

# Contents

<b>1 Basic Principles</b> . . . . .	3	<b>Required Basic Anatomical and Biomechanical</b>	
<b>Why Do Clinicians Need In Vivo Anatomy?</b> . . . . .	3	<b>Knowledge</b> . . . . .	19
<b>What Is Understood by In Vivo Anatomy in this Book?</b> . . . . .	3	<b>General Orientation—Posterior</b> . . . . .	20
<b>Where Can In Vivo Anatomy Be Used?</b> . . . . .	3	Summary of the Palpatory Process . . . . .	20
Component in the Assessment of a Joint or		Starting Position . . . . .	21
Section of the Spine . . . . .	3	Topographical Position of the Scapula . . . . .	21
Orientation before the Application of Special		Medial Border of the Scapula . . . . .	21
Assessment and Treatment Techniques . . . . .	4	<b>Local Palpation—Posterior</b> . . . . .	21
Basis for the Local Treatment of Tendons,		Summary of the Palpatory Process . . . . .	22
Bursae, etc. . . . .	4	Starting Position . . . . .	22
<b>Clinical Relevance</b> . . . . .	4	Inferior Angle of the Scapula . . . . .	22
<b>Characteristics of Palpation</b> . . . . .	4	Medial Border of the Scapula . . . . .	23
<b>When Is In Vivo Anatomy Applied?</b> . . . . .	5	Superior Angle of the Scapula . . . . .	23
<b>Prerequisites</b> . . . . .	5	Spine of the Scapula—Inferior Edge . . . . .	23
Anatomical Background . . . . .	5	Acromial Angle . . . . .	24
Precise Palpation as a Process . . . . .	5	Acromion . . . . .	24
Define Objectives . . . . .	5	Spine of the Scapula—Superior Edge . . . . .	25
Preparation . . . . .	5	Supraspinatus—Muscle Belly . . . . .	26
Localization . . . . .	6	Infraspinatus—Tendon and Insertion . . . . .	27
The Reliable Result . . . . .	6	<b>Local Palpation—Lateral</b> . . . . .	28
Experience . . . . .	6	Summary of the Palpatory Process . . . . .	29
Central Aspects of the Procedure . . . . .	6	Lateral Edge of the Acromion . . . . .	29
Pressure Applied during Palpation . . . . .	6	Acromial Spine . . . . .	29
<b>Palpatory Techniques</b> . . . . .	7	AC Joint—Anterior Approach . . . . .	30
Palpating the Skin . . . . .	7	AC Joint—Posterior Approach . . . . .	30
Palpating Bony Edges . . . . .	7	Acromioclavicular Joint . . . . .	31
Palpating Bony Prominences . . . . .	8	<b>Tips for Assessment and Treatment</b> . . . . .	33
Palpating Muscle Bellies . . . . .	8	<b>General Orientation—Anterior</b> . . . . .	34
Palpating the Edge of Muscles . . . . .	9	Starting Position . . . . .	34
Palpating Tendons . . . . .	10	Supraclavicular and Infraclavicular Fossae . . . . .	34
Palpating Ligaments . . . . .	10	<b>Local Palpation—Anterior</b> . . . . .	35
Palpating Capsules . . . . .	11	Summary of the Palpatory Process . . . . .	35
Palpating Bursae . . . . .	11	Starting Position . . . . .	35
Palpating Neural Structures . . . . .	12	Sternocleidomastoid . . . . .	35
Palpating Blood Vessels (Arteries) . . . . .	13	Medial End of the Clavicle . . . . .	35
<b>Palpation Aids</b> . . . . .	13	Sternoclavicular Joint Space . . . . .	36
Guiding Structures . . . . .	13	Infraclavicular Fossa . . . . .	36
Connecting Lines . . . . .	14	Coracoid Process . . . . .	36
Supporting Measures for Confirming a Palpation . . . . .	14	<b>Tips for Assessment and Treatment</b> . . . . .	37
Marking Structures . . . . .	15	<b>Local Palpation—Anterolateral</b> . . . . .	37
Starting Positions for Practice (Practice SPs) . . . . .	15	Summary of the Palpatory Process . . . . .	37
<b>Study Questions</b> . . . . .	16	Starting Position . . . . .	37
		Borders of the Coracoid Process . . . . .	38
		Subscapularis Tendon . . . . .	39
		Lesser Tubercle of the Humerus . . . . .	39
		Intertubercular Sulcus and the Greater Tubercle of	
		the Humerus . . . . .	40
		Glenoid Cavity . . . . .	41
		Supraspinatus—Insertion . . . . .	42
		<b>Study Questions</b> . . . . .	44
<b>2 Shoulder Complex</b> . . . . .	19		
<b>Significance and Function of the Shoulder</b>

Anatomy of the Lower Cervical Spine . . . . .	318	<b>Introduction</b> . . . . .	369
Lower Cervical Spine Biomechanics . . . . .	320	<b>Significance and Function of the Temporomandibular Joint</b> . . . . .	369
Anatomy of the Occiput and the Upper Cervical Spine . . . . .	322	<b>Common Applications for Treatment in this Region</b> . . . . .	369
Ligaments of the Cervical Spine . . . . .	324	<b>Required Basic Anatomical and Biomechanical Knowledge</b> . . . . .	369
Biomechanics of the Upper Cervical Spine . . . . .	326	<b>Anatomy of the Bony Skull</b> . . . . .	370
Posterior Muscles . . . . .	327	Dividing the Head into Regions . . . . .	370
Anterior and Lateral Muscles . . . . .	329	Overview of the Frontal Aspect of the Viscerocranium . . . . .	370
Nerves and Blood Vessels . . . . .	331	<b>Palpation of the Bony Skull</b> . . . . .	370
<b>Summary of the Palpatory Process</b> . . . . .	332	Frontal Aspect of the Viscerocranium . . . . .	370
<b>Starting Position</b> . . . . .	332	Lateral Aspect of the Skull . . . . .	371
<b>Difficult and Alternative Starting Positions</b> . . . . .	334	<b>The Jaw—Temporomandibular Joints</b> . . . . .	371
<b>Posterior Palpation Techniques</b> . . . . .	334	Required Basic Knowledge of Topography and Morphology . . . . .	372
Occiput . . . . .	334	Biomechanics of the Temporomandibular Joint . . . .	372
Suboccipital Fossa and Ligamentum Nuchae . . . . .	335	Assessing Deviations from the Mid-line during Mouth Opening . . . . .	373
C2 Spinous Process . . . . .	337	<b>Palpating the Temporomandibular Joints</b> . . . . .	374
Spinous Processes of the Lower Cervical Spine . . . .	338	Summary of the Palpatory Process . . . . .	374
Facet Joints . . . . .	339	Assessment of the Clicking Phenomenon during Active Mouth Opening . . . . .	375
Muscles, Suboccipital Nerves, and Blood Vessels . .	342	<b>Palpatory Examination of the Jaw Muscles</b> . . . . .	375
Tips for Assessment and Treatment . . . . .	346	Summary of the Palpatory Process . . . . .	375
Test for the Alar Ligaments . . . . .	347	Masseter . . . . .	376
Identifying the Level of Chronically Irritated Intervertebral Disks . . . . .	349	Medial Pterygoid Muscle . . . . .	377
Functional Massage . . . . .	349	Lateral Pterygoid Muscle . . . . .	378
<b>Lateral Palpation Techniques</b> . . . . .	350	Temporalis . . . . .	380
Angle of the Mandible . . . . .	351	Anterior and Posterior Bellies of the Digastric . . . .	382
C1 Transverse Process . . . . .	352	<b>Study Questions</b> . . . . .	385
C2 and C3 Transverse Processes . . . . .	353	<b>Bibliography</b> . . . . .	387
Boundaries of the Posterior Triangle of the Neck . .	353	<b>Index</b> . . . . .	391
Occipital Triangle of the Neck . . . . .	357		
Supraclavicular Triangle of the Neck . . . . .	358		
Tips for Assessment . . . . .	360
