

Contents

Part I The Role of Radioactivities in Astrophysics

1 Introduction to Astronomy with Radioactivity	3
R. Diehl	
1.1 The Origin of Radioactivity	3
1.2 The Processes of Radioactivity	9
1.3 Radioactivity and Cosmic Nucleosynthesis	13
1.4 Observations of Cosmic Radioactive Isotopes	17
1.5 The Structure of this Book	21
References	22
2 The Role of Radioactive Isotopes in Astrophysics	25
D.D. Clayton	
2.1 History of Nucleosynthesis and Radioactivity	25
2.2 Disciplines of Astronomy with Radioactivity	38
References	77

Part II Specific Sources of Cosmic Isotopes

3 Radioactivities in Low- and Intermediate-Mass Stars	83
M. Lugaro and A. Chieffi	
3.1 The Missing Element	84
3.2 The Production of Radioactive Nuclei in Stellar Interiors	84
3.3 Evolution To and Through the First Giant Branch	93
3.4 Evolution in the Double Shell Burning Phase	103
3.5 Neutron-Capture Nucleosynthesis in AGB Stars	116
3.6 Nucleosynthesis of Long-lived Isotopes in AGB Stars	132
References	144

4	Massive Stars and Their Supernovae	153
	F.-K. Thielemann, R. Hirschi, M. Liebendörfer, and R. Diehl	
4.1	Cosmic Significance of Massive Stars	153
4.2	Hydrostatic and Explosive Burning in Massive Stars	155
4.3	Evolution of Massive Stars up to Core Collapse	163
4.4	Supernovae from Massive Stars and the Role of Radioactivity	180
4.5	The Aftermath of Explosions	202
	References	219
5	Binary Systems and Their Nuclear Explosions	233
	J. Isern, M. Hernanz, and J. José	
5.1	Accretion onto Compact Objects and Thermonuclear Runaways ..	233
5.2	Classical Novae	244
5.3	SN Ia Explosions	252
5.4	X-Ray Bursts and Superbursts	262
5.5	Observational Diagnostics of Binary-Systems	272
5.6	Accretion in Binaries: Special Cases	289
	References	291

Part III Special Places to Observe Cosmic Isotopes

6	The Early Solar System	309
	M. Busso	
6.1	The Age of the Solar System	309
6.2	Short-Lived Radioactive Nuclei in the Early Solar System	313
6.3	Expected Conditions in the Early Solar System	318
6.4	The Galactic Inheritance	323
6.5	Local Production of Radioactive Nuclei	325
6.6	Short-Lived Nuclei: In-Situ Production	331
6.7	Early Solar System Lessons	334
	References	336
7	Distributed Radioactivities	345
	R. Diehl, D.H. Hartmann, and N. Prantzos	
7.1	The Role of Radioactivities	345
7.2	The Milky Way	348
7.3	Processes in the Interstellar Medium: Mixing and Feedback	358
7.4	^{26}Al in the Interstellar Medium	369
7.5	^{60}Fe and Massive-Star Structure	386
7.6	^{44}Ti and Galactic Core-Collapse Supernovae	389
7.7	Positrons and their Annihilation	391

7.8 Radioactivities in Cosmic Rays 408

7.9 Cosmic Star Formation and Supernova Rates..... 418

References 423

Part IV Tools for the Study of Radioactivities in Astrophysics

8 Computer-Modeling of Stars 439
M. Liebendörfer
8.1 Models of Core-Collapse Supernovae 443
8.2 Models of Ejecta for Nucleosynthetic Yield Prediction..... 453
References 456

9 Nuclear Reactions 461
M. Wiescher and T. Rauscher
9.1 Nuclear Reactions in Astrophysical Environments 461
9.2 Relevant Energy Range of Astrophysical Cross Sections 468
9.3 Nuclear Reaction Models 469
9.4 Experimental Facilities and Techniques 474
9.5 Specific Experiments 482
References 486

10 Instruments for Observations of Radioactivities 491
G. Kanbach and L. Nittler
10.1 Astronomical Telescopes 491
10.2 Analyzing Material Samples From and Within Meteorites 499
10.3 Detection and Analysis of Cosmic Rays 507
References 510

Part V Epilogue

11 Perspectives 519
R. Diehl, D.H. Hartmann, and N. Prantzos

Appendices

A Annotations on Chemical Evolution 525
A.1 Chemical Evolution: Analytical Descriptions..... 525
A.2 Complexities in Descriptions of Chemical Evolution 529
References 536

B Radionuclides and Their Stellar Origins 539
M. Lugaro and A. Chieffi
References 546

C Milestones in the Science of Cosmic Radioactivities 549

D Glossary: Key Terms in Astronomy with Radioactivities 553

Index 559
