

Contents

1	Introduction to Image Processing — 1
1.1	Basic Concepts of Images — 1
1.1.1	Images and Digital Images — 1
1.1.2	Matrix and Vector Representation — 2
1.1.3	Image Display — 3
1.1.4	High Dimensional Images — 5
1.2	Image Engineering — 5
1.2.1	Image Techniques and Image Engineering — 6
1.2.2	Three Levels of Image Engineering — 6
1.2.3	Related Disciplines and Fields — 9
1.2.4	A Survey on Image Engineering — 9
1.3	Image Processing System — 11
1.3.1	A Block Diagram of System — 11
1.3.2	Image Acquisition Equipment — 12
1.3.3	Image Display and Printing — 15
1.3.4	Image Storage — 20
1.3.5	Image Processing — 23
1.4	Overview of the Book — 24
1.5	Problems and Questions — 26
1.6	Further Reading — 26
2	Image Acquisition — 29
2.1	Spatial Relationship in Image Formation — 29
2.1.1	Coordinate System — 29
2.1.2	Perspective Transformations — 30
2.1.3	Approximate Projection Modes — 34
2.1.4	A General Camera Model — 37
2.1.5	Common Imaging Model — 40
2.2	Stereo Imaging — 43
2.2.1	Parallel Horizontal Model — 43
2.2.2	Focused Horizontal Model — 46
2.2.3	Axis Model — 47
2.3	Image Brightness — 48
2.3.1	Luminosity — 48
2.3.2	A Model of Image Brightness — 50
2.4	Sampling and Quantization — 51
2.4.1	Spatial Resolution and Amplitude Resolution — 52
2.4.2	Image Quality Related to Sampling and Quantization — 54
2.4.3	Sampling Considerations — 57
2.5	Problems and Questions — 59
2.6	Further Reading — 60

3	Image Enhancement — 62
3.1	Image Operations — 62
3.1.1	Arithmetic and Logical Operations — 62
3.1.2	Applications of Image Operations — 64
3.2	Direct Gray-Level Mapping — 67
3.2.1	Gray-Level Mapping — 67
3.2.2	Typical Examples of Mapping Functions — 69
3.3	Histogram Transformation — 70
3.3.1	Histogram Equalization — 70
3.3.2	Histogram Specification — 74
3.4	Frequency Filtering — 78
3.4.1	Low-Pass Filtering — 79
3.4.2	High-Pass Filtering — 82
3.5	Linear Spatial Filters — 85
3.5.1	Technique Classification and Principles — 85
3.5.2	Linear Smoothing Filters — 87
3.6	NonLinear Spatial Filters — 89
3.6.1	Median Filters — 89
3.6.2	Order-Statistic Filters — 91
3.7	Problems and Questions — 94
3.8	Further Reading — 96
4	Image Restoration — 97
4.1	Degradation and Noise — 97
4.1.1	Image Degradation — 97
4.1.2	Noise and Representation — 99
4.2	Degradation Model and Restoration Computation — 102
4.2.1	Degradation Model — 102
4.2.2	Computation of the Degradation Model — 103
4.2.3	Diagonalization — 104
4.3	Techniques for Unconstrained Restoration — 107
4.3.1	Unconstrained Restoration — 107
4.3.2	Removal of Blur Caused by Uniform Linear Motion — 110
4.4	Techniques for Constrained Restoration — 113
4.4.1	Constrained Restoration — 113
4.4.2	Wiener Filter — 113
4.4.3	Constrained Least Square Restoration — 116
4.5	Interactive Restoration — 119
4.6	Image Repairing — 122
4.6.1	The Principle of Image Repairing — 123
4.6.2	Image Inpainting with Total Variational Model — 125
4.6.3	Image Completion with Sample-Based Approach — 128

4.7	Problems and Questions —	131
4.8	Further Reading —	133
5	Image Reconstruction from Projections —	135
5.1	Modes and Principles —	135
5.1.1	Various Modes of Reconstruction from Projections —	135
5.1.2	The Principle of Reconstruction from Projections —	143
5.2	Reconstruction by Fourier Inversion —	144
5.2.1	Fundamentals of Fourier Inversion —	145
5.2.2	Reconstruction Formulas of the Fourier Inverse Transform —	146
5.2.3	Phantom Reconstruction —	148
5.3	Convolution and Back-Projection —	150
5.3.1	Convolution Back-Projection —	150
5.3.2	Filter of the Back-Projections —	154
5.3.3	Back-Projection of the Filtered Projections —	157
5.4	Algebraic Reconstruction —	160
5.4.1	Reconstruction Model —	160
5.4.2	Algebraic Reconstruction Technique —	161
5.4.3	Simultaneous Algebraic Reconstruction Technique —	162
5.4.4	Some Characteristics of ART —	164
5.5	Combined Reconstruction —	164
5.6	Problems and Questions —	166
5.7	Further Reading —	168
6	Image Coding —	170
6.1	Fundamentals —	170
6.1.1	Data Redundancy —	170
6.1.2	Image Quality and Judgment —	173
6.2	Variable-Length Coding —	175
6.2.1	Huffman Coding —	175
6.2.2	Suboptimal Huffman Coding —	176
6.2.3	Shannon-Fano Coding —	177
6.2.4	Arithmetic Coding —	178
6.3	Bit-Plane Coding —	180
6.3.1	Bit-Plane Decomposition —	180
6.3.2	Bit-Plane Coding —	182
6.4	Predictive Coding —	185
6.4.1	Lossless Predictive Coding —	185
6.4.2	Lossy Predictive Coding —	187
6.5	Transform Coding —	192
6.5.1	Transform Coding Systems —	192
6.5.2	Sub-Image Size Selection —	193

6.5.3	Transform Selection —	194
6.5.4	Bit Allocation —	196
6.5.5	Wavelet Transform Coding —	199
6.5.6	Lifting-Based Wavelet Coding —	200
6.6	Problems and Questions —	202
6.7	Further Reading —	203
7	Image Watermarking —	205
7.1	Principles and Characteristics —	205
7.1.1	Embedding and Detection of Watermarks —	206
7.1.2	Characteristics of Watermarks —	207
7.1.3	Classification of Watermarks —	209
7.2	Image Watermarking in DCT Domain —	211
7.2.1	Algorithm for Meaningless Watermark —	212
7.2.2	Algorithm for Meaningful Watermark —	214
7.3	Image Watermarking in DWT Domain —	216
7.3.1	Human Visual Properties —	216
7.3.2	Algorithm for Wavelet Watermark —	219
7.4	Performance Evaluation of Watermarking —	222
7.4.1	Distortion Metrics —	222
7.4.2	Benchmarking and Attack —	223
7.4.3	Examples of Watermark Performance Test —	225
7.5	Information Hiding —	229
7.5.1	Watermarking and Information Hiding —	229
7.5.2	Images Hiding Based on Iterative Blending —	230
7.6	Problems and Questions —	234
7.7	Further Reading —	235
8	Color Image Processing —	236
8.1	Color Vision and Chromaticity Diagram —	237
8.1.1	Color Vision Fundamentals —	237
8.1.2	Three Primary Colors and Color Matching —	238
8.1.3	Chroma and Chromaticity Diagram —	239
8.2	Color Models —	243
8.2.1	Hardware-Orientated Models —	244
8.2.2	Perception-Orientated Models —	248
8.3	Pseudo-Color Enhancement —	253
8.3.1	Intensity Slicing —	253
8.3.2	Gray Level to Color Transformations —	254
8.3.3	Frequency Domain Filtering —	255
8.4	Full-Color Enhancement —	255
8.4.1	Strategy and Principles —	256
8.4.2	Single Component Mapping —	257

8.4.3	Full-Color Enhancements —	259
8.5	Problems and Questions —	264
8.6	Further Reading —	266

Answers to Selected Problems and Questions —	267
