	Introduction	1
SECTION I	ORTHODONTIC RETENTION	3
Chapter 1	History	5
	Anne-Marie Renkema, Piotr Fudalej	
	<hr/>	
	Introduction	5
	Orthodontic retention until the early 1970s	6
	Orthodontic retention after the development of the acid-etch technique (from the early 1970s)	10
	Retention regimen	13
	Summary	13
	References	13
Chapter 2	Biological basis for orthodontic relapse	15
	Jaap C. Maltha, Johannes W. Von den Hoff	
	<hr/>	
	Introduction	15
	The process of orthodontic relapse	16
	Etiology of orthodontic relapse	22
	Turnover of periodontal fibers	22
	Discussion and conclusions	24
	References	25
Chapter 3	Orthodontic retention: a review and assessment of the clinical evidence	29
	Padhraig S. Fleming, Christos Katsaros, Nikolaos Pandis	
	<hr/>	
	Introduction	29
	Retention research: levels of evidence and evidence-based orthodontics	30
	Primary study design (experimental and observational studies)	31
	Systematic reviews (SRs) and meta-analyses (MAs) of interventions	34
	Conclusions	39
	References	39
	Appendix	41

SECTION II	DENTOFACIAL TREATMENT STABILITY AND RELAPSE	43
Chapter 4	Long-term changes in incisor irregularity and dental arch form/ dimensions with and without orthodontic treatment	45
	Lars Bondemark	
	Introduction	45
	Important factors regarding relapse after orthodontic treatment	45
	Overall conclusions and clinical implications	52
	References	53
Chapter 5	Stability of transverse dimension orthodontic changes: a systematic review and pooled analysis	55
	Connie Pui-Yu Ling, Humam Saltaji, Navdeep Dhaliwal, Hollis Lai, Alejandro Iglesias-Linares, Manuel O. Lagravère, Carlos Flores-Mir	
	Statement of the problem	55
	Methodology	58
	Results	60
	Discussion	70
	Conclusions	73
	References	74
Chapter 6	Stability and relapse of Class II malocclusion treatment	79
	Stavros Kiliaridis, Cristina Vento, Gregory S. Antonarakis	
	Introduction	79
	Treatment characteristics	80
	Patient characteristics	86
	Functional characteristics	89
	Conclusions	90
	References	90
Chapter 7	Stability and relapse of Class III treatment	93
	Peter Ngan, David R. Musich	
	Introduction	93
	Stability after early Class III treatment	94
	Differential diagnosis, mechanotherapy, and compliance	96
	Age factor and growth pattern	100
	Retention protocol for early Class III treatment	113
	Stability after surgical Class III treatment	119
	Factors affecting stability/prevention of instability	119
	Retention protocol for surgical Class III treatment	121
	References	122

Chapter 8	Stability of anterior open bite treatment: some things old, some things new	125
	Greg J. Huang	
	Introduction	125
	Conventional orthodontics and orthognathic surgery	125
	Strategies for future research	127
	Temporary anchorage devices or skeletal anchorage	128
	Bilateral sagittal split osteotomy with counterclockwise rotation	129
	Summary	131
	References	131
 Chapter 9	 Stability and relapse in orthognathic surgery	 133
	Neeraj Panchal, Christine Ellis, Paul Tiwana	
	Introduction	133
	Early relapse	133
	Late relapse	135
	Functional matrix hypothesis	135
	Other factors affecting long-term stability	136
	Evidence of postsurgical stability	137
	Correction of vertical maxillary excess	137
	Correction of vertical maxillary deficiency	138
	Correction of maxillary anterior-posterior deficiency	138
	Correction of mandibular deficiency	138
	Correction of mandibular anterior-posterior excess	139
	Simultaneous correction of vertical maxillary excess and mandibular deficiency	139
	Simultaneous correction of maxillary anterior-posterior deficiency and mandibular excess	139
	Correction of maxillary transverse deficiency	141
	Conclusions	143
	References	143
 SECTION III	 RETENTION PROTOCOLS AND MATERIALS	 145
 Chapter 10	 Acrylic removable retainers	 147
	Jan Hourfar, Georgios Kanavakis, Björn Ludwig	
	Introduction	147
	Hawley-type retainers	148
	Essix-type retainers	157
	Clinical management during the retention phase	160
	Relapse during the retention phase	162
	Conventional and digital fabrication of setup models and Essix retainers	164

	Duration of the retention phase	167
	Factors associated with the lack of compliance in retainer wear	168
	Caries prophylaxis during retention with removable appliances	169
	Home care instructions for orthodontic retainers	169
	Microelectronic monitoring of appliance wear	170
	What type of retainer should be recommended?	173
	References	173
Chapter 11	Fixed retention in orthodontics	177
	Iosif Sifakakis, Christos Katsaros, Theodore Eliades	
	Introduction	177
	Clinical observations	177
	Biomechanical aspects	178
	<i>In vitro</i> evaluation of force systems in teeth bonded on fixed retainers	180
	References	186
Chapter 12	Biomaterials used for fixed retainers in orthodontics	189
	Iosif Sifakakis, Christos Katsaros, Spiros Zinelis, Theodore Eliades	
	Introduction	189
	Mechanical and physical properties of wires and adhesive cements used in fixed retainers	191
	References	199
Chapter 13	Fixed-retainers: long-term effectiveness	203
	Anne-Marie Renkema, Piotr S. Fudalej	
	Introduction	203
	Long-term effectiveness of fixed retainers	203
	References	208
	Index	209
