

Contents

1	Introduction	1
1.1	Motivation	1
1.2	Literature Summary	3
1.3	Goals of the Thesis	4
1.4	Outline of the Thesis	5
2	Problem Description	9
2.1	Problem Statement	9
2.2	Cost Structure	12
2.3	Problem Properties	14
2.4	The Wagner-Within Algorithm	16
2.5	Notations for the Simulations	18
	Nomenclature	19
I	Deterministic Study	23
3	Deterministic Model	25
3.1	Literature Survey	25
3.2	Introduction to Network Theory	29
3.3	Problem Analysis	34
3.4	Flow Network Formulation	37
3.5	Outlook	41
4	Algorithms for Increasing Demand	43
4.1	Introduction	43
4.2	Solution without Disposables	44
4.3	Demand Profitability	47
4.4	Solution Forbidding Close Placements	48
4.5	Solution Allowing Close Placements	55
4.6	Extensions	60
4.7	Outlook	63

5	Algorithms for General Demand	65
5.1	Solution without Delay	65
5.2	Solution without Disposables	70
5.3	Algorithm Forbidding Close Placements	72
5.4	Algorithm Allowing Close Placements	87
5.5	Comparison and Extensions	91
5.6	Network Analysis with Acyclic Flows	94
5.7	Outlook	109
6	Computational Study	111
6.1	Algorithms Performance	111
6.2	Multi-Threading	117
6.3	Compact Network Representation	118
6.4	Cycle-Canceling Algorithm	124
6.5	Simulations	139
6.6	Outlook	141
II	Stochastic Study	143
7	Strategies for the Stochastic Model	145
7.1	Literature Survey	145
7.2	Problem Description	153
7.3	Online Strategy	155
7.4	Convexity under Linear Cost	159
7.5	Offline Heuristic	164
7.6	Hybrid Algorithms	169
7.7	Simulations	173
7.8	Extensions and Outlook	176
8	Alternative Models	179
8.1	Saturated Offline Policy	179
8.2	Offline Solution under Zero Delay	186
8.3	Other Resolution Approaches	191
III	Application and Conclusion	197
9	A Real-Life Application	199
9.1	Problem Data	199
9.2	Description of the Experiments	202
9.3	Experiments	205

10 Conclusion and Future Research	211
10.1 Problem Statement and Contributions	211
10.2 Resolution Methodology	212
10.3 Future Research	213
A Scientific Career	227
B Akademischer Werdegang	229
C Publications	231
