

Contents

1	Introduction	1
1.1	Motivation and Background	1
1.2	Power-density Enhancement in Mixed-flow Pumps	3
1.3	Introduction to the main Terminology and Definitions	4
1.4	Discussion on the Axial-flow Counter-Rotating Layout	7
2	Current State of Research	11
2.1	Power Density and Operating Range Limitations	11
2.1.1	Suction Recirculation	12
2.1.2	Cavitation Inception and Suction Performance	16
2.1.3	Secondary Flows in Mixed-Flow Pump Impellers	23
2.2	Counter-Rotating Turbomachinery	24
2.3	Inverse Design Methodology for Turbomachinery blades	27
3	Design Method	29
3.1	Introduction to the Design Method	30
3.1.1	Impeller mean-line design	30
3.1.2	Inverse-Design Methodology	34
3.1.3	Blade Multi-streamline Design	36
3.2	Design Tool Characteristics and Features	36
3.2.1	Blade Design Process	37
3.2.2	Impeller Hydraulic and Friction Loss Prediction Model	43
3.2.3	Slip-Factor Prediction Model	44
3.3	Reference Conventional Impeller Design	45
3.4	Counter-Rotating Designs	47
3.4.1	V1, First CR-pump design	49
3.4.2	V2, Equal Load Distribution Prototype	54
3.4.3	V3, Improved Power-density	56
3.4.4	V4, NPSH-optimized Prototype	59
3.4.5	V5, Equal speed CR-pump	61
3.4.6	Overview: Main design dimensions of the developed CR-impellers	63
4	Experimental Method	64
4.1	Counter-rotating Pumps Test rig	64
4.2	Measurement Instrumentation	67
4.3	Measurement Uncertainty Analysis	68
4.4	CR-Pump Mechanical Loss Measurements	75
4.5	Characteristic measurements	79
4.6	Cavitation Characterization of the Counter-Rotating Pump	82

4.7	Three-Hole Probe Total pressure and Velocity Measurements	87
4.8	Impeller Rapid-prototyping Techniques	92
5	Numerical Method	95
5.1	Introduction to the Numerical Methods	95
5.2	Simulations Setup	100
5.3	Cavitation Inception Predictions	104
5.4	Blade In- and Outflow Uniformity	107
5.5	Volute Re-design Numerical Comparison	108
6	Result and Discussion	110
6.1	First Counter-rotating Mixed-flow pump design V1	111
6.2	V2: Re-design Front Rotor for Equal Load Distribution	124
6.3	V3: Highest Power-density	127
6.4	V4: Reduced Cavitation Inception at RR	131
6.5	V5: Optimized Cavitation Performance on both Rotors	134
6.6	Comparison of the prototypes	136
6.7	Worthiness evaluation of Counter-Rotating pumps	137
6.8	Counter-rotating mixed-flow pump Design Guidelines	139
7	Summary	141
8	Conclusions	143
