

Contents

1. Introduction	11
1.1 Summary of research aims and approach	15
1.2 Methods	16
2. Comparing in-situ soil development in marginal areas	17
2.1 Soil development in Jordan	17
2.1.1 Landscape change in the Decapolis region in the context of soil distribution	17
2.1.2 Soil distribution in Jordan: the role of climate	19
2.1.3 Soil distribution in Jordan: the role of land degradation	23
2.1.4 Soil substrate classification	26
2.1.5 Parent materials and degree of soil development	29
2.1.6 Quartz grain microsurfaces as archives of deposition histories	39
2.1.7 Soil redness and weathering along a climate gradient	45
2.1.8 Comparing bedrock residue, soils, and Ti/Zr-ratios: methodical considerations	56
2.1.9 Metasomatic neof ormation of clay	59
2.1.10 Loess in north-east Jordan	65
2.1.11 Summary: soil development in Jordan	67
2.2 Soil development on limestone in central Germany	69
2.2.1 Terra rossa soils and red clay fills in limestone cracks in Franconia	70
2.2.2 Results: bulk soil analysis	72
2.2.3 Results: thin sections	74
2.2.4 Discussion: genesis of Terrae calcis in Franconia	77
2.2.5 Summary: soil development in central Germany	78
2.3 Soil development on limestone in Mexico	78
2.3.1 Comparing soil development in semi-humid and humid areas	81
2.3.2 Results and discussion of soil analysis in Mexico	87
2.3.3 Interpreting soil development on limestone in Mexico	93
2.3.4 Summary: soil development in Mexico	98
2.4 Summary: comparison of soil development	100
2.5 Key findings of the comparison of soil development	103
3. Historic landscape changes in the context of sediments	104
3.1 Valley fills in Jordan	104
3.1.1 Alluvial deposits and valley fills	104
3.1.2 Wadi Ziqlab: the role of slope collapses	106
3.1.3 'Ain Ghazal: floodplain transformations during the early Holocene?	108
3.1.4 Fell 'Ain Ghazal victim to increasing aridity?	111
3.1.5 Is there soil development in the debris covering 'Ain Ghazal?	115
3.1.6 Summary interpretation of sediments and soil development at 'Ain Ghazal	116
3.1.7 Early Holocene environmental changes in the context of a buried paleosol?	118
3.1.8 Remains of old valley fills near Ba'ja?	119
3.1.9 Possible environmental interpretation of the paleosol	121
3.1.10 Summary: possible Early Holocene environmental changes at Ba'ja	124
3.1.11 A valley fill in Wadi Queilbeh near Abila in northern Jordan	125
3.1.12 Analysis of the valley fill in Wadi Queilbeh	126
3.1.13 Environment changes documented by the sediments in Wadi Queilbeh	131
3.1.14 Landslides, sheet flows, and slope collapses	132
3.1.15 Land use and sedimentation in Wadi Queilbeh	133
3.1.16 Terra rossa soil creep	134
3.1.17 Environmental changes at Abila in the context of global climate events	134

3.1.18 The Dead Cities in northern Syria.....	135
3.1.19 Results of soil and sediment analysis in the Dead Cities region.....	138
3.2 Discussion of valley sediments in Jordan.....	141
3.2.1 Valley fills in geoarchaeological context: prehistoric landscape changes.....	142
3.2.2 Valley fills in geoarchaeological context: historic landscape changes.....	145
3.2.3 Drivers of valley fill aggradation and incision.....	147
3.2.4 Historic land use in the vicinity of Wadi Queilbeh.....	148
3.2.5 Extreme events and periods of rapid climate change.....	151
3.2.6 Summary of valley fills in Jordan.....	154
3.3 Past erosion-sedimentation phases in Mexico.....	155
3.3.1 The role of the Spanish conquest.....	155
3.3.2 Reconstructions of erosion and sedimentation in Mexico.....	156
3.3.3 The San Pablo sediment profile near Teotihuacan.....	157
3.3.4 Remains of the black soil on Cerro Gordo.....	158
3.3.5 Discussion: erosion and sedimentation in Mexico.....	159
3.4 Historic erosion-sedimentation processes in central Germany.....	160
3.4.1 Soils, sediments, and field systems of Fatschenbrunn, Steigerwald.....	160
3.4.2 Interpreting soil distribution near Fatschenbrunn in the context of past land use.....	163
3.5 Discussion of historic landscape changes in the context of sediments.....	165
3.5.1 Challenges of theoretical models.....	165
3.5.2 Understanding past land use.....	165
3.5.3 Modern analogies of erosion caused by current land use.....	166
3.5.4 The role of extreme events.....	167
3.6 Summary of landscape changes reflected by sediments.....	168
4. Final discussion.....	169
4.1 Comparing soils and sediments in Jordan, Mexico, and Germany.....	169
4.2 Past erosion and modern society.....	171
4.3 Future soil development.....	173
4.4 The Anthropocene.....	174
4.5 Outlook.....	175
5. Summary and conclusion.....	176
6. References.....	179
