Abstract	v
Kurzfassung	vii
1 Introduction	1
1.1 Background	1
1.1.1 Pattern Recognition with Deep Neural Networks .	1
1.1.2 Pulses and Spiking Neural Networks	2
1.1.3 Link to Previous Work	3
1.2 Motivation	3
1.3 Contributions	4
1.4 Overview	4
1.5 Preliminaries	5
1.5.1 Notation	5
1.5.2 Factor Graphs	6
1.5.3 State-Space Models	6
 I Pulse-Domain Signal Analysis: Principle and First Examples	 7
2 Hierarchical Filtering	9
2.1 Introduction	9
2.2 Format of the Intermediate Signals	9
2.2.1 Different Possibilities	9
2.2.2 A Pragmatic Argument	10
2.2.3 Working with Pulses	11
2.3 Inner-Product Filters and Score Signal	12
2.3.1 Definition	12

2.3.2	A Simple Example	14
2.3.3	Pulses and Filters Work Well Together	15
2.4	Recursive Computation of the Score Signal	16
2.4.1	Update Equations	16
2.4.2	Input Estimation	16
2.4.3	Guard Interval	17
2.5	Conclusion	18
3	Detecting Precise Temporal Patterns	19
3.1	Monomial Pulse Patterns	19
3.1.1	Definitions	19
3.1.2	Relationship to Latency Codes	20
3.1.3	Beyond Monomials	20
3.2	Design of Filters	20
3.2.1	Sinusoidal Model	20
3.2.2	Exponential Model	23
3.2.3	Neuron Model	24
3.3	Properties of the Filters	33
3.3.1	Robustness	33
3.3.2	Redundancy	33
3.4	Conclusion	35
4	First Example - Morse Code with Sinusoidal Model	37
4.1	Background	37
4.1.1	Introduction	37
4.1.2	About the Morse Code	38
4.1.3	Training and Test Datasets	38
4.2	Description of the Network	39
4.2.1	First Layer	39
4.2.2	Higher Layers	40
4.2.3	Remarks	41
4.3	Conclusion and Outlook	46
5	Second Example - Morse Code with Neuron Model	47
5.1	Introduction	47
5.2	Building Block	48
5.2.1	General Description	48
5.2.2	Parameters Adapted to Morse Code Example	49
5.3	Building Simple Features	49
5.3.1	Counter - Dah	50

5.3.2	Pauses	52
5.3.3	Dit	53
5.3.4	Letter A	53
5.4	Complete Network	53
5.5	Conclusion	54

II Learning Algorithms 57

6 Supervised Learning with Sinusoidal Model 59

6.1	Introduction	59
6.2	Data and Goal	60
6.2.1	Recordings	60
6.2.2	Architecture	62
6.3	Implementation of the Learning Algorithm	64
6.3.1	Cost Function	65
6.3.2	Equations	65
6.3.3	Pseudo-Code of the Algorithm	67
6.3.4	Some Implementation Details	68
6.4	Results	69
6.4.1	Accuracy	69
6.4.2	An Example of Learned Feature	69
6.4.3	Conclusion and Outlook	71

7 Supervised Learning with Neuron Model 73

7.1	Introduction	73
7.2	Architecture	73
7.3	Implementation of the Learning Algorithm	75
7.3.1	Cost Function	75
7.3.2	Equations	75
7.3.3	Pseudo-Code	77
7.3.4	Implementation Details	78
7.4	Results	79
7.4.1	Accuracy	79
7.4.2	Going Deeper	79
7.5	Relationship to Other Learning Algorithms in the Literature	80
7.5.1	SpikeProp	80
7.5.2	Tempotron	81
7.5.3	Chronotron	81

7.5.4	Another Framework for Spatio-Temporal Spike Pattern Recognition	81
7.5.5	Conclusion	81
8	Unsupervised Learning	83
8.1	Introduction	83
8.2	Sinusoidal Model	83
8.2.1	Setup	83
8.2.2	Derivation of EM-Update Rules	84
8.3	Neuron Model	87
8.3.1	Learning $\mathbf{C}$	88
8.3.2	Learning λ	88
8.4	Conclusion	90
III	Beyond Feedforward Networks	91
9	Introducing Loops	93
9.1	Introduction	93
9.2	First Examples	93
9.2.1	Neuron Model	94
9.2.2	Sinusoidal Model	96
9.3	Potential Computational Power for Large Networks	97
9.3.1	Notation	97
9.3.2	Sharing Neurons	97
9.3.3	Increasing the Number of Neurons	98
10	Conclusion	101
A	A State-Space Model of a Neuron	103
A.1	A Model with Dendrites	103
A.2	LIF with Exponential Input Currents	107
B	Proofs for Chapter 3	109
B.1	Sinusoidal Model	109
B.1.1	Version I	112
B.1.2	Version II	112
B.2	Exponential Model	113
B.3	Neuron Model	115
B.3.1	Version I	116
B.3.2	Version II	117

B.3.3	Version III	117
C	Networks for Parsing Morse Code	119
C.1	About Morse Code	119
C.1.1	International Morse Code	119
C.1.2	Speed of Transmission and Dit Length	119
C.2	Datasets	121
C.2.1	Training Set	121
C.2.2	Test Set	121
C.3	Sinusoidal Model	122
C.3.1	Layer 2	122
C.3.2	Layer 3	123
C.3.3	Layer 4	125
C.4	Neuron Model	125
D	Learning Algorithms	129
D.1	Melodies	129
D.2	Architecture for Learning: Fixed Parameters	129
D.2.1	First Layer	129
D.2.2	Second Layer	132
D.2.3	Third Layer	132
D.3	Derivation of the Update Equations - Sinusoidal Model . .	133
D.3.1	Highest Layer	133
D.3.2	Computation of Endpoints for Intermediate Layers	135
D.4	Derivation of the Update Equations - Neuron Model . . .	136
D.4.1	Update of λ	136
D.4.2	Computation of Endpoints for Intermediate Layers	138
	Bibliography	141
	About the Author	147
