.1	Marginal Distributions: Discrete Case — 123
3.5.2	Marginal Distributions: Continuous Case — 128
3.6	Independence of Random Variables — 131
3.6.1	Independence of Discrete Random Variables — 134
3.6.2	Independence of Continuous Random Variables — 138
3.7	*Order Statistics — 141
3.8	Problems — 146
4	Operations on Random Variables — 149
4.1	Mappings of Random Variables — 149
4.2	Linear Transformations — 154
4.3	Coin Tossing versus Uniform Distribution — 157
4.3.1	Binary Fractions — 157
4.3.2	Binary Fractions of Random Numbers — 160
4.3.3	Random Numbers Generated by Coin Tossing — 162
4.4	Simulation of Random Variables — 164
4.5	Addition of Random Variables — 169
4.5.1	Sums of Discrete Random Variables — 171
4.5.2	Sums of Continuous Random Variables — 175
4.6	Sums of Certain Random Variables — 177
4.7	Products and Quotients of Random Variables — 189
4.7.1	Student's t -Distribution — 192
4.7.2	F -Distribution — 194
4.8	Problems — 196
5	Expected Value, Variance, and Covariance — 200
5.1	Expected Value — 200
5.1.1	Expected Value of Discrete Random Variables — 200
5.1.2	Expected Value of Certain Discrete Random Variables — 203
5.1.3	Expected Value of Continuous Random Variables — 208
5.1.4	Expected Value of Certain Continuous Random Variables — 211
5.1.5	Properties of the Expected Value — 215
5.2	Variance — 222
5.2.1	Higher Moments of Random Variables — 222
5.2.2	Variance of Random Variables — 226

5.2.3	Variance of Certain Random Variables —	229
5.3	Covariance and Correlation —	233
5.3.1	Covariance —	233
5.3.2	Correlation Coefficient —	240
5.4	Problems —	243
6	Normally Distributed Random Vectors —	248
6.1	Representation and Density —	248
6.2	Expected Value and Covariance Matrix —	256
6.3	Problems —	262
7	Limit Theorems —	264
7.1	Laws of Large Numbers —	264
7.1.1	Chebyshev's Inequality —	264
7.1.2	* Infinite Sequences of Independent Random Variables —	267
7.1.3	* Borel–Cantelli Lemma —	270
7.1.4	Weak Law of Large Numbers —	276
7.1.5	Strong Law of Large Numbers —	278
7.2	Central Limit Theorem —	283
7.3	Problems —	298
8	Mathematical Statistics —	301
8.1	Statistical Models —	301
8.1.1	Nonparametric Statistical Models —	301
8.1.2	Parametric Statistical Models —	305
8.2	Statistical Hypothesis Testing —	307
8.2.1	Hypotheses and Tests —	307
8.2.2	Power Function and Significance Tests —	310
8.3	Tests for Binomial Distributed Populations —	315
8.4	Tests for Normally Distributed Populations —	319
8.4.1	Fisher's Theorem —	320
8.4.2	Quantiles —	323
8.4.3	Z-Tests or Gauss Tests —	326
8.4.4	t -Tests —	328
8.4.5	χ^2 -Tests for the Variance —	330
8.4.6	Two-Sample Z-Tests —	332
8.4.7	Two-Sample t -Tests —	334
8.4.8	F -Tests —	336
8.5	Point Estimators —	337
8.5.1	Maximum Likelihood Estimation —	338
8.5.2	Unbiased Estimators —	346
8.5.3	Risk Function —	351

XIV — Contents

8.6	Confidence Regions and Intervals —	355
8.7	Problems —	362

A Appendix — 365

A.1	Notations —	365
A.2	Elements of Set Theory —	365
A.3	Combinatorics —	367
A.3.1	Binomial Coefficients —	367
A.3.2	Drawing Balls out of an Urn —	373
A.3.3	Multinomial Coefficients —	376
A.4	Vectors and Matrices —	379
A.5	Some Analytic Tools —	382

Bibliography — 389

Index — 391
