3		ew Standardised Approach for measuring Counterparty Credit Risk	
	_	ures (SA-CCR)	77
	3.1	Counterparty credit risk	77
	3.1.1	Definition of the counterparty credit risk	77
	3.1.2	Measuring counterparty credit risk according to CRR	<i>78</i>
	3.1.3	Background and motives for introducing the SA-CCR approach	79
	3.2	Side note: The supervisory measurement of counterparty	
		credit risk within the current exposure method	79
	3.3	Measurement of counterparty credit risk according to SA-CCR	83
	3.3.1	Exposure at Default	83
	3.3.2	Current replacement cost	84
	3.3.3	Potential future exposure	85
	3.3.4	Calculation example: EAD determination under SA-CCR	97
	3.4	Expected impact on the banking industry	98
	Recor	nmended Literature	99
4		ew Basel Securitisation Framework	101
	4.1	Introduction	101
	4.2	Current EU securitisation framework	102
	4.2.1	Exclusion of securitised exposures from the calculation	
		of the risk-weighted exposure amounts	102
	4.2.2	Approaches for the determination of risk-weighted	
		exposure amounts	104
	4.2.3	Regulations for external credit ratings	110
	4.3	Revisions to the securitisation framework	110
	4.3.1	Criticism of the existing rules	110
	4.3.2	Revisions to the securitisation framework	112
	4.3.3	Risk weights for securitisation positions when complying with	
		STC criteria	125
	4.4	General Conclusions	130
	Recor	nmended Literature	131
5		IV for funds	133
	5.1	Assignment to the trading book or banking book	135
	5.2	Own funds requirements for funds in the banking book	137
	5.2.1	Funds under the Standardised Approach	138
	5.2.2	Funds under the Internal Ratings-Based Approach (IRB)	140
	5.2.3	Leverage Adjustment under the LTA and the MBA	141
	5.2.4	Credit Valuation Adjustment	142

			Content 7
	5.2.5	Treatment of target funds	143
