

Contents

I. Foundations	1
1. Introduction	3
1.1. Motivation	4
1.2. Related Work	8
1.3. Overview	10
2. Wind Turbine Placement Optimization	13
2.1. Optimization Problem	14
2.2. Solving Optimization Problems	16
2.3. Heuristic Black-Box Optimization	18
2.3.1. Popular Approaches	18
2.3.2. Solution Space	23
2.4. Representation	25
2.4.1. Binary Representation	25
2.4.2. Real-Valued Representation	28
2.5. Remarks	31
II. Placement Model	33
3. Wind Model	35
3.1. Wind Turbine	36
3.2. Wind Prediction Model	37
3.3. Power Computation	39
3.3.1. Starting Point for the Development	39
3.3.2. Model Improvements	40
3.3.3. Sampling Rate	42

3.4. Wake Effects	45
3.4.1. Local Optima Through Discretization	48
3.4.2. Rotor Size of the Affected Turbine	51
3.5. Remarks	52
4. Geographical Data	55
4.1. Priority Areas for Wind Energy	57
4.1.1. Point in Polygon	57
4.1.2. Planning Scenarios	58
4.2. Topographical Map Service	62
4.2.1. OpenStreetMap	62
4.2.2. Minimum Distance Rules	64
4.2.3. Planning Scenarios	65
4.3. Remarks	69
III. Constrained Placement Optimization	71
5. Various Approaches with Death Penalty	73
5.1. Initialization	74
5.2. Constraint Handling	76
5.3. Evolutionary Algorithms	76
5.3.1. Holistic Approaches	77
5.3.2. Turbine-Oriented Approaches	78
5.4. Simulated Annealing	79
5.4.1. Turbine-Oriented Neighborhood	80
5.4.2. Deterministic Cooling Schedule	81
5.5. Experimental Results	83
5.5.1. Random Approach	84
5.5.2. Grid Approach	87
5.5.3. Evolutionary Algorithms	91
5.5.4. Simulated Annealing	99
5.6. Conclusions	104

6. Constraint Handling with Penalty Functions	107
6.1. Optimization Algorithm	108
6.2. Penalty	111
6.3. Penalty Functions	117
6.4. Experimental Results	119
6.4.1. Comparison with Random Initialization	119
6.4.2. Comparison with Feasible Random Initialization	122
6.4.3. Analysis of Optimization Runs	124
6.4.4. Placement Results	126
6.5. Conclusions	129
7. Advanced Evolutionary Heuristics	131
7.1. Multimodal Optimization	132
7.1.1. Local Optima	133
7.1.2. Basins for Turbine Placement Optimization	137
7.1.3. Analysis of Basin Distribution	139
7.2. Self-Adaptive Optimization	142
7.2.1. Self-Adaptive Evolutionary Algorithm	143
7.2.2. Extension applying Multimodal Optimization	145
7.3. Experimental Results	148
7.3.1. Comparison of the Optimization Results	149
7.3.2. Analysis of the Evolutionary Runs	151
7.3.3. Different Basins Achieved by the Same Run	156
7.3.4. Self-Adaptive Behavior	158
7.4. Conclusions	161
IV. Conclusions	163
8. Summary and Outlook	165
8.1. Performance	166
8.2. Flexibility	170
8.3. Outlook	174
