

Abstract.....	1
1 General Introduction	5
1.1 Synthesis routes to tungsten carbides	6
1.2 The catalytic performance of tungsten carbide	10
1.3 Kinetics and mechanism investigations on tungsten carbide	13
1.4 Surface fractal structure analysis	17
1.5 Aim and motivation in this work	19
References	21
2 Synthesis of Pure Phase WC and Supported WC Using WO ₃ as Precursor	27
2.1 Introduction and motivation.....	28
2.2 Experimental section	31
2.2.1 Synthesis route	31
2.2.2 Characterization	33
2.3 Formation of bulk WC from WO ₃	35
2.3.1 Structural characterization.....	35
2.3.2 Oxidation stability study of WC.....	41
2.4 Synthesis of WC on supports.....	43
2.4.1 Conversion of WO ₃ /KIT-6 to WC/KIT-6	43
2.4.2 Conversion of WO ₃ /Al ₂ O ₃ to WC/Al ₂ O ₃	52
2.4.3 Synthesis of pure phase WC on activated carbon.....	56
2.4.4 Oxidation stability of WC/AC under air atmosphere	65
2.4.5 Conversion of pure phase WC on carbon materials	68
2.5 Conclusions	72

Table of Content

References	75
3 Mechanism and Kinetics Investigations of Bulk Tungsten Carbide Formation.....	79
3.1 Introduction.....	80
3.2 Experimental section	83
3.2.1 Preparation of tungsten carbide	83
3.2.2 X-ray powder diffraction analysis	83
3.2.3 Temperature programmed reduction – mass spectroscopy	84
3.2.4 Gibbs free energy calculation.....	84
3.3 Results and discussion	85
3.3.1 Mechanistic investigations on the synthesis of WC via WO ₃	85
3.3.2 Phase transformation mechanism at different final temperatures ..	91
3.3.3 Kinetics of WC formation.....	97
3.4 Conclusions	100
References	103
4 Mechanism and Kinetics Investigations of the Formation of Tungsten Carbide Supported on Activated Carbon	107
4.1 Introduction.....	108
4.1.1 Background of supported tungsten carbides	108
4.1.2 Motivation.....	109
4.2 Experimental section	111
4.2.1 Preparation of WC/AC.....	111
4.2.2 X-ray powder diffraction analysis	111

Table of Content

4.2.3 Brunauer-Emmett-Teller (BET) Analysis	112
4.3 Results and discussion	113
4.3.1 XRD measurements	113
4.3.2 BET analysis	118
4.3.3 Kinetics of WC/AC formation	125
4.4 Conclusions	130
References	133
5 Surface Fractal Structure Analysis of Carbon Supported Tungsten Carbide	137
5.1 Introduction	138
5.1.1 Surface fractal dimension	138
5.1.2 Motivation	140
5.2 Experimental section	142
5.2.1 WC/AC preparation	142
5.2.2 Brunauer-Emmett-Teller (BET) analysis	142
5.3 Results and discussions	143
5.3.1 Nitrogen adsorption and desorption isotherms	143
5.3.2 Surface fractal dimension analysis by N ₂ gas adsorption isotherms	146
5.4 Conclusions	149
References	151
6 Summary	153
7 Appendix	157
7.1 List of publications	158
