1	Introduction	1
2	Physics and Characterization of Solar Cells	7
2.1	Semiconductor and Solar Cell Basics	7
2.1.1	Intrinsic and Extrinsic Semiconductors	8
2.1.2	Charge Carrier Transport	11
2.1.2.1	The Continuity Equation	11
2.1.2.2	The Drift-Diffusion Approximation	11
2.1.3	Charge Carrier Generation and Recombination	13
2.2	Electrical Characterization and Calibration of Solar Cells	14
2.2.1	Solar Cell Calibration	15
2.2.2	Highly Accurate I_{SC} Measurement	16
2.2.2.1	Broadband Approach and Spectral Mismatch	16
2.2.2.2	Differential Spectral Responsivity Method	17
3	Ultrashort Laser Pulses & Nonlinear Optics	23
3.1	Basic Principles	23
3.2	Nonlinear Optics	25
3.2.1	From Linear to Nonlinear Optics	26
3.2.2	Survey on Nonlinear Optical Effects	29
3.2.2.1	Second Order Processes	29
3.2.2.2	Nonlinear Refractive Index	32
3.2.2.3	Multi-Photon Absorption	33
3.2.3	Nonlinear Wave Equation	33
3.2.4	Coupled Amplitude Equations and Phase-Matching	34
3.2.5	Supercontinuum Generation	36
4	Interaction of Ultrashort Laser Pulses and Solar Cells	41
4.1	Introduction	42

4.2	Modelling of Solar Cell Response Under Pulsed Irradiation	44
4.2.1	J_{SC} in Terms of Excess Carrier Density	44
4.2.2	Coupled Differential Equations for Radiation-Semiconductor Interaction	45
4.2.3	Reduction of the Set of Differential Equations . . .	47
4.2.4	Quasi-Steady-State Approximation	51
4.2.5	Final Modeling Equations	55
4.3	Experimental Study of TPA Impact on J_{SC}	56
4.3.1	Linear Versus Nonlinear Carrier Generation	56
4.3.2	Experimental Setup	57
4.3.2.1	Laser Source	57
4.3.2.2	Double-Ring-Resonator Setup	58
4.3.3	Experimental Results	62
4.4	Simulation of TPA Impact on J_{SC}	63
4.4.1	Validation of Simulation Approach	63
4.4.2	Pulsed Versus Continuous Illumination	66
4.5	Conclusions	67
5	Temporal Shaping of Ultrashort Laser Pulses	71
5.1	Strategies for Temporal Shaping	71
5.1.1	A Brief Overview on Temporal Shaping Approaches	72
5.1.2	Temporal Shaping Strategy in This Work	73
5.2	Impulse Response of Step-Index Multimode Optical Fibers	75
5.2.1	Introduction to Step-Index Fiber Optics	75
5.2.2	Mode Coupling in Optical Fibers	78
5.2.3	Gloge's Time-Dependent Power Flow Equation . .	79
5.2.4	Numerical Solution to the Power Flow Equation .	81
5.3	Characterization of Multimode Fibers	85
5.3.1	EFPIR-Method	85
5.3.1.1	General Program Flow	85
5.3.1.2	Downhill Simplex Method	86
5.3.1.3	Parametrization of Attenuation and Diffusion	89
5.3.2	Validation of EFPIR-Method	89
5.4	Further Effects on Laser Pulses by Multimode Optical Fibers	94

5.4.1	Effects on Spatial Intensity Distribution	94
5.4.2	Effects on Polarization and Coherence	96
5.5	Fiber Concept for Conditioning of Ultrashort Pulses . . .	100
5.5.1	General Concept	102
5.5.2	Design Principles	103
6	DSR-Setup Based on Ultrashort Laser Pulses	107
6.1	Introduction to DSR-Measurements	108
6.2	Setup Description and Characterization	109
6.2.1	Radiation Sources	111
6.2.2	Modes of Operation	113
6.2.3	Spectral Shaping of Ultrashort Laser Pulses	114
6.2.4	Spatio-Temporal Shaping of Laser Pulses	120
6.2.5	Peripheral Equipment	125
6.3	Optical Efficiency and Loss Analysis	126
6.4	Measurement Uncertainty Analysis	128
6.4.1	Optical Measurement Uncertainties	129
6.4.1.1	Spectral Uncertainties	129
6.4.1.2	Spatial Non-Uniformity	133
6.4.1.3	Longitudinal Test Object Position	136
6.4.2	Further Measurement Uncertainties	137
6.4.3	Combined Measurement Uncertainty	139
6.4.4	Uncertainty in Short Circuit Current	146
6.5	Conclusions & Comparison	148
6.5.1	General Presentation of the New Setup	148
6.5.2	Measurement Uncertainty of the New Setup	149
6.5.3	Comparison to State-Of-The-Art Facilities	150
7	Supercontinuum Radiation for Solar Cell	
	Characterization	155
7.1	Introduction	156
7.2	Differential Supercontinuum Measurement Approach . . .	157
7.2.1	Generation of Supercontinuum Radiation	158
7.2.2	Spectral Shaping of Supercontinuum Radiation . .	159
7.2.3	Prospects for Tackling the Lack of UV Radiation .	161

7.3	Spectral Performance of Shaped Supercontinuum	162
7.3.1	Spectral Mismatch and Uncertainty	162
7.3.2	Capabilities of Shaped Supercontinuum	164
7.3.3	Full Spectrum Analysis	167
7.4	Short Circuit Current Measurements	170
7.5	Conclusions	171
8	EQE-Measurement of CPV Modules	173
8.1	Challenges and State-Of-The-Art	174
8.2	Experimental Approach	176
8.2.1	Spectral, Spatial and Angular Requirements	176
8.2.2	Setup Description	178
8.3	Validation of Measurement Approach	183
8.3.1	Device Under Test: CPV Mono Module	183
8.3.2	Measurement Results	184
9	Summary & Outlook	187
	Deutsche Zusammenfassung und Ausblick	197
A	Anharmonic Oscillator Solution	209
B	Nonlinear Schrödinger Equation	213
C	On the Negligence of Light Trapping	217
D	Green's Function Approach for Solving the Continuity Equation	221
E	Monte Carlo Method for Measurement Uncertainty	225
