Abstract	vi
Zusammenfassung	vii
Nomenclature	xiii
1. Introduction	1
1.1. Related Works	3
1.2. Goals of this Thesis	8
1.3. Structure of this Thesis	8
2. Physical Models	11
2.1. Macroscopic Description of the Fluid Motion	11
2.2. Incompressible Fluid Flow	12
2.3. Boltzmann Equation	13
3. Numerical Method	15
3.1. Lattice Boltzmann Method	15
3.1.1. Lattice Boltzmann Equation	15
3.1.2. Recovery of the Macroscopic Hydrodynamic Equation	18
3.1.3. Conversion Between Dimensionless and Physical Unit	19
3.1.4. Initial Condition	20
3.1.5. Boundary Condition	21
3.1.6. Force Evaluation on a Solid Body	23
3.1.7. LBM as a CFD Method	23
3.2. Errors in an LBM simulation	24
3.2.1. Discretization Error	24
3.2.2. Compressibility Error	25
3.2.3. Diffusive Scaling or Acoustic Scaling	26
3.2.4. Relaxation Parameter	27
3.2.5. Initial and Boundary Conditions	28
4. High Performance Computing	29
4.1. Types of Parallel Computers	29
4.1.1. Vector Processor	31

4.1.2. Parallel and Shared Resources	31
4.2. Implementation Aspects and Optimization Strategies	32
4.2.1. Storage Method	32
4.2.2. Domain Decomposition	34
4.2.3. Data Layout	39
4.2.4. Gathering vs. Scattering	41
4.2.5. Balance Analysis	42
4.2.6. Streaming Stores	43
4.3. Performance Analysis on Uniform Meshes	44
4.3.1. The Cray XC40 (Intel x86 Haswell) System Hazel Hen	46
4.3.2. The Lenovo NeXtScale System SuperMUC	48
4.3.3. The IBM BlueGene/Q (PowerPC) System Juqueen	49
4.3.4. The NEC SX-ACE Vector Machine Kabuki	53
4.3.5. Comparison among Machines	57
4.4. Conclusion	57
5. Local Mesh Refinement	59
5.1. General Procedure	60
5.2. Interpolation	62
5.2.1. Quadratic Interpolation for Velocity in Two Dimensions	63
5.2.2. Quadratic Interpolation for Velocity in Three Dimensions	66
5.2.3. Linear Interpolation for Pressure and Strain Rate	68
5.2.4. Interpolation Procedure	68
5.3. Validation	69
5.3.1. Taylor-Green Vortex	69
5.3.2. 2D Flow over a Cylinder at $Re = 20$ and $Re = 100$	74
5.3.3. 3D Flow over a Sphere at $100 \leq Re \leq 1000$	75
5.4. Computational Efficiency	78
5.5. Conclusion	78
6. Load Balance	83
6.1. Space Filling Curve Partition	83
6.1.1. SpartA Algorithm	84
6.1.2. Implementation	85
6.2. Load Balance on a Uniform Mesh	86
6.2.1. Weight Calculation	86
6.2.2. Flow over Sphere Test Case	87
6.3. Load Balance on a Non-Uniform Mesh	90
6.3.1. Recursive Multi-level Algorithm	90
6.3.2. Weight Calculation	94

6.3.3. Two Levels Mesh Test Case	95
6.4. Conclusion	97
7. Conclusion and Future Work	101
A. Appendix	103
A.1. Taylor-Green Vortex	103
A.1.1. 2D Simulation at $Re = 25$	104
A.1.2. 3D Simulation at $Re = 1600$	105
A.2. Steady, Laminar Channel Flow	108
A.3. Laminar Flow Around a Cylinder	109
A.4. Womersley Flow	112
A.5. Non-Newtonian Fluid Flow	114
Bibliography	121
List of Figures	135
List of Tables	139
