Part I: Simple Computing Techniques

1	Introduction.....	3
1.1	Recognition Systems	6
1.1.1	Data Acquisition	7
1.1.2	Pre-processing.....	8
1.1.3	Segmentation	9
1.1.4	Feature Extraction.....	9
1.1.5	Pattern Matching.....	10
1.2	Biometric Systems	10
1.2.1	Physiological Biometrics	11
1.2.2	Behavioral Biometrics	11
1.2.3	Fusion Methods	12
1.3	Types of Problems in Soft Computing.....	12
1.3.1	Classification	13
1.3.2	Functional Prediction	14
1.3.3	Optimization	16
1.4	Machine Learning	16
1.4.1	Supervised Learning	17
1.4.2	Unsupervised Learning	18
1.4.3	Reinforcement Learning	19
1.5	Expert Systems	20
1.6	Problems in Soft Computing Systems	22
1.7	Generalization.....	24
1.8	A Design Perspective.....	27
1.9	Chapter Summary	27
	References	28
2	Artificial Neural Networks.....	31
2.1	Multi Layer Perceptron.....	33
2.1.1	Back Propagation Algorithm	36
2.1.2	Number of Layers and Neurons	38
2.1.3	Learning Rate.....	40
2.1.4	Momentum.....	40
2.1.5	Epochs	40

2.2	Radial Basis Function Networks.....	43
2.2.1	Working	43
2.2.2	Conceptualization	44
2.2.3	Number of Neurons and Spread.....	45
2.3	Learning Vector Quantization	47
2.3.1	Working	48
2.3.2	Conceptualization	48
2.4	Self Organizing Maps	49
2.4.1	Self Organizing Feature Map.....	49
2.4.2	Clustering.....	50
2.5	Adaptive Resonance Theory	51
2.5.1	Working	51
2.5.2	Conceptualization	52
2.6	Recurrent Neural Networks	53
2.6.1	Working	54
2.6.2	Conceptualization	55
2.7	Problems with Neural Networks.....	55
2.8	Chapter Summary	56
	References	57
3	Genetic Algorithm	59
3.1	Simple Genetic Algorithm.....	62
3.1.1	Conceptualization	63
3.2	Individual Representation	64
3.2.1	Role of Good Encoding Technique.....	66
3.3	Scaling	66
3.3.1	Proportional Scaling	67
3.3.2	Rank Scaling.....	67
3.3.3	Top Scaling.....	68
3.4	Selection	68
3.4.1	Roulette Wheel Selection.....	69
3.4.2	Stochastic Uniform Sampling.....	69
3.4.3	Tournament Selection	70
3.5	Crossover	70
3.5.1	Bit String Representation Individuals	71
3.5.2	Numeral Vector Representation.....	73
3.6	Mutation.....	73
3.6.1	Uniform Mutation	74
3.6.2	Gaussian Mutation	75
3.7	Other Genetic Operators	76
3.7.1	Elite.....	76
3.7.2	Insert and Delete	76
3.7.3	Repair.....	77
3.7.4	Hard and Soft Mutation	77
3.8	Number of Individuals	77

3.9 Stopping Criterion	78
3.10 Diversity	79
3.11 Chapter Summary	80
References	81
4 Fuzzy Logic.....	83
4.1 Fuzzy Sets.....	84
4.2 Fuzzy Logical Operators.....	87
4.2.1 AND Operator	88
4.2.2 OR Operator.....	89
4.2.3 NOT Operator.....	90
4.2.4 Implication Operator.....	91
4.3 Aggregation	93
4.4 Defuzzification	94
4.5 Fuzzy Inference Systems	95
4.5.1 Number of Membership Functions	96
4.5.2 Type of Membership Functions	98
4.5.3 Rules	99
4.6 Comparisons between Fuzzy Systems and Neural Nets	99
4.6.1 Differences.....	100
4.6.2 Similarities.....	100
4.6.3 Comparisons with RBFNs	101
4.6.4 Remarks	102
4.7 Limitations of the Fuzzy Systems.....	102
4.8 Type-2 Fuzzy Systems.....	102
4.9 Other Sets	104
4.9.1 Rough Sets	105
4.9.2 Vague Sets	105
4.9.3 Intuitionistic Fuzzy Sets.....	105
4.10 Chapter Summary	106
References	107

Part II: Simple Intelliegent Systems

5 Speech Signal Analysis	111
5.1 Feature Extraction.....	112
5.1.1 Good Features in Classification	112
5.1.2 Need of Features	113
5.1.3 Who Decides the Features?.....	114
5.1.4 Analogies with the Human Brain.....	114
5.1.5 Number of Attributes and Classification	115
5.2 Spectral Analysis	116
5.2.1 Number of Zero Crossings.....	117
5.2.2 Duration of Utterance	117
5.2.3 Pitch.....	117

5.2.4	Amplitude	117
5.2.5	Spectrogram Analysis	118
5.2.6	Power Spectral Density	118
5.3	Bank of Filters	119
5.3.1	Fourier Transform	121
5.3.2	Short-Time Fourier Transform	122
5.3.3	Wavelet Transform	123
5.4	Linear Predictive Coding	124
5.5	Chapter Summary	127
	References	127
6	Intelligent System Design in Speech	129
6.1	Recognition Systems Using Speech	130
6.1.1	Input	130
6.1.2	Preprocessing	131
6.1.3	Segmentation	132
6.1.4	Dynamic Time Warping	133
6.1.5	Feature Extraction	133
6.1.6	Pattern Recognition	134
6.2	Types	134
6.2.1	Speech Recognition	135
6.2.2	Speaker Recognition	136
6.2.3	Speaker Verification	136
6.2.4	Language Identification	137
6.3	Further System Classifications	137
6.3.1	Text Dependence	137
6.3.2	Speaker Cooperation	138
6.3.3	System Robustness	139
6.4	Template Based Matching	139
6.5	Speaker Verification System Design	141
6.5.1	Enrolment	141
6.5.2	Verification	142
6.5.3	System Update	142
6.5.4	Verification Ratios	142
6.5.5	Matching Threshold	143
6.5.6	Mimic Resistance	144
6.6	Recognition with Closed and Open Data Sets	145
6.7	Making of a Good Database	146
6.8	Example of Speaker Recognition	146
6.8.1	Making up of a Database	146
6.8.2	Speech Processing	147
6.8.3	Inputs and Outputs	147
6.8.4	Training	148
6.8.5	Testing	148
6.9	Chapter Summary	149
	References	150

7	Intelligent Systems Design in Music	153
7.1	Genre Classification.....	154
7.1.1	Feature Extraction.....	155
7.1.2	Pattern Recognition.....	157
7.1.3	n-Fold Cross Validation.....	158
7.1.4	Experimentation.....	158
7.2	Musical Classifications.....	158
7.2.1	Feature Extraction.....	159
7.2.2	Dimensionality Reduction	160
7.2.3	Pattern Recognition.....	161
7.2.4	Experimentation.....	163
7.3	Music Composition by Interactive Evolutionary Computation	165
7.3.1	Interactive Evolutionary Computation.....	166
7.3.2	Genetic Architecture.....	167
7.3.3	Individual Representation	167
7.3.4	Genetic Operations	168
7.3.5	Evaluations	169
7.4	Computer Assisted Music Composition	169
7.4.1	Thematic Bridging	169
7.4.2	Individual Representation	170
7.4.3	Fitness Evaluations	171
7.5	Chapter Summary	171
	References	171
8	Intelligent System Design in Face	175
8.1	Face as a Biometric.....	176
8.2	Visual Dimensionality Reduction	177
8.2.1	Principle Component Analysis	178
8.2.2	R-LDA.....	179
8.3	Morphological Analysis.....	180
8.4	Pattern Recognition	181
8.4.1	Multi-layer Perceptron.....	182
8.4.2	Radial Basis Function Networks.....	182
8.5	Experimentation.....	182
8.6	Chapter Summary	183
	References	183

Part III: Evolutionary Computing

9	Swarm Intelligence	187
9.1	Particle Swam Optimization	188
9.1.1	Terms and Concepts.....	188
9.1.2	Algorithm.....	189
9.1.3	Maximum Velocity.....	190

9.2	Ant Colony Optimization.....	191
9.2.1	Algorithm.....	192
9.3	Artificial Bee Colonies	194
9.3.1	Employed.....	194
9.3.2	Onlooker	196
9.3.3	Scouts.....	196
9.3.4	Algorithm.....	197
9.4	Stochastic Diffusion Search.....	198
9.5	Probability Based Incremental Learning	200
9.5.1	Representation	200
9.5.2	Generation of Samples.....	201
9.5.3	Training.....	201
9.6	Biogeography-Based Optimization.....	202
9.6.1	Representation	203
9.6.2	Habitat Modification.....	203
9.6.3	Mutation.....	204
9.7	Chapter Summary	205
	References	205
10	Genetic Programming	187
10.1	Analogy with Genetic Algorithms	210
10.2	Problem Representation.....	212
10.3	Fitness Function.....	214
10.4	Selection	216
10.5	Crossover.....	217
10.6	Mutation.....	218
10.7	Other Commonly Used Operators	220
10.7.1	Elite.....	220
10.7.2	Replication.....	220
10.7.3	Architecture Altering	220
10.8	Convergence	221
10.9	Code Growth.....	223
10.9.1	Parsimony	223
10.9.2	Code Modification	224
10.9.3	Parameter Modification	224
10.10	Generating Complex Programs.....	224
10.10.1	Automatically Defined Functions	225
10.10.2	Emergent Library Builder	225
10.10.3	Comparisons	226
10.11	Grammatical Evolution.....	228
10.11.1	Grammar.....	229
10.11.2	Individual Representation	230
10.12	Chapter Summary	232
	References	232

11	Evolutionary Strategies	235
11.1	Adaptation	236
11.2	Individual Representation	237
11.3	Evolution	238
11.3.1	(1+1) ES.....	238
11.3.2	$(\mu/\rho+\lambda)$ and $(\mu/\rho+\lambda, k)$ Representations	239
11.3.3	$(\mu/\rho, \lambda)$ Representation.....	239
11.4	Recombination.....	240
11.5	Mutation.....	241
11.6	Chapter Summary	245
	References	246
12	Other Evolutionary Concepts	249
12.1	Differential Evolution.....	250
12.1.1	Attribute Difference D_{abcd}^j	251
12.1.2	Mutation.....	251
12.1.3	Crossover	253
12.1.4	Selection	253
12.1.5	General Algorithm	254
12.2	Artificial Immune System.....	254
12.2.1	Representation	255
12.2.2	Detectors	256
12.2.3	Comparing Particles.....	257
12.2.4	Training.....	257
12.2.5	Memory Storage	259
12.3	Co-evolution	259
12.3.1	Decomposition.....	260
12.3.2	Fitness Evaluation.....	261
12.3.3	Replenishment	261
12.3.4	Other Evolutionary Operators.....	262
12.4	Cultural Algorithms	263
12.4.1	Belief Space.....	263
12.4.2	Belief Space Representation	264
12.4.3	Acceptance.....	265
12.4.4	Influence	265
12.4.5	Adjust.....	265
12.5	Cellular Automata.....	266
12.5.1	States.....	267
12.5.2	Neighborhood	268
12.5.3	Transition Rules	268
12.5.4	Space Time Diagrams	270
12.6	Chapter Summary	271
	References	271

Part IV: Hybrid Computing

13	Evolutionary Neural and Fuzzy Systems	277
13.1	Issues in Use of Neural and Fuzzy Systems	278
13.1.1	Fixed Architecture	278
13.1.2	Variable Architecture.....	279
13.2	Evolutionary Systems	279
13.3	Evolving Fixed Architecture Neural Network	280
13.3.1	Individual Representation	281
13.3.2	Genetic Operators	281
13.3.3	Local Search	282
13.3.4	Fitness Evaluations	283
13.4	Connectionist Approach in Neural Network Evolution	283
13.4.1	Problems with Large Number of Weights	284
13.4.2	Limited Connection Neural Network.....	285
13.4.3	Individual Representation	286
13.4.4	Genetic Operators	287
13.4.5	Fitness Evaluation.....	287
13.5	Incremental Evolution of Neural Network.....	288
13.5.1	Individual Representation	288
13.5.2	Increase in Complexity	289
13.5.3	Crossover	290
13.5.4	Mutation.....	290
13.5.5	Grow	290
13.5.6	Elite.....	291
13.5.7	Add	291
13.5.8	Fitness Evaluation.....	292
13.6	Grammatical Evolution of Neural Network.....	292
13.6.1	Grammar	293
13.6.2	Genetic Operators	294
13.6.3	Fitness Evaluation.....	295
13.7	Evolution of Fixed Architecture Fuzzy System.....	295
13.7.1	Individual Representation	296
13.7.2	Genetic Operators	296
13.7.3	Fitness Evaluation.....	297
13.8	Evolving Variable Architecture Fuzzy System.....	298
13.8.1	Individual Representation	298
13.8.2	Genetic Operators	301
13.8.3	Fitness Function.....	301
13.9	Evolving a Learning Rule	301
13.9.1	Learning Rule Modeling	302
13.9.2	Evolutionary Optimizations	303
13.10	Chapter Summary	304
	References	305

14	Modular Neural Networks	307
14.1	Modular Neural Networks	308
14.1.1	Problem Division	309
14.1.2	Modules	309
14.1.3	Integration.....	310
14.2	Ensemble	310
14.2.1	Ensembles for Classification.....	310
14.2.2	Ensembles for Functional Approximation	313
14.2.3	Integrator.....	314
14.3	Modularity in Computation	320
14.3.1	Divide and Conquer	320
14.3.2	Hierarchy of Experts	321
14.4	Modularity in Input Space	322
14.4.1	Division of Input Space	323
14.4.2	Training and Testing	324
14.4.3	Classification	324
14.4.4	Functional Prediction	326
14.4.5	Problem Generality	327
14.5	Evolutionary Modular Neural Network	327
14.5.1	Individual Representation	328
14.5.2	Genetic Operators	329
14.5.3	Fitness Evaluations	330
14.6	Co-evolution of Modular Neural Network.....	330
14.6.1	Module Level.....	331
14.6.2	Network Level	332
14.7	Chapter Summary	332
	References	333
15	Hybridizing Neural and Fuzzy Systems.....	337
15.1	Adaptive Neuro Fuzzy Inference Systems.....	338
15.1.1	Layered Architecture	340
15.1.2	Training.....	344
15.2	Evolutionary Adaptive Neuro Fuzzy Inference Systems	346
15.2.1	Interaction between the Evolutionary Approaches	347
15.2.2	Genetic Programming	347
15.2.3	Genetic Algorithm	350
15.3	Fuzzy Neural Networks	350
15.3.1	Fuzzy Arithmetic	352
15.3.2	Training.....	355
15.4	Rule Extraction from Neural Networks	356
15.5	Chapter Summary	357
	References	358
16	Parallel and Hierarchical Evolutionary Algorithms.....	361
16.1	Fitness Landscape Complexity	362
16.1.1	High Dimensionality	362

16.1.2 Sensitive Fitness Landscape	363
16.1.3 Parameter Setting	363
16.1.4 Diversity	364
16.2 Island Model Algorithm	365
16.2.1 Islands	365
16.2.2 Information Exchange	366
16.2.3 Algorithm Outline	367
16.3 Hierarchical Fair Competition	368
16.3.1 Sub-populations	369
16.3.2 Transfer of Characteristics	370
16.3.3 Algorithm Outline	371
16.4 Nested Evolutionary Strategies	372
16.4.1 Inner Evolutionary Strategies	372
16.4.2 Outer Evolutionary Strategies	372
16.4.3 Algorithm Outline	373
16.5 Hybrid Genetic Algorithm Particle Swarm Optimization	376
16.5.1 Genetic Algorithm	376
16.5.2 Particle Swarm Optimization	377
16.5.3 Algorithm Outline	377
16.6 Chapter Summary	378
References	379

Part V: Hybrid Intelligent Systems

17 Fusion Methods in Biometrics	385
17.1 Fusion of Face and Speech	386
17.2 Pre-classification Fusion	387
17.2.1 Fusion Process	387
17.2.2 Inputs	388
17.2.3 Classification	389
17.2.4 Experimentation	390
17.3 Post-classification Fusion	390
17.3.1 Problem Division	390
17.3.2 Module Inputs	391
17.3.3 Modules	393
17.3.4 Integrator	393
17.3.5 Experimentation	394
17.4 Division of Input Space	394
17.4.1 Problem Division	395
17.4.2 Modules	396
17.4.3 Experimentation	396
17.5 Chapter Summary	397
References	397

18	Multimodal Biometric Systems	401
18.1	Biometric Modalities	402
18.1.1	Bi-Modal Systems.....	402
18.1.2	Tri-Modal Systems	403
18.1.3	Higher Modality Systems	403
18.2	Fusion of Speech, Lip and Face	404
18.2.1	Face.....	405
18.2.2	Speech.....	405
18.2.3	Lip.....	406
18.2.4	Fusion	406
18.2.5	Experimentation.....	407
18.3	Fusion of Face, Fingerprint and Speech.....	408
18.3.1	Face.....	408
18.3.2	Fingerprint	409
18.3.3	Speech.....	411
18.3.4	Fusion	411
18.4	Fusion of Face, Fingerprint and Hand Geometry.....	412
18.4.1	Face.....	412
18.4.2	Fingerprint	413
18.4.3	Hand Geometry.....	413
18.4.4	Fusion	413
18.4.5	Experimentation.....	416
18.5	Chapter Summary	416
	References	416

Part VI: Other Supplementary Topics

19	Adaptive Systems	421
19.1	Parameters	422
19.1.1	Role.....	422
19.1.2	Parameter Setting by Evolutionary Algorithms	423
19.1.3	Towards Parameter-Less Systems	424
19.2	Classification of Adaptation	424
19.3	Types of Adaptation	425
19.3.1	Static Systems.....	426
19.3.2	Deterministic Systems	426
19.3.3	Adaptive Systems	427
19.3.4	Self-adaptive Systems.....	428
19.4	Level of Adaptation	428
19.4.1	Environment	428
19.4.2	Population.....	429
19.4.3	Individual.....	429
19.4.4	Component.....	430
19.5	Chapter Summary	430
	References	430

20 A Taxonomy of Models.....433

21 A Programmer’s Approach441

 21.1 Neural Systems443

 21.1.1 Training and Testing Data Sets.....443

 21.1.2 k-Fold Testing.....445

 21.2 Modular Neural Networks447

 21.2.1 Ensembles447

 21.2.2 Modularity in Computation.....450

 21.3 Evolutionary Neural Networks with Fixed Architecture453

 21.4 Evolutionary Neural Networks with Connectionist Architecture458
