

Contents

1. Introduction
2. The concept of miniaturization
 - 2.1 The „Environment“
 - 2.2 A measure of the quantification of miniaturization
3. An interesting property of miniaturization degree m_{Di} , (m-chains)
4. Application example 1: Miniaturization of computer components (Example hard discs: the development since 1956)
5. Application example 2: Miniaturization of computer systems (Example file servers: Required air-conditioned area in the computer centre
Aim: Cost reduction in the data centre)
6. Limits of Miniaturization
(Investigation: 1. Is there a limit ?
 2. Size of the limit value ?
 3. limit at which time achieved ?)
7. Non-geometric miniaturization
8. Summary
