Preface and Introduction	viii
Preface	viii
Acknowledgments	ix
How the Book Is Structured	x
1 Software: How Does Capture One Work?	1
1.1 Basic Concepts and Features	2
1.2 Which Version Do I Need?	5
1.3 An Overview of the Rendering Pipeline	8
1.4 Color Management and ICC/ICM Profiles	12
1.5 All about Panels, Tabs, and the Capture One Interface in General.	15
1.6 Default Settings for Cameras.....	28
1.7 Program Preferences.....	29
1.8 Global Tools.....	33
2 Hardware	41
2.1 The Oldest Question in the Book: Mac or PC?.....	41
2.2 Choosing the Right Hardware	42
2.3 Using Capture One with Multiple Computers or on a Network ...	44
2.4 Graphics Tablets and Other Input Devices	47
2.5 ICC Profiles: The Importance of Profiling Your Monitor.....	50
3 The Workflow Pipeline	52
4 The Library Tool Tab	54
4.1 Catalog, Session, or Both?	54
4.2 Default Folders and Folder Structures.....	58
4.3 The EIP File Format	61
4.4 Importing Images and Basic Organization.....	64
4.5 User Collections and Folders	70
4.6 Filters.....	75
4.7 Smart Albums	80
4.8 From a Session to a Catalog and Vice Versa.....	83
4.9 XMP Files and Metadata	85
4.10 On the Safe Side: Backups and Integrity Checks.....	86
4.11 Importing Catalogs from Lightroom, Media Pro, and Aperture....	88
5 The Color Tool Tab	92
5.1 Base Characteristics: Rendering Engines, ICC Profiles, and Curves.	92
5.2 Histograms: Evaluate and Understand.....	95
5.3 White Balance.....	98

- 5.4 Color Balance 102
 - 5.5 Black & White 111
 - 5.6 The Color Editor 121
- 6 The Exposure Tool Tab 130
 - 6.1 The Basics: Contrast, Saturation, Brightness, and Exposure..... 131
 - 6.2 High Dynamic Range..... 131
 - 6.3 Understanding Levels and Curves..... 134
 - 6.4 The Clarity Tool..... 140
 - 6.5 The Vignetting Tool..... 142
- 7 The Lens Correction Tab 144
 - 7.1 Lens Corrections and Profiles..... 144
 - 7.2 The Movement Tab 147
 - 7.3 Purple Fringing..... 148
 - 7.4 LCC Profiles—For More than Just Lens Correction..... 149
- 8 The Composition Tool Tab 157
 - 8.1 Crop, Aspect Ratio, Grids, and Guides 158
 - 8.2 Rotate, Flip, and Straighten 164
 - 8.3 Keystone..... 166
 - 8.4 Overlay 172
- 9 The Details Tool Tab 176
 - 9.1 The Navigator and the Focus Tool..... 177
 - 9.2 Sharpening..... 178
 - 9.3 Noise Reduction 187
 - 9.4 Single Pixel..... 189
 - 9.5 Enhanced Noise Reduction: Details and Film Grain 190
 - 9.6 Eliminating Moirés 198
 - 9.7 Dusty Sensors and Spot Removal 199
- 10 The Local Adjustments Tool Tab 206
 - 10.1 Adjustment Layers and Masks..... 207
 - 10.2 Clone and Heal Layers 217
- 11 The Adjustments Tool Tab 220
 - 11.1 Styles and Presets: Basics and Differences..... 220
 - 11.2 Saving, Copying, and Applying Presets and Styles..... 222
 - 11.3 Organizing Styles and Presets 229
- 12 The Metadata Tool Tab 233
 - 12.1 Applying, Copying, and Deleting Metadata 234
 - 12.2 Working with Hierarchical and Nonhierarchical Keywords 238
 - 12.3 Metadata Compatibility and Third-Party Applications 241

13	The Output and Batch Tool Tabs	244
13.1	Creating and Managing Output/Process Recipes	245
13.2	The Process Recipe Tool	246
13.3	Output Location	249
13.4	Output Naming	250
13.5	The Batch Tool Tab: Queue and History	250
14	Tethered Shooting	252
14.1	Getting Started	253
14.2	All About Working Tethered	255
14.3	Capture Location, Collections, and Naming	257
14.4	Applying Automatic Adjustments during Capture	259
14.5	Camera Control	261
14.6	Capture Pilot: Not Just for Studio Use	263
15	Using Capture One with Third-Party Software	267
15.1	Image Databases and DAM Systems	267
15.2	Plug-ins, Photoshop, and Other Raw Developers	271
15.3	Using AppleScript	276
Appendix		279
A.1	The Workflow Pipeline	279
A.2	Other Sources	282
Index		285
