Preface	xv
Acknowledgments	xvi
Special Acknowledgment	xvii
Contributors	xviii
 Unit I: Neuro-Developmental Treatment Philosophy, Theoretical Assumptions, and Models Supporting Clinical Practice	
Introduction (by Judith C. Bierman)	3
1 Neuro-Developmental Treatment: Definitions and Philosophical Foundations	4
<i>Judith C. Bierman</i>	
1.1 Introduction	4
1.2 NDT Defined	4
1.3 Philosophical Tenets of NDT	4
1.3.1 Summary of Philosophical Tenets.....	5
1.4 Summary	11
2 Neuro-Developmental Treatment Practice Theory Assumptions and Principles: An Overview	17
<i>Judith C. Bierman</i>	
2.1 Organizing Problem	17
2.1.1 Solving for Clinical Practice	17
2.1.1 Shaping Clinical Practice through Hypothesis Generation, Theories, Assumptions, and Principles	17
2.2 NDT Practice Theory	18
2.2.1 How Do People Function?	18
2.2.2 What Goes Wrong?	23
2.2.3 How Can We Provide Effective Intervention? ...	24
2.3 Summary	25
3 Neuro-Developmental Treatment Practice and the ICF Model	27
<i>Judith C. Bierman</i>	
3.1 The ICF Model of Health and Disability.....	27
3.1.1 Social Function (Participation and Participation Restriction)	28
3.1.2 Individual Function (Activities and Activity Limitations).....	30
3.1.3 Body Function and Structures (Integrities and Impairments)	31
3.1.4 Contextual Factors	32
3.1.5 Interaction of Concepts.....	32
3.2 The ICF Model from an NDT Perspective	32
3.2.1 The Social and Individual Functioning Domains from an NDT Perspective.....	33
3.2.2 The Role of Body Structure and Function from an NDT Perspective	33
3.2.3 The Role of Contextual Factors from an NDT Perspective	35
3.2.4 The Role of NDT Practice	36
3.3 Summary	37
4 Application of a Posture and Movement Model in Practice	39
<i>Shirley A. Stockmeyer</i>	
4.1 Introduction	39
4.2 A Posture and Movement Model	39
4.2.1 General Concepts.....	39
4.2.2 Distinct Roles of Subsystems.....	39
4.2.3 The Anatomical Basis for the Posture and Movement Model.....	40
4.2.4 Physiological Basis for the Posture and Movement Model.....	45
4.3 Formulating Therapeutic Principles from Basic Information	47
4.3.1 Summary of Therapeutic Principles That Guide the Initial Intervention for Postural System Weakness.....	47

Contents

4.3.2	Summary of Therapeutic Principles for Progression of Strengthening in the Postural System	48	4.3.4	Summary of Therapeutic Principles for Progression of Strengthening in the Movement System	50
4.3.3	Summary of Therapeutic Principles That Guide the Initial Intervention for Weakness in the Movement System	49	4.3.5	Summary of Therapeutic Principles for Activities Requiring the Integration of the Posture and Movement Systems	51
			4.4	Summary	52
Unit II: Clinical Practice Using the Neuro-Developmental Treatment Practice Model					
Introduction (by Marcia Stamer)					
5 Neuro-Developmental Treatment Practice Model					
<i>Marcia Stamer</i>					
5.1	What Is a Practice Model?	56	5.4.1	The NDT Practice Model: Overview	58
5.2	The NDT Practice Model and Theories That Support It	57	5.4.2	The NDT Practice Model: Information Gathering ..	58
5.3	Current Descriptive Knowledge Used in NDT Practice	58	5.4.3	The NDT Practice Model: Examination	59
5.4	Procedural Knowledge Used in NDT Practice ..	58	5.4.4	The NDT Practice Model: Evaluation	61
			5.4.5	The NDT Practice Model: Intervention	66
			5.5	Summary	67
6 Information Gathering					
<i>Marcia Stamer</i>					
6.1	Information Gathering Using the NDT Practice Model	69	6.1.7	Knowledge and Experience Health Conditions ..	72
6.1.1	Building Trust	69	6.1.8	Knowledge of Life Span Skill Development	72
6.1.2	Establishing Communication	70	6.1.9	Knowledge of Family and Societal Influences ..	72
6.1.3	A Typical Day	70	6.1.10	Knowledge of Human Behavior	72
6.1.4	Knowledge of the NDT Philosophy	71	6.1.11	Knowledge of Learning Styles	72
6.1.5	Knowledge of Basic and Applied Sciences	72	6.1.12	Skilled Observation	72
6.1.6	Knowledge of a Model of Human Functioning ..	72	6.2	Summary	73
7 Examination					
<i>Marcia Stamer</i>					
7.1	Examination Using the Neuro-Developmental Treatment Practice Model	74	7.1.6	Identifying Other Multisystem Body Functions: The Interaction of System Integritys and Impairments within the Context of Participation and Activity—Two Examples	87
7.1.1	The Purpose of Examination	75	7.1.7	Examining Single-System Body Structures and Functions	90
7.1.2	The Roles of the Clinician and Client/Family in Examination	75	7.2	NDT Practice Model in Action	112
7.1.3	Examination: An Overview	75	7.3	Summary	112
7.1.4	How Does the NDT Clinician Examine Posture and Movement?	86			
7.1.5	Identifying Ineffective Postures and Movements ..	87			
8 Evaluation and Developing the Plan of Care					
<i>Marcia Stamer</i>					
8.1	Evaluation Using the Neuro-Developmental Treatment Practice Model	119	8.1.4	Developing the Plan of Care	132
8.1.1	Evaluation Requires a Framework	120	8.2	Mentoring Students' and Novice Clinicians' Problem-Solving Activities	139
8.1.2	What Do We Already Know about How Clinicians Evaluate and Treat?	120	8.3	Writing Outcomes for Clinical Practice and Statistical Analysis	145
8.1.3	A System for Evaluation Using the NDT Practice Model: The Problem-Solving Process	121	8.4	Summary	147

9	Neuro-Developmental Treatment Intervention—A Session View	150		
	<i>Judith C. Bierman, Mary Rose Franjoine, Cathy M. Hazzard, Janet M. Howle, Marcia Stamer, Jane Styer-Acevedo, and Jan McElroy</i>			
9.1	Intervention Using the Neuro-Developmental Treatment Practice Model	150	9.3.2	Pediatric Considerations for Progression of Limb Control
9.1.1	Components of an Intervention Session	150	9.3.3	Mitigating the Demands of Gravity
9.1.2	Bridges to the Next Intervention Session—Achievement or Failure to Achieve the Session Outcome	173	9.3.4	Ideas to Address the Variations of Weakness Impairments in Muscles
9.1.3	Additional Responsibilities in and between Intervention Sessions	173	9.3.5	Dimensions for Modulating and Varying the Level of Challenge
9.2	Summary	180	9.3.6	Changes to the Base of Support to Increase Challenge
9.3	A Collection of Intervention Strategies and Frameworks	180	9.3.7	Gaining Soft Tissue Length
9.3.1	Considerations for Progression of Limb Control in Adult Clients Post–Acquired Brain Injury	180	9.3.8	Concepts in Pediatric Core Stability
10	Cerebral Palsy	192		
	<i>Marcia Stamer</i>			
10.1	What Is Cerebral Palsy?	192	10.1.5	A General Description of Children with Dyskinetic Cerebral Palsy
10.1.1	Types and Timing of Pathologies That Can Cause Cerebral Palsy	193	10.1.6	A General Description of Children with Ataxic Cerebral Palsy
10.1.2	Classification of Cerebral Palsy by Body Distribution and Characteristics of Posture and Movement	194	10.1.7	Children with Mixed Types of Cerebral Palsy ...
10.1.3	Classification of Cerebral Palsy for the Clinician ..	195	10.1.8	Neuro-Developmental Treatment Practice and Classification of Cerebral Palsy
10.1.4	A General Description of Children with Spastic Cerebral Palsy	196	10.1.9	Cerebral Palsy across the Life Span
11	Neuro-Developmental Treatment Assumptions of Motor Dysfunction: Stroke and Adult-Onset Hemiplegia	219		
	<i>Cathy M. Hazzard and Karen Brunton</i>			
11.1	Introduction	219	11.2.1	Classification of Stroke
11.2	What Is Stroke?	219	11.3	Summary
Unit III: Theoretical Framework for Neuro-Developmental Treatment Practice				
Introduction (by Janet M. Howle)		247		
12	Motor Control	248		
	<i>Janet M. Howle</i>			
12.1	What Is Motor Control?	248	12.1.5	Developing Movement Competency
12.1.1	Changing Theories of Motor Control	248	12.1.6	Theory of Neuronal Group Selection
12.1.2	How Do These Theories Relate to Clinical Practice?	249	12.1.7	How Does the Idea of Individual Diversity Support NDT?
12.1.3	Models of Motor Control That Emphasize Dynamical Interplay between the Brain, Body, and Environment	250	12.1.8	Three Tenets of the Theory of Neuronal Group Selection
12.1.4	NDT Assumptions of Motor Control	250	12.1.9	Dynamic Systems Theory
12.2	Summary	261		
13	Motor Learning	263		
	<i>Janet M. Howle</i>			
13.1	What Is Motor Learning?	263	13.1.3	Planning an Effective Motor Learning Experience
13.1.1	Neuro-Developmental Treatment Assumptions in Motor Learning	264	13.1.4	How Do These Concepts of Motor Learning Impact NDT Practice?
13.1.2	Differentiating Motor Learning from Motor Performance	264	13.1.5	Practice in Motor Learning

Contents

13.1.6	Scheduling Practice	268	13.1.9	Importance of the Environment	271
13.1.7	Frequency and Intensity	269	13.2	Summary	273
13.1.8	Feedback.	270			
14	Motor Development	277			
	<i>Janet M. Howle</i>				
14.1	Motor Development as a Lifelong Process	277	14.3.2	Directionality	278
14.1.1	Changes in Thinking about Motor Development	278	14.3.3	What Supports the Progression of Motor Development?	281
14.2	NDT Assumptions in Motor Development	278	14.4	Summary	291
14.3	Contemporary Principles in Motor Development That Support NDT Practice	278			
14.3.1	Stages of Motor Development	278			
15	Neuroplasticity and Recovery	294			
	<i>Gay L. Girolami and Takako Shiratori</i>				
15.1	Introduction	294	15.4.2	Injuries to the Somatosensory System	297
15.2	How Is Plasticity Studied?	295	15.5	Applying Concepts of Neuroplasticity to Adults and Children	297
15.3	Plasticity: Adaptive and Developmental.	295	15.5.1	Concepts Applied to Adults.	297
15.3.1	Adaptive Plasticity	295	15.5.2	Concepts Applied to Infants and Children	300
15.3.2	Developmental Plasticity.	296	15.6	Final Thoughts: Recovery versus Compensation.	301
15.4	Neurophysiology of Brain Injuries in Infants	296	15.7	Conclusion	302
15.4.1	Injuries to the Developing Motor System—Corticospinal Projections.	296			
Unit IV: The Neuro-Developmental Treatment Team within the Practice Model: Interdisciplinary Care					
Introduction (by Cathy M. Hazzard)					
16	The Practice of Occupational Therapy from a Neuro-Developmental Treatment Perspective	308			
	<i>Kim Barthel, Chris Cayo, Kris Gellert, and Beth Tarduno</i>				
16.1	The Occupational Therapy Profession.	308	16.2.6	Examining, Evaluating, and Intervention with Attention and Higher Cognitive Skills.	318
16.2	Occupational Therapy and Neuro-Developmental Treatment	308	16.2.7	Examining, Evaluating, and Intervention with Emotional and Social Skills	320
16.2.1	Task Analysis.	310	16.2.8	Identifying Activities of Daily Living and Their Limitations	321
16.2.2	Examining, Evaluating, and Intervention of Sensory Processing for Function	312	16.2.9	Focusing on Play, Work, and Leisure.	322
16.2.3	The Sensory Systems and Oral Skills.	316	16.3	Conclusion	323
16.2.4	Examining, Evaluating, and Intervention with Multisystem Praxis	317			
16.2.5	Examining, Evaluating, and Intervention with Physiological Arousal	317			
17	The Practice of Physical Therapy from a Neuro-Developmental Treatment Perspective	325			
	<i>Cathy M. Hazzard and Marcia Stamer</i>				
17.1	Definition of Physical Therapy (Physiotherapy)	325	17.3	Expertise and Contributions of Physical Therapists to NDT Practice	326
17.2	A Brief History of Physical Therapy and the Origins of Neuro-Developmental Treatment	325	17.4	The Contributions of NDT to Physical Therapy.	326
			17.4.1	Problem-Solving of the Physical Therapist Using the NDT Practice Model: A Child with Cerebral Palsy	327

17.4.2	Problem-Solving of the Physical Therapist Using the NDT Practice Model: An Adult Poststroke . .	328	17.5.2	Selected Mobility and Access Activities	335
17.4.3	Exercise and Practice	329	17.6	Using Physical Therapy Modalities and Equipment with NDT	341
17.4.4	Hands-On Intervention	332	17.7	Summary	341
17.5	Functional Outcomes in Physical Therapy . .	334			
17.5.1	Mobility and Access to Multiple Environments .	334			
18	The Practice of Speech-Language Pathology from a Neuro-Developmental Treatment Perspective	343			
	<i>Rona Alexander</i>				
18.1	Historical Perspectives on Speech-Language Pathology within NDT	343	18.1.2	Speech/Sound Production	346
18.1.1	Feeding and Swallowing	345	18.1.3	Language, Cognition, and Communication . . .	348
			18.2	Summary	351
Unit V: Case Reports					
Introduction (by Mary Rose Franjoine) 355					
Section A Adult Onset Case Reports 360					
Case Report A1 The Application of Posture and Movement Analysis to Accurately Evaluate, Plan Intervention, and Achieve Functional Outcomes for an Individual Poststroke 360					
<i>Marie Simeo</i>					
A1.1	Introduction	360	A1.2.5	Examination and Evaluation	361
A1.2	Case Description	361	A1.2.6	Intervention	367
A1.2.1	Health Condition/Diagnosis	361	A1.2.7	Outcomes	371
A1.2.2	Course of Care	361	A1.3	Discussion	371
A1.2.3	Social History	361	A1.4	Alternate Reflection	372
A1.2.4	Personal Goal	361			
Case Report A2 Intervention to Promote the Functional Recovery of the More Involved Side with the Goal of Return to Work 374					
<i>Karen Guha and Sherry Rock</i>					
A2.1	Introduction	374	A2.2.3	Outcomes	387
A2.2	Case Description	375	A2.3	Discussion	387
A2.2.1	Examination and Evaluation	376	A2.4	Acknowledgment	388
A2.2.2	Intervention	383	A2.5	Alternate Reflection	388
Case Report A3 Identifying and Addressing the Impairments in an Individual Who Demonstrates Contraversive Pushing Behavior 390					
<i>Cathy M. Hazzard</i>					
A3.1	Introduction	390	A3.2.4	Outcomes	397
A3.2	Case Description	391	A3.2.5	Addendum on Further Gains after May 2010 . .	397
A3.2.1	Personal Goals	391	A3.3	Discussion	397
A3.2.2	Examination and Evaluation	391	A3.4	Alternate Reflection	397
A3.2.3	Intervention	394			

Case Report A4 Addressing the Primary and Secondary Impairments of a 20-Year-Old Man with Traumatic Brain Injury		400
<i>Teresa Siebold</i>		
A4.1 Introduction	400	
A4.2 The Clinical Relationship between the Musculoskeletal System and the Nervous System	400	
A4.3 Case Description	400	
A4.3.1 Examination	400	
A4.3.2 Evaluation and Plan of Care	404	
A4.3.3 Intervention	404	
A4.3.4 Outcomes	407	
A4.4 Discussion	408	
A4.5 Summary	409	
A4.6 Alternate Reflection	410	
Case Report A5 Examination, Evaluation, and Intervention with an Individual Poststroke with Cognitive Impairments		412
<i>Katy Kerris</i>		
A5.1 Introduction	412	
A5.2 Case Description	412	
A5.2.1 Course of Care	412	
A5.2.2 Social History	412	
A5.2.3 Personal Goal	413	
A5.2.4 Examination and Evaluation	413	
A5.2.5 Social, Environmental, and Contextual Factors ..	413	
A5.2.6 Participation/Participation Restrictions	413	
A5.2.7 Activity/Activity Limitations	413	
A5.2.8 Standardized Test Measures of Body Structure and Function	414	
A5.2.9 Posture and Movement Observations	414	
A5.2.10 Body System Impairments	415	
A5.2.11 Evaluation Summary	415	
A5.2.12 Establishing Functional Outcomes	416	
A5.2.13 Intervention	416	
A5.2.14 Outcomes	417	
A5.3 Discussion	418	
A5.4 Alternate Reflection	418	
Case Report A6 Achieving Functional Outcomes with Neuro-Developmental Treatment for Chronic Stroke		420
<i>Monica Diamond</i>		
A6.1 Introduction	420	
A6.1.1 Rehabilitation for Chronic Stroke	420	
A6.1.2 Increased Acceptance for Case Study Research ..	420	
A6.1.3 Need for and Adequacy of Functional Outcome Measures	420	
A6.1.4 Decision-Making-Process Research	421	
A6.1.5 Purpose	421	
A6.2 Information Gathering	421	
A6.2.1 Client	421	
A6.2.2 History	421	
A6.3 Examination	422	
A6.3.1 Activity and Activity Limitations	422	
A6.4 Evaluation	423	
A6.5 Intervention: Goals, Outcomes, Intervention Planning, Implementation, and Progress Over Time	426	
A6.5.1 Overview of Intervention	426	
A6.6 Summary	433	
A6.7 Alternative Reflection	433	
A6.8 Alternative Reflection	433	
Section B Pediatric Onset Case Reports		435
Case Report B1 Multidisciplinary Examination and Intervention Planning for Identical Twin Infants with Extreme Prematurity		435
<i>Gay L. Girolami, Diane Fritts Ryan, and Judy M. Gardner</i>		
B1.1 Background and Purpose	435	
B1.2 Case Description	435	
B1.2.1 Medical History	435	
B1.2.2 Initial Examination	435	
B1.2.3 Case Report Examination	435	
B1.3 Application of NDT and the ICF Model to Examination and Intervention Planning	436	
B1.3.1 Phase One: Observations	436	
B1.3.2 Phase Two: Body Structure and Function Considerations	437	
B1.3.3 Phase Three: Identify Functional Activities	438	
B1.3.4 Phase Four: Developing a Plan of Care	444	
B1.3.5 Phase Five: Home Programs	444	
B1.3.6 Phase Six: Reevaluating Progress	446	
B1.4 Conclusion	448	

Case Report B2 Examination and Evaluation of Oral Feeding and Communication after a Gunshot Injury to the Head 450

Marybeth Trapani-Hanasewych

B2.1 Introduction 450

B2.2 Case Description 450

B2.2.1 Accident and Acute Care History 450

B2.2.2 Inpatient Rehabilitation Admission 451

B2.3 Discussion of NDT 454

B2.4 Outcome Measurement Tool 455

Case Report B3 Development of an Intervention Plan of Care for a Young Child with Hemiplegia 457

Pamela A. Mullens

B3.1 Introduction 457

B3.2 Common Features of Congenital Hemiparesis 457

B3.3 Case Report 458

B3.3.1 Case Description 458

B3.3.2 Information Gathering 458

B3.3.3 Examination: Observations and Initial Hypothesizing 458

B3.3.4 Evaluation 461

B3.3.5 Relationship of Body System Impairments to Activity Limitations 462

B3.3.6 Intervention 463

B3.3.7 Summary of Intervention and Discussion 468

Case Report B4 Achieving Sitting with Hands Free for Play in a 23-Month-Old Girl with Hypertonic Cerebral Palsy 470

Marjorie Prim Haynes

B4.1 Introduction 470

B4.2 Case Description 471

B4.2.1 Patient History—Information Gathering 471

B4.2.2 Makayla's Diagnosis 472

B4.2.3 Data Collection during Examination: Current Level of Function 472

B4.2.4 Evaluation Process 474

B4.2.5 Intervention 475

B4.2.6 Intervention Sessions 475

B4.2.7 Preparing for the Future 478

B4.2.8 Results 478

B4.2.9 Discussion 478

Case Report B5 Enhancing Functional Independence in a 10-Year-Old Boy with Cerebral Palsy, Spastic Quadriparesis 481

Colleen Carey

B5.1 Introduction 481

B5.2 Data Collection and Examination 481

B5.3 Examination of Functional Movement Skills .. 481

B5.4 Neuromuscular Control 481

B5.4.1 Strength/Range of Motion 482

B5.4.2 Sensory Awareness and Processing 482

B5.4.3 Activities of Daily Living 482

B5.4.4 Movement Skills 482

B5.4.5 Participation 483

B5.5 Evaluation 484

B5.6 Plan of Care 484

B5.7 Outcomes 485

B5.8 Discussion 486

Case Report B6 Clinical Management of a Feeding Disorder in a Child with a Complex Medical Diagnosis 488

Gay Lloyd Pinder

B6.1 Introduction 488

B6.2 Early Feeding Skill Development in the Presence of Medical Interventions 488

B6.3 Jagraj's Birth and Medical Needs 488

B6.4 Jagraj's Development 489

B6.5 A Summary of Jagraj's Health and Disability According to the International Classification of Functioning, Disability and Health Model .. 490

B6.6 Intervention 491

B6.6.1 Initial Examination at Age 5 Months 491

B6.6.2 Home- and Center-Based Intervention: Age 5 to 19 Months 491

B6.6.3 Current Status 492

B6.7 Results and Discussion 493

B6.8 Conclusion 495

xi

Case Report B7 Developing Independent Downhill Skiing for a Child with Ataxic Cerebral Palsy				496	
<i>Karen Goldberg and Ruth DeMuth</i>					
B7.1	Introduction	496	B7.5.3	Social/Emotional Skills	497
B7.2	Literature Pertaining to Sports with Children with Cerebral Palsy	496	B7.5.4	Postures, Movements, and Functional Limitations—Gross Motor	497
B7.3	Professional Ski Instructors of America	496	B7.5.5	Body Function and Structure	498
B7.4	The Adaptive Skiing Experience	497	B7.5.6	Assessment	498
B7.5	Patty Grace’s Therapy Assessment	497	B7.5.7	Historical Information	498
B7.5.1	Gross Motor Functional Activities, Participation—Social Functional Domain	497	B7.6	Skiing Assessment and Instruction	498
B7.5.2	Communication Skills	497	B7.7	Patty Grace Learns to Ski	499
			B7.8	Conclusion	500
Case Report B8 Providing Ongoing Neuro-Developmental Treatment–Based Physical Therapy Intervention for a Medically Fragile Child with Severe Disabilities				502	
<i>Judith C. Bierman</i>					
B8.1	Introduction	502	B8.4.1	Medical Diagnoses	504
B8.2	Review of the Literature	502	B8.4.2	Examination	504
B8.2.1	Who Is the Child with CP Who Is Severely Involved?	503	B8.4.3	Evaluation Summary	508
			B8.4.4	Intervention	509
B8.3	The Family with a Child with Severe Developmental Disabilities	503	B8.5	Results and Discussion	517
B8.4	Case Description	504	B8.6	Conclusions	517
Case Report B9 Examining Neuro-Developmental Treatment with Increased Intensity for a Child with Spastic Quadriplegic Cerebral Palsy and Dystonia				520	
<i>Debbie Evans-Rogers and Kim Westhoff</i>					
B9.1	Introduction	520	B9.3.12	Other Changes	528
B9.2	Research on Neuro-Developmental Treatment with Increased Intensity	520	B9.4	Discussion	528
B9.3	Case Description	520	B9.5	Clinical Implications and Conclusions	529
B9.3.1	Relevant Medical History	521	B9.6	Acknowledgment	530
B9.3.2	Participation	522	B9.7	Instrumentation Using the GAS and COPM ..	530
B9.3.3	Participation Restrictions	523	B9.8	Preintervention GAS Goals for Physical Therapy, Occupational Therapy, and Speech Therapy (with full scaling)	530
B9.3.4	Activity and Activity Limitations	523	B9.8.1	Physical Therapy Goal with Specified Level of Attainment on GAS: –2, –1, 0, +1, +2	530
B9.3.5	Body Structure and Function	523	B9.8.2	Occupational Therapy Goals with Specified Level of Attainment on GAS: –2, –1, 0, +1, +2 ..	530
B9.3.6	Equipment	525	B9.8.3	Speech Therapy Goals with Specified Level of Attainment on GAS: –2, –1, 0, +1, +2	531
B9.3.7	Contextual Factors: Environmental and Personal (Facilitators/Barriers)	525	B9.8.4	Summary of GAS Goals for Sam	531
B9.3.8	Instrumentation/Outcome Measures	525	B9.9	Colored Charts	531
B9.3.9	Intervention	526			
B9.3.10	Results	526			
B9.3.11	Preintervention Goals for Physical, Occupational, and Speech Therapy	526			
Glossary				535	
Index				543
