

Contents

1	Introduction to Image Understanding — 1
1.1	The Development of Image Engineering — 1
1.1.1	Review of Basic Concepts and Definitions — 1
1.1.2	An Overview of a Closed Image Technology Survey — 5
1.1.3	A New Image Engineering Survey Series — 5
1.2	Image Understanding and Related Disciplines — 9
1.2.1	Image Understanding — 9
1.2.2	Computer Vision — 10
1.2.3	Other Related Disciplines — 13
1.2.4	Application Domains of Image Understanding — 15
1.3	Theory Framework of Image Understanding — 16
1.3.1	The Visual Computational Theory of Marr — 16
1.3.2	Improvements for Marr's Theoretical Framework — 24
1.3.3	Discussions on Marr's Reconstruction Theory — 27
1.3.4	Research on New Theoretical Frameworks — 30
1.4	Overview of the Book — 33
1.5	Problems and Questions — 34
1.6	Further Reading — 35
2	Stereo Vision — 37
2.1	Modules of Stereo Vision — 37
2.1.1	Camera Calibration — 37
2.1.2	Image Capture — 38
2.1.3	Feature Extraction — 38
2.1.4	Stereo Matching — 38
2.1.5	Recovering of 3-D Information — 39
2.1.6	Post-processing — 39
2.2	Region-Based Binocular Matching — 40
2.2.1	Template Matching — 40
2.2.2	Stereo Matching — 42
2.3	Feature-Based Binocular Matching — 44
2.3.1	Basic Methods — 44
2.3.2	Matching Based on Dynamic Programming — 47
2.4	Horizontal Multiple Stereo Matching — 49
2.4.1	Horizontal Multiple Imaging — 49
2.4.2	Inverse-Distance — 50
2.5	Orthogonal Trinocular Matching — 53
2.5.1	Basic Principles — 54
2.5.2	Orthogonal Matching Based on Gradient Classification — 57
2.6	Computing Subpixel-Level Disparity — 62

2.7	Error Detection and Correction — 66
2.7.1	Error Detection — 66
2.7.2	Error Correction — 67
2.8	Problems and Questions — 70
2.9	Further Reading — 71
3	3-D Shape Information Recovery — 72
3.1	Photometric Stereo — 72
3.1.1	Scene Radiance and Image Irradiance — 73
3.1.2	Surface Reflectance Properties — 76
3.1.3	Surface Orientation — 77
3.1.4	Reflectance Map and Image Irradiance Equation — 79
3.1.5	Solution for Photometric Stereo — 82
3.2	Structure from Motion — 85
3.2.1	Optical Flow and Motion Field — 85
3.2.2	Solution to Optical Flow Constraint Equation — 86
3.2.3	Optical Flow and Surface Orientation — 90
3.3	Shape from Shading — 93
3.3.1	Shading and Shape — 93
3.3.2	Gradient Space — 95
3.3.3	Solving the Brightness Equation with One Image — 97
3.4	Texture and Surface Orientation — 102
3.4.1	Single Imaging and Distortion — 103
3.4.2	Recover Orientation from Texture Gradient — 105
3.4.3	Determination of Vanishing Points — 108
3.5	Depth from Focal Length — 110
3.6	Pose from Three Pixels — 111
3.6.1	Perspective ThreePoint Problem — 112
3.6.2	Iterative Solution — 112
3.7	Problems and Questions — 114
3.8	Further Reading — 115
4	Matching and Understanding — 116
4.1	Fundamental of Matching — 116
4.1.1	Matching Strategy and Groups — 117
4.1.2	Matching and Registration — 118
4.2	Object Matching — 120
4.2.1	Measurement of Matching — 120
4.2.2	String Matching — 123
4.2.3	Matching of Inertia Equivalent Ellipses — 123
4.3	Dynamic Pattern Matching — 125
4.3.1	Flowchart of Matching — 125
4.3.2	Absolute Patterns and Relative Patterns — 126

4.4	Relation Matching —	128
4.5	Graph Isomorphism —	132
4.5.1	Fundamentals of the Graph Theory —	132
4.5.2	Graph Isomorphism and Matching —	135
4.6	Labeling of Line Drawings —	137
4.6.1	Labeling of Contours —	137
4.6.2	Structure Reasoning —	139
4.6.3	Labeling with Sequential Backtracking —	140
4.7	Problems and Questions —	141
4.8	Further Reading —	143
5	Scene Analysis and Semantic Interpretation —	144
5.1	Overview of Scene Understanding —	144
5.1.1	Scene Analysis —	145
5.1.2	Scene Perception Layer —	145
5.1.3	Scene Semantic Interpretation —	147
5.2	Fuzzy Reasoning —	148
5.2.1	Fuzzy Sets and Fuzzy Operation —	148
5.2.2	Fuzzy Reasoning Methods —	150
5.3	Image Interpretation with Genetic Algorithms —	153
5.3.1	Principle of Genetic Algorithms —	153
5.3.2	Semantic Segmentation and Interpretation —	155
5.4	Labeling of Objects in Scene —	159
5.4.1	Labeling Methods and Key Elements —	160
5.4.2	Discrete Relaxation Labeling —	160
5.4.3	Probabilistic Relaxation Labeling —	162
5.5	Scene Classification —	163
5.5.1	Bag of Words/Bag of Feature Models —	164
5.5.2	pLSA Model —	167
5.5.3	LDA Model —	170
5.6	Problems and Questions —	176
5.7	Further Reading —	177
6	Multisensor Image Fusion —	179
6.1	Overview of Information Fusion —	179
6.1.1	Multisensor Information Fusion —	180
6.1.2	Sensor Models —	182
6.2	Image Fusion —	185
6.2.1	Main Steps of Image Fusion —	185
6.2.2	Three Layers of Image Fusion —	186
6.2.3	Evaluation of Image Fusion —	188
6.3	Pixel-Layer Fusion —	193
6.3.1	Basic Fusion Methods —	193

6.3.2	Combination of Fusion Methods —	195
6.3.3	The Optimal Decomposition Levels —	199
6.3.4	Examples of Pixel-Layer Fusion —	201
6.4	Feature-Layer and Decision-Layer Fusions —	204
6.4.1	Bayesian Methods —	204
6.4.2	Evidence Reasoning —	205
6.4.3	Rough Set Methods —	208
6.5	Problems and Questions —	212
6.6	Further Reading —	213
7	Content-Based Image Retrieval —	214
7.1	Feature-Based Image Retrieval —	214
7.1.1	Color Features —	214
7.1.2	Texture Features —	216
7.1.3	Shape Features —	218
7.2	Motion-Feature-Based Video Retrieval —	222
7.2.1	Global Motion Features —	222
7.2.2	Local Motion Features —	223
7.3	Object-Based Retrieval —	225
7.3.1	Multilayer Description Model —	225
7.3.2	Experiments on Object-Based Retrieval —	227
7.4	Video Analysis and Retrieval —	229
7.4.1	News Program Structuring —	229
7.4.2	Highlight of Sport Match Video —	233
7.4.3	Organization of Home Video —	238
7.5	Problems and Questions —	244
7.6	Further Reading —	246
8	Spatial–Temporal Behavior Understanding —	248
8.1	Spatial–Temporal Technology —	248
8.1.1	New Domain —	249
8.1.2	Multiple Layers —	249
8.2	Spatial–Temporal Interesting Points —	251
8.2.1	Detection of Spatial Points of Interest —	251
8.2.2	Detection of Spatial–Temporal Points of Interest —	252
8.3	Dynamic Trajectory Learning and Analysis —	254
8.3.1	Automatic Scene Modeling —	255
8.3.2	Active Path Learning —	257
8.3.3	Automatic Activity Analysis —	261
8.4	Action Classification and Recognition —	263
8.4.1	Action Classification —	263
8.4.2	Action Recognition —	265
8.5	Modeling Activity and Behavior —	270

8.5.1	Modeling Action —	270
8.5.2	Activity Modeling and Recognition —	275
8.6	Problems and Questions —	281
8.7	Further Reading —	282

Answers to Selected Problems and Questions —	283
