1	Introduction to Ionic-Liquid-Based Aqueous Biphasic Systems (ABS)	1
	Mara G. Freire	
2	ABS Composed of Ionic Liquids and Inorganic Salts	27
	José N. Canongia Lopes	
3	ABS Constituted by Ionic Liquids and Carbohydrates	37
	André M. da Costa Lopes and Rafał Bogel-Lukasik	
4	ABS Composed of Ionic Liquids and Polymers	61
	Rahmat Sadeghi	
5	Extraction of Amino Acids with ABS	89
	Mohammed Taghi Zafarani-Moattar and Sholeh Hamzehzadeh	
6	Extraction of Proteins with ABS	123
	Rupali K. Desai, Mathieu Streefland, Rene H. Wijffels, and Michel H.M. Eppink	
7	Extraction of Alcohols, Phenols, and Aromatic Compounds with ABS	135
	María J. Trujillo-Rodríguez, Verónica Pino, and Juan H. Ayala	
8	Extraction of Natural Phenolic Compounds with ABS	161
	Milen G. Bogdanov and Ivan Svinyarov	
9	Extraction of Metals with ABS	183
	Isabelle Billard	

10	Surfactant Self-Assembly Within Ionic-Liquid-Based Aqueous Systems	221
	Kamalakanta Behera, Rewa Rai, Shruti Trivedi, and Siddharth Pandey	
11	On the Hunt for More Benign and Biocompatible ABS	247
	Jorge F.B. Pereira, Rudolf Deutschmann, and Robin D. Rogers	
12	Toward the Recovery and Reuse of the ABS Phase-Forming Components	285
	Sónia P.M. Ventura and João A.P. Coutinho
