

Content

Acknowledgment	I
Abbreviations	III
1 General introduction	1
1.1 Molecular and structural properties of milk proteins	2
1.2 Proteins at the air/water interface	12
1.3 Foaming properties of proteins	20
1.4 Factors affecting surface and foaming properties of proteins	27
2 Objective and outline	33
3 Results	35
3.1 Multiscale approach to characterize bulk, surface and foaming behavior of casein micelles as a function of alkanisation ...	35
3.2 Correlation between surface activity and foaming properties of individual milk proteins in dependence of solvent composition ...	59
3.3 Correlation between bulk characteristics of aggregated β -lacto- globulin and its surface and foaming properties ...	81
3.4 Evaluation of structural characteristics determining surface and foaming properties of β -lactoglobulin aggregates ...	107
4 Overall discussion	131
5 Conclusion	141
6 Summary/Zusammenfassung	143
6.1 Summary	143
6.2 Zusammenfassung	146
7 References	151
