Introduction	13	4. Detection of Prostate Cancer by TRUS	65
The Urological Approach to Detection of Prostate Cancer	13	4.1 Detection by TRUS	66
The Multiparametric and Interdisciplinary Approach	13	4.1.1 B mode TRUS	66
		4.1.2 Realtime Elastography (RTE)	67
		4.1.3 Doppler TRUS (D TRUS)	67
		4.1.4 Contrast Enhanced TRUS (CE TRUS)	67
		4.2 Structured mpTRUS Report	69
		4.2.1 General Aspects	69
		4.2.2 Risk Stratification – Outer Gland	70
		4.2.3 Risk Stratification – Inner Gland	75
1. Imaging Techniques	15	5. Pitfalls and Differential Diagnosis	79
1.1 Multiparametric MRI Technique	16	5.1 Pitfalls and Differential Diagnosis in MRI	80
1.1.1 General Aspects	16	5.1.1 General Aspects	80
1.1.2 Technical Requirements	16	5.1.2 Pitfalls	80
1.1.3 Preparation of Patients	18	5.1.3 Postbioptic Changes	85
1.1.4 Imaging Protocols	19	5.2 Pitfalls and Differential Diagnosis in TRUS	86
1.2 Multiparametric Ultrasound Technique	24	5.2.1 Calcifications	86
1.2.1 General Aspects	24	5.2.2 Artefacts near the Bladder Neck and Periurethral	86
1.2.2 Technical Requirements	25	5.2.3 Benign Hyperplasia of the Prostate	87
1.2.3 Imaging Protocols	26	5.2.4 Adenomatous Nodules	87
		5.2.5 Focal and Granulomatous Prostatitis	88
		5.2.6 Abscess	88
		5.3 Limitations of Imaging	89
		5.3.1 General Aspects	89
		5.3.2 Tumor Volume and Size	89
		5.3.3 Tumor Grading / Gleason Score	90
		5.4 Comparison mpTRUS – mpMRI	91
2. Anatomy and Regular Findings	31	6. Strategy and Practical Implementation of Prostate Biopsy	95
2.1 Anatomy and Regular Findings in MRI	32	6.1 TRUS Biopsy	96
2.1.1 General Aspects	32	6.1.1 Systematic Biopsy	96
2.1.2 The Inner Gland	34	6.1.2 TRUS Targeted Biopsy	97
2.1.3 The Outer Gland	35	6.1.3 Systematic vs. Targeted Biopsy	98
2.1.4 Periprostatic Structures	37	6.2 Cognitive, Visual and Technical Image Fusion TRUS/MRI	99
2.2 Anatomy and Regular Findings in TRUS	41	6.2.1 General Aspects	99
2.2.1 General Aspects	41	6.2.2 Cognitive and Visual Image Fusion	99
2.2.2 Zonal Anatomy of the Prostate	41	6.2.3 Technical Image Fusion	100
2.2.3 Periprostatic Structures	43	6.3 MRI Guided In-Bore Biopsy	103
2.2.4 Anatomy of the Probe	44	6.3.1 General Aspects	103
		6.3.2 Indication	103
		6.3.3 Technique	103
		6.3.4 Results	106
3. Detection of Prostate Carcinoma by MRI	45		
3.1 Detection by MRI	46		
3.1.1 General Aspects	46		
3.1.2 Multitparametric Detection – Outer Gland	46		
3.1.3 Multiparametric Detection – Inner Gland	50		
3.2 PIRADS – The Structured Report	54		
3.2.1 General Aspects	54		
3.2.2 Structured Reporting	54		
3.2.3 PIRADS Classification	55		
3.2.4 Considerations on PIRADS Version 2	63		

7. Planning Therapy and Active Surveillance	107	8. PET CT in Prostate Cancer Diagnosis	123
7.1 Pre-Therapeutic Staging	108	8.1 PET CT in Prostate Cancer Diagnosis	124
7.1.1 General Aspects	108	8.1.1 Introduction	124
7.1.2 T Staging	109	8.1.2 18F FDG PET CT	124
7.1.3 N Staging	113	8.1.3 18F Choline and 11C Choline PET CT	125
7.1.4 M Staging	114	8.1.4 T Staging	125
7.2 Watchful Waiting and Active Surveillance of Localized Carcinomas of the Prostate	117	8.1.5 N and M Staging	126
7.2.1 General Aspects	117	8.1.6 Diagnosis of Recurrent Disease	127
7.2.2 Watchful Waiting	117	8.1.7 68Ga PSMA PET CT	128
7.2.3 Active Surveillance	117		
7.3 Post-Therapeutic Staging/Local Recurrence	118		
7.3.1 General Aspects	118		
7.3.2 Local Recurrence	118		
7.3.3 Post-Therapeutic Staging	120
