Preface — V

Contributing authors — XI

Blaire Steven

- 1 An Introduction to Arid Soils and Their Biology — 1**
 - 1.1 The Definition and Extent of Arid Ecosystems — 1
 - 1.2 Characteristics of Arid Soils — 2
 - 1.3 Soil Habitats in Arid Regions — 2
 - 1.3.1 Refugia Sites Associated with Rocks — 3
 - 1.3.2 Shrubs as Islands of Fertility — 3
 - 1.3.3 Biological Soil Crusts — 5
 - 1.4 The Pulse Reserve Paradigm of Arid Ecosystems — 6
 - 1.5 Response of Arid Ecosystems to Disturbance — 7
 - 1.6 Arid Ecosystems as a Model for Soil Biology — 7
 - 1.7 Summary — 7

Carlos Garcia, J.L.Moreno, T. Hernandez, and F. Bastida

- 2 Soils in Arid and Semiarid Environments: the Importance of Organic Carbon and Microbial Populations. Facing the Future — 15**
 - 2.1 Introduction — 15
 - 2.2 Climate Regulation and Soil Organic Carbon in Arid-Semiarid Zones — 16
 - 2.3 Land Use and Soil Organic Carbon in Arid-Semiarid Zones — 17
 - 2.4 Soil Restoration in Arid-Semiarid Zones: Amendments Based on Exogenous Organic Matter — 18
 - 2.5 Microbial Biomass and Enzyme Activity in Arid-Semiarid Zones — 19
 - 2.6 Organic Carbon, Macro and Microaggregates, and C Sequestration in Arid-Semiarid Zones — 22
 - 2.7 Conclusion — 23

Gary M. King

- 3 Water Potential as a Master Variable for Atmosphere–Soil Trace Gas Exchange in Arid and Semiarid Ecosystems — 31**
 - 3.1 Introduction — 31
 - 3.2 Water Potential and Water Potential Assays — 32
 - 3.3 Limits of Growth and Metabolic Activity — 35
 - 3.4 Water Potential and Trace Gas Exchanges — 37
 - 3.5 Conclusions — 41

Thulani P. Makhalanyane, Storme Z. de Scally, and Don A. Cowan

4	Microbiology of Antarctic Edaphic and Lithic Habitats — 47
4.1	Introduction — 47
4.2	Classification of Antarctic soils — 48
4.2.1	McMurdo Dry Valley Soils — 49
4.2.2	Antarctic Peninsula Soils — 50
4.3	Bacterial Diversity of Soils in the MDVs and Antarctic Peninsula — 51
4.4	Cryptic Niches in Antarctic Environments — 54
4.4.1	Hypoliths — 55
4.4.2	Epiliths — 56
4.4.3	Endoliths — 57
4.5	Biogeochemical Cycling in Antarctic Environments — 59
4.6	Viruses in Antarctic Edaphic Ecosystems — 59
4.7	Conclusions and Perspectives — 60

Matthew A. Bowker, Burkhard Büdel, Fernando T. Maestre, Anita J. Antoninka, and David J. Eldridge

5	Bryophyte and Lichen Diversity on Arid Soils: Determinants and Consequences — 73
5.1	Overview — 73
5.1.1	Moss, Liverwort, and Lichen Biology — 73
5.2	Global Diversity and Characteristic Taxa — 74
5.2.1	Global Species Pool — 74
5.2.2	Global Characteristic Taxa and β Diversity — 75
5.3	Determinants of Moss, Liverwort, and Lichen Diversity on Arid Soils — 78
5.3.1	Geographic Isolation and Biogeography — 78
5.3.2	Climatic Gradients and Climate Change — 79
5.3.3	Calcicole–Calcifuge Dichotomy and Soil pH Gradients — 80
5.3.4	The Special Case of Gypsiferous Soils — 81
5.4	Consequences of Moss, Liverwort, and Lichen Diversity on Arid Soils — 82
5.4.1	Contribution of Biocrust Lichens and Bryophytes to Arid Ecosystem Function — 82
5.4.2	Biodiversity–Ecosystem Functioning Relationship — 83
5.4.3	Effects of Species Richness, Turnover, and Evenness on Ecosystem Functions — 84
5.4.4	Multifunctionality — 87
5.4.5	Functional Redundancy or Singularity? — 88
5.5	Summary and Conclusions — 89

Andrea Porras-Alfaro, Cedric Ndinga Muniania, Paris S. Hamm, Terry J. Torres-Cruz, and Cheryl R. Kuske

6 Fungal Diversity, Community Structure and Their Functional Roles in Desert Soils — 97

- 6.1 Spatial Heterogeneity of Fungal Communities in Arid Lands — 97
- 6.1.1 Biocrusts — 100
- 6.1.2 Plant Associated Fungi in Deserts — 103
- 6.2 Roles in Nutrient Cycling and Effects of Climate Change on Fungal Communities — 107
- 6.3 Extremophiles in Deserts — 108
- 6.3.1 Thermophilic and Thermotolerant Fungi — 109
- 6.3.2 Rock Varnish and Microcolonial Fungi in Deserts — 109
- 6.4 Human Pathogenic Fungi in Desert Ecosystems — 111
- 6.4.1 *Coccidioides immitis* and *C. posadasii* — 112
- 6.4.2 Dematiaceous and Keratinolytic Fungi in Deserts — 112
- 6.4.3 Eumycetoma — 113
- 6.4.4 Mycotoxins — 114
- 6.5 Importance of Fungal Biodiversity in Arid Lands — 115

T.G. Allan Green

7 Limits of Photosynthesis in Arid Environments — 123

- 7.1 Introduction — 123
- 7.2 Photosynthetic Responses to Environmental Factors, a Background — 124
- 7.2.1 Rates, Chlorophyll and Mass — 124
- 7.2.2 Response of Net Photosynthesis (NP) to Light (PPFD, $\mu\text{mol m}^{-2} \text{s}^{-1}$) — 126
- 7.2.3 Response of Net Photosynthesis to Temperature — 127
- 7.2.4 Response of Net Photosynthesis to Thallus Water Content (WC) — 127
- 7.2.5 Response of Net Photosynthesis to CO_2 Concentration — 129
- 7.3 Optimal Versus Real Photosynthetic Rates — 129
- 7.4 Limits to Photosynthesis in Arid Areas — 131
- 7.4.1 Length of Active Time — 131
- 7.4.2 Limits When Active – External Limitation Through Light and Temperature — 132
- 7.4.3 Limits When Active – Internal Limitation Through Thallus Hydration — 132
- 7.4.4 Catastrophes — 133
- 7.5 Flexibility – an Often Overlooked Factor — 134
- 7.6 Summary — 134

Blaire Steven, Theresa A. McHugh, and Sasha Reed

8 The Response of Arid Soil Communities to Climate Change — 139

- 8.1 Overview — 139**
- 8.2 Biological Responses to Elevated Atmospheric CO₂ — 140**
- 8.3 Biological Responses to Increased Temperature — 142**
- 8.4 Biological Responses to Changes in Precipitation — 143**
- 8.4.1 Natural Precipitation Gradients — 145**
- 8.4.2 Precipitation Manipulation Studies — 147**
- 8.5 Interactions Between Temperature and Soil Moisture — 149**
- 8.6 Conclusion — 150**

**Doreen Babin, Michael Hemkemeyer, Geertje J. Pronk, Ingrid Kögel-Knabner,
Christoph C. Tebbe, and Kornelia Smalla**

9 Artificial Soils as Tools for Microbial Ecology — 159

- 9.1 Introduction — 159**
- 9.2 Soil Definition — 160**
- 9.3 History of Artificial Soil Experiments — 162**
- 9.4 Methods in Soil Microbial Ecology and Soil Science — 164**
- 9.5 Insights into Microbial Communities from Artificial Soil Studies — 166**
- 9.5.1 Establishment and Structuring of Soil Microbial Communities — 166**
- 9.5.2 Functioning of Soil Microbial Communities — 169**
- 9.6 Artificial Soils for Arid Soil Research — 174**
- 9.7 Concluding Remarks — 175**

Index — 181
