Inhaltsverzeichnis

Development of a flexible special kinematics for the fully mechanized production of tubular nodes for offshore foundation structures
Hagen Herholz, Steffen Dryba, Mirko Gründler and Martin-Christoph Wanner

Enabling Domain Experts to Model and Execute Tasks in Flexible Human-Robot Teams
Dominik Riedelbauch, Tobias Werner and Dominik Henrich

Virtual Testbeds for the Development of Sensor-Enabled Applications
Jörn Thieling and Jürgen Roßmann

Cloud-based Plant and Process Monitoring based on a Modular and Scalable Data Analytics Infrastructure
Ilja Maurer, Mauro Riva, Christian Hansen and Tobias Ortmaier

Normal Operation Input Signals for Parameter Estimation in Underactuated Structures
Gunnar Borchert, Jonas Diekmeyer, Konrad Bild and Annika Raatz

Joining Linked Micro Formed Parts through Tolerance Field Widening and Synchronization
Ann-Kathrin Onken, Patrick Rückert, Christian Perl and Kirsten Tracht

Combined Structural-Dimensional Synthesis of Robot Manipulators for Minimal Energy Consumption
Daniel Ramirez, Jens Kotlarski and Tobias Ortmaier

Development of a modular framework for contact force models
Tobias Osterloh and Jürgen Roßmann

Development of a Methodology for the Determination of Conceptual Automated Disassembly Systems
Julius Wolff, Torge Kolditz, Lutz Günther and Annika Raatz

Feature Recognition, Sub-Path Creation and Sequence Optimization in Systems for Processing of 2.5D Workpieces During Throughput
Denise Klose, Martin Ketels and Thorsten Schüppstuhl

Bibliografische Informationen
http://d-nb.info/1135581851

digitalisiert durch DEUTSCHE NATIONAL BIBLIOTHEK

Design and Evaluation of a Multi-Agent Software Architecture for Risk-Minimized Path Planning in Human-Robot Workcells
Tobias Werner, Dominik Riedelbauch and Dominik Henrich

Challenges of the Miniaturization in the Electronics Production on the example of 01005 components
Jens Niemann, Stefan Härter, Christopher Kästle and Jörg Franke

Boundary Conditions in Handling of Microspheres Induced by Shape Deviation Constraints
Finn Meiners, Sebastian Hogreve and Kirsten Tracht

Continuous Digitalization of Rotationally Symmetrical Components With a Lateral Scanning White Light Interferometer
Sönke Bahr, Marc-André Otto, Tomas Domaschke and Thorsten Schüppstuhl

Towards a Mobile Robotic Assembly System Using a Compliant Robot
Ulrich Berger, Duc Tho Le, Wenchao Zou and Mayur Andulkar

Task-based Simulation Tool for Human-Robot Collaboration within Assembly Systems
Paul Glogowski, Kai Lemmerz, Lena Schulte, Andre Barthelmey, Alfred Hypki, Bernd Kuhlenkötter and Jochen Deuse

Centralized vs. decentralized storage of semantic definitions used for data exchange within the CAx toolchain
Matthias Bartelt and Bernd Kuhlenkötter

Behavior Trees for Task-Level Programming of Industrial Robots
Akos Csiszar, Martin Hoppe, Shahbaz A. Khader and Alexander Verl

Work Space Layout and Evaluation Using the Elbedome 2.0 Virtual Environment
Michael Schenk and Steffen Masik

Automated handling of high-temperature thermoplastic Carbon Fiber materials for a large-scale production
Johannes Graf, Christoph Richter and Gunther Reinhar
